ENVIRONMENTAL PROTECTION AGENCY

[FRL-5947-3]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; National Health Protection Survey of Beaches

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C.

3501 *et seq.*), this notice announces that the following Information Collection Request (ICR) has been for-warded to the Office of Management and Budget (OMB) for review and approval: National Health Protection Survey of Beaches. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before February 4, 1998.

FOR FURTHER INFORMATION OR A COPY: Contact Sandy Farmer at EPA by phone at (202) 260-2740, by email at farmer.sandy@epamail.epa.gov, or download off the Internet at <http://www.epa.gov/icr/icr.htm> and refer to EPA ICR No. 1814.01.

SUPPLEMENTARY INFORMATION:

Title: National Health Protection Survey of Beaches (EPA ICR No. 1814.01). This is a new collection.

Abstract: Bacterial and other microbiological contaminants continue to pose potentially serious human health problems for the Nation's recreational waters, including bathing beaches. These adverse effects have been one of EPA's long-standing concerns. They are directly related to such Clean Water Act responsibilities as water quality standards and surface water quality, and to the Agency's efforts to ensure that the waters of the United States are "fishable" and "swimmable." In 1986, EPA formally issued a revision to its bacteriological ambient water quality criteria recommendations to protect persons participating in body contact recreation. Since that time, few states have adopted the revised criteria and the use of the criteria has varied greatly from one location to the next. In addition, recent studies have confirmed the adverse health effects resulting from bathing in contaminated waters. Therefore, water quality in bathing beach areas is a critical concern to EPA.

EPA believes there is a need to improve the overall quality and availability of public information about health protection activities at beaches, which include, but are not limited to, water quality standards, monitoring and assessment activities, and beach closures. Many organizations share responsibility for these activities. Consequently, EPA's Office of Water will conduct an annual "beach" survey. The survey will be sent to environmental health officials from State, tribal, county, and city agencies, as well as representatives from various interest groups. It will obtain and verify

information on the location and condition of swimming beaches and the agencies and persons responsible for maintaining and issuing advisories or closings for those beaches at freshwater sites (the Great Lakes and others) and saltwater (estuarine and coastal) sites around the Nation. Responses to the questionnaire (either on paper or electronically via the Internet) are required to determine compliance with water quality standards, to assess public health risks, and to determine what steps EPA should take next, if any. Completion of the questionnaire and map marking will be voluntary.

EPA will assemble the information (maps and questionnaire responses) into electronic database and graphic formats that can be readily analyzed and shared with responsible parties (e.g., EPA program and regional offices, other federal, state, tribal, county, and city agencies), as well as the public. The nationwide collection of information is being phased in, beginning with a pilot survey of Great Lakes and other selected beaches in 1998. When the survey is fully implemented, it is estimated that 2,000 respondents will be involved each year. The estimated annual cost for the survey per respondent is anticipated to decrease each year, since respondents will only be requested to provide information that has changed during the year.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** Notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 5/5/97 (**Federal Register** vol. 62, no. 86, pp. 24442-24443); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2.33 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able

to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: County or other entity public health and environmental protection agencies.

Estimated Number of Respondents: 2000.

Frequency of Response: One time per year.

Estimated Total Annual Hour Burden: 4160 hours.

Estimated Total Annualized Cost Burden: \$160,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1814.01 in any correspondence.
