

disagree with the petitioners that the respondents' comment is an untimely submission of factual information. The calculations were based on information that was requested by the Department. We have now corrected the calculation and obtained a net countervailable subsidy under the Freight Program of 3.28 percent ad valorem for Mannesmann.

Final Results of Reviews

In accordance with 19 CFR 355.22(c)(4)(ii), we calculated an individual subsidy rate for each producer/exporter subject to these administrative reviews. For the period January 1, 1996 through December 31, 1996, we determine the net subsidy to be as follows:

Manufacturer/exporter of pipe and tube	Rate (percent)
Borusan Group	3.10
Mannesmann	3.73

We will instruct the U.S. Customs Service ("Customs") to assess countervailing duties as indicated above. The Department will also instruct Customs to collect cash deposits of estimated countervailing duties in the percentages detailed above of the f.o.b. invoice price on all shipments of each class or kind of merchandise from reviewed companies, entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of these reviews.

Because the URAA replaced the general rule in favor of a country-wide rate with a general rule in favor of individual rates for investigated and reviewed companies, the procedures for establishing countervailing duty rates, including those for non-reviewed companies, are now essentially the same as those in antidumping cases, except as provided for in § 777A(e)(2)(B) of the Act. The requested review will normally cover only those companies specifically named. See 19 CFR 355.22(a). Pursuant to 19 CFR 355.22(g), for all companies for which a review was not requested, duties must be assessed at the cash deposit rate, and cash deposits must continue to be collected at the rate previously ordered. As such, the countervailing duty cash deposit rate applicable to a company can no longer change, except pursuant to a request for a review of that company. See *Federal-Mogul Corporation and The Torrington Company v. United States*, 822 F.Supp. 782 (CIT 1993); *Floral Trade Council v. United States*, 822 F.Supp. 766 (CIT 1993) (interpreting 19 CFR 353.22(e),

the antidumping regulation on automatic assessment, which is identical to 19 CFR 355.22(g)). Therefore, the cash deposit rates for all companies except those covered by these reviews will be unchanged by the results of these reviews.

We will instruct Customs to continue to collect cash deposits for non-reviewed companies at the most recent company-specific or country-wide rate applicable to the company. Accordingly, the cash deposit rates that will be applied to non-reviewed companies covered by this order will be the rate for that company established in the most recently completed administrative proceeding conducted under the URAA. If such a review has not been conducted, the rate established in the most recently completed administrative proceeding pursuant to the statutory provisions that were in effect prior to the URAA amendments is applicable. See *Certain Welded Carbon Steel Pipe and Tube Products from Turkey; Final Results of Countervailing Duty Administrative Reviews*, 53 FR 9791. These rates shall apply to all non-reviewed companies until a review of a company assigned these rates is requested. In addition, for the period January 1, 1996 through December 31, 1996, the assessment rates applicable to all non-reviewed companies covered by this order are the cash deposit rates in effect at the time of entry.

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 355.34(d). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

These administrative reviews are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act (19 U.S.C. 1675(a)(1)).

Dated: April 8, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 040998C]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of applications for scientific research permits (1140, 1141, and 1143). Issuance of scientific research permits (1067, 1069, 1081, 1093, 1112, and 1123) and modifications to scientific research permits (1025, 1027, 1039, and 1044).

SUMMARY: Notice is hereby given that the following applicants have applied in due form for permits that would authorize takes of an endangered or threatened species for scientific research purposes: Environmental Conservation Division, Northwest Fisheries Science Center, NMFS at Seattle, WA (NWFSC) (1140); Public utility District No. 2 of Grant County at Ephrata, WA (PUDGC) (1141); and the Washington State Department of Natural Resources at Olympia, WA (DNR) (1143).

Notice is also given that NMFS has issued scientific research permits that authorize takes of ESA-listed species for the purpose of scientific research and/or enhancement, subject to certain conditions set forth therein, to: NMFS, Southwest Fisheries Science Center (SWFSC) (1112); the National Fish and Wildlife Forensics Lab (NFWFL) (1123); California Department of Fish and Game, Sacramento, CA (CDFG) (1067); Rellim Redwood Co. (1069); Redwood National and State Parks, Orick, CA (RNSP) (1081); and Dr. Walter Duffy, California Cooperative Fishery Research Unit, Humboldt State University, Arcata, CA (CCFRU) (1093).

