NATIONAL LABOR RELATIONS BOARD

Appointments of Individuals To Serve as Members of Performance Review Boards

5 U.S.C. 4314(c)(4) requires that the appointments of individuals to serve as members of performance review boards be published in the **Federal Register**. Therefore, in compliance with this requirement, notice is hereby given that the individuals whose names and position titles appear below have been appointed to serve as members of performance review boards in the National Labor Relations Board for the rating year beginning October 1, 1996 and ending September 30, 1997.

Name and Title

Richard L. Ahearn—Regional Director, Region 9

Frank V. Battle—Deputy Director of Administration
Mary Joyce Carlson—Deputy General Counsel
Harold J. Datz—Chief Counsel to Board Member
Robert A. Giannasi—Chief Administrative Law Judge
Wayne R. Gold—Director, Office of Representation Appeals
Lester A. Heltzer—Deputy Chief Counsel to Board Member
John E. Higgins—Solicitor
Peter B. Hoffman—Regional Director, Region 34
Gloria Joseph—Director of Administration
Barry J. Kearney—Associate General Counsel, Advice
Linda R. Sher—Associate General Counsel, Enforcement Litigation
Richard A. Siegel—Acting Associate General Counsel, Operations-Management
Elinor H. Stillman—Chief Counsel to Board Member
John J. Toner—Executive Secretary
Dennis P. Walsh—Chief Counsel to Board Member
Alfred L. Wolff—Acting Chief Counsel to the Chairman

Dated: Washington, DC, December 15, 1997.

By Direction of the Board.

John J. Toner,

Executive Secretary.

BILLING CODE 7545-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No.: 40-9027]

Notice of Consideration of Amendment Request

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of consideration of amendment request for decommissioning the Cabot Performance Materials Revere, Pennsylvania, site, and opportunity for a hearing.

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of a license amendment to Source Material License No. SMC-1562 to authorize decommissioning of Cabot Performance Materials (CABOT) Revere, Pennsylvania, site. This license is issued to CABOT to possess contaminated material at its Reading and Revere, Pennsylvania sites. NRC licenses this facility under 10 CFR part 40. Specifically, the license authorizes

CABOT to possess 100 tons of elemental uranium and thorium total at both sites. The contaminated material at the Revere site is in the form of soil located at four discrete locations. The contamination is the result of processing ores which contained uranium and thorium.

On November 19, 1997, the licensee submitted a site decommissioning plan (SDP) to NRC for review that summarized previous decommissioning efforts at the Revere site. The SDP concludes that long-term doses from the contaminated material at current levels meet the requirements of the Radiological Criteria for License Termination rule (62FR39058).

Therefore, the licensee proposes that no additional decommissioning is required.

Prior to the issuance of the amendment, NRC will have made findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation Report and an Environmental Assessment.

NRC provides notice that this is a proceeding on an application for a license amendment falling within the scope of Subpart L, "Informal Hearing Procedures for Adjudication in Materials Licensing Proceedings," of NRC's rules and practice for domestic licensing proceedings in 10 CFR Part 2. Pursuant to § 2.1205(a), any person whose interest may be affected by this proceeding may file a request for a hearing in accordance with § 2.1205(d). A request for a hearing must be filed within thirty (30) days of the date of publication of this **Federal Register** notice.

The request for a hearing must be filed with the Office of the Secretary either:

1. By delivery to Secretary, U.S. Nuclear Regulatory Commission, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852-2738, between 7:45 am and 4:15 pm Federal workdays; or

2. By mail or telegram addressed to Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Attention: Docketing and Services Branch.

In addition to meeting other applicable requirements of 10 CFR Part 2 of the NRC's regulations, a request for a hearing filed by a person other than an applicant must describe in detail:

1. The interest of the requester in the proceeding;
2. How that interest may be affected by the results of the proceeding, including the reasons why the requester should be permitted a hearing, with

particular reference to the factors set out in § 2.1205(h);

3. The requester's areas of concern about the licensing activity that is the subject matter of the proceeding; and

4. The circumstances establishing that the request for a hearing is timely in accordance with § 2.1205(d).

In accordance with 10 CFR § 2.1205(f), each request for a hearing must also be served, by delivering it personally or by mail, to:

1. The applicant, Cabot Performance Materials, P.O. Box 1608, Boyertown, Pennsylvania 19512, Attention: Mr. Anthony T. Campitelli, and;

2. NRC staff, by delivery to Secretary, U.S. Nuclear Regulatory Commission, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852-2738, between 7:45 am and 4:15 pm Federal workdays, or by mail, addressed to Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Docketing and Services Branch.

For further details with respect to this action, the application for renewal is available for inspection at NRC's Public Document Room, 2120 L Street NW., Washington, DC 20555-0001.

FOR FURTHER INFORMATION CONTACT:

Timothy E. Harris, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Telephone: (301) 415-6613. Fax.: (301) 415-5398.

Dated at Rockville, Maryland, this 12th day of December 1997.

For the Nuclear Regulatory Commission.

John W.N. Hickey,

Chief, Low-Level Waste and Decommissioning Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-454, STN 50-455, STN 50-456 AND STN 50-457]

Commonwealth Edison Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. NPF-

37, NPF-66, NPF-72 and NPF-77 issued to Commonwealth Edison Company (the licensee) for operation of Byron Station, Units 1 and 2, located in Ogle County, Illinois and Braidwood Station, Units 1 and 2, located in Will County, Illinois.

The amendment would amend the Technical Specifications (TS) related to "Containment Vessel Structural Integrity," to incorporate the requirements of 10 CFR 50.55a(b)(2)(vi) and 10 CFR 50.55a(b)(2)(ix) and update the existing Containment Vessel Structural Integrity Programs to meet the requirements found in Subsection IWL of the 1992 Edition, 1992 Addenda of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code (Code) Section XI. The proposed amendment would also incorporate Regulatory Guide 1.35.1, 1990, "Determination Prestressing Forces for Inspection of Prestressed Concrete Containment."

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes revise the surveillance requirements for containment reinforced concrete and unbonded post-tensioning systems inservice examinations as required by 10 CFR 50.55a(b)(2)(vi) and 10 CFR 50.55a(b)(2)(ix). The revised requirements affect the inservice inspection program designed to detect structural degradation of the containment reinforced concrete and unbonded post-tensioning systems program and do not affect the function of the containment reinforced concrete and the unbonded post-tensioning system components. The reinforced concrete and the unbonded post-tensioning system are passive components whose failure modes
