Air Quality Criteria for Carbon Monoxide

AGENCY: Environmental Protection Agency.

ACTION: Call for information.

SUMMARY: The National Center for Environmental Assessment, of the U.S. Environmental Protection Agency (EPA), is undertaking to update and revise, where appropriate, the EPA's Air Quality Criteria for Carbon Monoxide (CO) as required under sections 108 and 109 of the Clean Air Act.

Since completion of the 1991 criteria document for carbon monoxide, the EPA has continued to follow the scientific literature and compile information that may be relevant to the next periodic review of the National Ambient Air Quality Standards for CO (CO NAAQS). Interested parties are invited to assist the EPA in developing and refining its scientific information base to help ensure that all relevant information is considered in updating the Air Quality Criteria for CO. Identification of new information in the following areas will be particularly useful: effects of exposure on laboratory animals and humans; effects on the global climate; chemistry and physics; sources and emissions; transformation and transport in the environment; and ambient concentrations.

To be considered for inclusion in the criteria document and in the next periodic review of the CO NAAQS, submitted information should have been

published, accepted for publication, or presented at a public scientific meeting.

DATES: All communications and information should be submitted by December 31, 1997.

ADDRESSES: Communications should be addressed to the Project Manager for CO, National Center for Environmental Assessment (MD-52), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711.

III. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to James A. Hollins, at the address given above, postmarked before June 1, 1998. This

written withdrawal of the request for cancellation will apply only to the applicable 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier

cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

IV. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in **Federal Register** (56 FR 29362) June 26, 1991; [FRL 3846-4]. Exceptions to this general rule will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product(s). Exceptions to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in Special Review actions, or where the Agency has identified significant potential risk concerns associated with a particular chemical.