Notice is further given that NMFS issued an amendment to a permit to the U.S. Fish and Wildlife Service (FWS) (1027) and modifications to permits to: Natural Resources Management Corp., Eureka, CA (NRM) (1039); and NMFS, SWFSC (1044).

DATES: Written comments or requests for a public hearing on any of these applications must be received on or before May 18, 1998.

ADDRESSES: The applications and related documents are available for review in the following offices, by appointment:

For permits 1140, 1141, and 1143: Protected Resources Division, F/NWO3, NMFS, 525 NE Oregon Street, Suite 500,

Portland, OR 97232-4169 (503-230-5400).

For permits 1025, 1027, 1039, 1044, 1067, 1069, 1081, 1093, and 1112: Administrator, Southwest Region, NMFS, NOAA, 777 Sonoma Avenue Room 325, Santa Rosa, CA 95405 (707-575-6050).

For permit 1123: Office of Protected Resources, Endangered Species Division, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401).

All documents may also be reviewed by appointment in the Office of Protected Resources, F/PR3, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401).

FOR FURTHER INFORMATION CONTACT: For permits 1140, 1141, and 1143: Tom Lichatowich, Portland, OR (503-230-5438).

For permits 1025, 1027, 1039, 1044, 1067, 1069, 1081, 1093, and 1112: Thomas Hablett, Protected Resources Division, Santa Rosa, CA (707-575-6066).

For permit 1123: Terri Jordan, Endangered Species Division, Office of Protected Resources, Silver Spring, MD (301-713-1401).

SUPPLEMENTARY INFORMATION:

Authority

Permits are requested under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

Those individuals requesting a hearing on these requests for permits should set out the specific reasons why a hearing would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the above application summaries are those of the applicant and do not necessarily reflect the views of NMFS.

Issuance of these permits, modifications, and amendments, as required by the ESA, was based on a finding that such permits, modifications, and amendments: (1) Were applied for in good faith; (2) would not operate to the disadvantage of the listed species which are the subject of the permits; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA. These permits, modifications, and amendments were also issued in accordance with and are subject to parts 217-222 of Title 50 CFR, the NMFS

regulations governing listed species permits.

Species Covered in This Notice

chinook salmon (*Oncorhynchus tshawytscha*)
coho salmon (*Oncorhynchus kisutch*)
sockeye salmon (*Oncorhynchus nerka*)
steelhead trout (*Oncorhynchus mykiss*)

Applications Received

NWFSC (1140) requests a 5-year permit for a direct take of juvenile, endangered, Snake River fall chinook salmon and juvenile, threatened, southern Oregon/northern California (SONCC) coho salmon associated with a research study designed to assess the relationship between environmental variables, selected anthropogenic stresses, and bacterial and parasitic pathogens on disease-induced mortality of juvenile salmon in selected coastal estuaries in OR and WA. The results of this proposed study will benefit ESA-listed species by providing a better understanding of how environmental factors influence disease. NWFSC proposes to collect juvenile coho and chinook salmon with seines and fyke nets in the Elk and Columbia River estuaries. The fish would be lethally taken and analyzed for pathogen prevalence and intensity, chemical analyses, histopathology, and stomach contents. Incidental takes and incidental mortalities of juvenile, endangered, naturally-produced and artificially-propagated, upper Columbia River steelhead; juvenile, threatened, lower Columbia River steelhead; juvenile, threatened, Snake River steelhead; juvenile, endangered, Snake River sockeye salmon; and juvenile, threatened, naturally-produced and artificially-propagated, Snake River spring/summer chinook salmon are also requested.

