SUPPLEMENTARY INFORMATION: Reclamation is prepared to collect Reclamation-wide customer satisfaction information in support of Executive Order (E.O.) 12862, and the Government Performance and Results Act of 1993 (GPRA) requirements, and in pursuit of Reclamation's mission: To manage, develop, and protect water and related resources in an environmentally and economically sound manner in the

interest of the American people. Collection of Reclamation-wide customer satisfaction information furthers our bureau's ability to accomplish 3 essential mission objectives, which are driven by 16 strategies identified in our multi-year GPRA based strategic plan. As part of the Business Practices and Productivity Mission Objective, the Improve Customer Service strategy ensures that the highest quality services are delivered and met through systematically obtaining feedback from our customers.

The fiscal year 1998 data collection is the first assessment and will establish a baseline of capabilities. The baseline data will be used by Reclamation and its region and area offices to increase service to customers. The initial assessment is the beginning of a process in which other assessments will occur in support of required GPRA cycles, identifying improvements over time. The data will enable Reclamation to gauge its business practices in the areas of Reclamation administration and management of its natural resources; contractual arrangements, overhead cost containment, and revenues management; and maintain a standard of quality for service delivery systems.