PUDGC (1141) requests a five-year permit for an annual direct take of ESA-listed steelhead associated with enhancement and scientific research programs at Wanapum and Priest Rapids Dams located on the Columbia River. PUDGC proposes to use butterfly dip nets to remove smolts entrained within the wheelgate bulkhead gatewells, place them into a sanctuary box, and then transport them to a temporary holding tank until release. Smolts would be anesthetized, examined, measured, allowed to recover, and be released. Some would be examined for gas bubble trauma. Some ESA-listed steelhead smolts would be taken lethally as part of a hydro acoustics study. Some ESA-listed

juvenile fish indirect mortalities associated with the research/enhancement activities are also requested.

DNR (1143) requests a 1-year permit for takes of juvenile, endangered, naturally-produced and artificially-propagated, upper Columbia River steelhead; juvenile, threatened, lower Columbia River steelhead; and juvenile, threatened, Snake River steelhead associated with salmonid presence/absence surveys in proposed timber sale areas. The proposed stream surveys will determine the correct stream classification and place the stream in the correct Riparian Management Zones (RMZ). The correct RMZ designation will protect listed fish by requiring proper riparian buffers be left along streams. ESA-listed juvenile fish would be captured using electrofishing, netted, quickly identified without being removed from the water, and immediately released to calm water to recover. An indirect mortality of ESA-listed juvenile fish associated with the research is also requested.

To date, protective regulations for threatened Snake River steelhead and threatened lower Columbia River steelhead under section 4(d) of the ESA have not been promulgated by NMFS. This notice of receipt of applications requesting takes of these species is issued as a precaution in the event that NMFS issues protective regulations that prohibit takes of threatened Snake River steelhead and threatened lower Columbia River steelhead. The initiation of a 30-day public comment period on these applications, including their proposed takes of threatened Snake River steelhead and threatened lower Columbia steelhead, does not presuppose the contents of the eventual protective regulations.

Permits, Amendment, and Modifications Issued

Notice was published on December 31, 1997 (62 FR 68260) that an application had been filed by CDFG (P622) for a second modification to a scientific research permit. Modification 2 to permit 1025 was issued to CDFG on March 12, 1998. Permit 1025 authorizes CDFG takes of adult and juvenile, endangered, Sacramento River winter-run chinook salmon associated with two scientific research studies. The modification provides for take of an additional 2,000 juvenile winter-run chinook and an increase in the associated, indirect mortalities of 100 fish for Study 1 at Knights Landing on the Sacramento River for the 1997/1998 season only. The purpose of the monitoring program is to evaluate the

utility of the site and various sampling protocols in determining the timing and abundance of juvenile anadromous salmonids emigrating to the Sacramento-San Joaquin Delta. Permit 1025 expires on June 30, 2001.

An amendment to the FWS enhancement permit 1027 was issued on March 13, 1998. Permit 1027 authorizes FWS takes of adult and juvenile, endangered, Sacramento River winter-run chinook salmon associated with artificial propagation and captive broodstock programs. FWS has developed a genetic testing protocol to identify the origin of returning adults so as to prevent hybridization problems. FWS has also developed a rearing facility on the mainstem Sacramento River to avoid imprinting problems. NMFS has reviewed and approved both the genetics testing protocol and the rearing facility, and thereby, authorizes collection of ESA-listed adult winter-run chinook for broodstock. Permit 1027 expires on July 31, 2001.

Notice was published on November 17, 1997 (62 FR 61295) that an application had been filed by NRMCC for a modification to a scientific research permit. Modification 1 to permit 1039 was issued to NRMCC on March 26, 1998. Permit 1039 authorizes takes of adult and juvenile, threatened, central California coast (CCC) coho salmon associated with fish population and habitat studies throughout the ESU. ESA-listed fish may be observed or captured, anesthetized, handled, and released. Indirect mortalities are also authorized. The modification authorizes takes of juvenile, threatened, SONCC coho salmon associated with fish population and habitat studies throughout the California portion of the ESU. ESA-listed juvenile fish are proposed to be observed and counted. Modification 1 is valid for the duration of the permit which expires on June 30, 2002.

Notice was published on November 28, 1997 (62 FR 63317) that an application had been filed by SWFSC for a modification to a scientific research permit. Modification 1 to permit 1044 was issued to SWFSC on April 1, 1998. Permit 1044 authorizes takes of adult and juvenile, threatened, CCC coho salmon associated with fish population and habitat studies throughout the ESU. ESA-listed fish will be observed or captured, anesthetized, handled, allowed to recover from the anesthetic, and released. Indirect mortalities are also authorized. The modification authorizes takes of adult and juvenile, threatened, SONCC coho salmon associated with fish population

and habitat studies throughout the ESU. ESA-listed fish will be observed or captured, anesthetized, handled, allowed to recover from the anesthetic, and released. Indirect mortalities are also requested. Modification 1 is valid for the duration of the permit which expires on June 30, 2002.

Notice was published on September 24, 1997 (62 FR 49960) that an application had been filed by CDFG for a scientific research permit. Permit 1067 was issued to CDFG on March 25, 1998. Permit 1067 authorizes CDFG takes of adult and juvenile, threatened, CCC coho salmon associated with fishery studies in drainages throughout the ESU. ESA-listed juvenile fish are authorized to be observed or captured, handled, and released. ESA-listed juvenile fish indirect mortalities are also authorized. CDFG is authorized takes of juvenile, threatened, SONCC coho salmon using electroshocker methods associated with fishery studies in California drainages throughout the ESU. ESA-listed juvenile fish are authorized to be captured by electrofishing, handled, and released. ESA-listed juvenile fish indirect mortalities associated with the research are also authorized. Permit 1067 expires on June 30, 2002.

Notice was published on December 17, 1997 (62 FR 66053) that an application had been filed by RRC for a scientific research permit. Permit 1069 was issued to RRC on March 26, 1998. Permit 1069 authorizes RRC takes of adult and juvenile, threatened, SONCC coho salmon in California, associated with fish population and habitat studies on RRC properties within the ESU. ESA-listed juvenile fish will be captured, handled, and then be released. ESA-listed salmon indirect mortalities associated with the research are also authorized. Permit 1069 expires on June 30, 2003.

Notice was published on November 28, 1997 (62 FR 63317) that an application had been filed by NPS for a scientific research permit. Permit 1081 was issued to NPS on April 6, 1998. Permit 1081 authorizes NPS takes of adult and juvenile, threatened, SONCC coho salmon associated with fish population studies in NPS regulated drainages within the ESU in California. ESA-listed juveniles are observed or captured, handled, and released. ESA-listed salmon indirect mortalities associated with the research are also authorized. Permit 1081 expires on June 30, 2003.

Notice was published on November 28, 1997 (62 FR 63317) that an application had been filed by HFRU for a scientific research permit. Permit 1093

was issued to HFRU on April 1, 1998. Permit 1093 authorizes HFRU takes of adult and juvenile, threatened, SONCC coho salmon associated with defined fish population studies throughout the ESU in California. ESA-listed fish will be observed or captured, handled, and released. Indirect mortalities are also authorized. Permit 1093 expires on June 30, 2003.

Notice was published on December 31, 1997 (62 FR 68260) that an application had been filed by SWFSC for a scientific research permit. Permit 1112 was issued to SWFSC on March 20, 1998. Permit 1112 authorizes SWFSC to take juvenile, endangered, Sacramento River winter-run chinook salmon associated with a study to determine the interannual variability of growth, development, health, and ecology of juvenile salmonids within the San Francisco Estuary and the Gulf of the Farallones. Permit 1112 expires on June 30, 2003.

Notice was published on February 19, 1998 (63 FR 8435), that an application had been filed by NFWFL, to possess tissues (fin clips, barbels, blood, muscle, skin) of all listed, non-marine mammal, non-reptilian species under NMFS jurisdiction for purposes of conducting research. NFWFL would provide technical support to FWS and NMFS on enforcement issues pertaining to protected and endangered species. Samples would be archived for future use by Federal, state or local law enforcement agents. Permit 1123 was issued on March 26, 1998, and expires on December 31, 2003.

Dated: April 9, 1998.

Patricia A. Montanio,
Deputy Director, Office of Protected Resources, National Marine Fisheries Service.
