Tackle Hill Limited Liability Company is leasing a small portion of the Site, an access road. The proposed PLA would require Tackle Hill Limited Liability Company to pay the United States \$7,000 to be applied toward response costs incurred by the United States in conducting groundwater monitoring activities at the Site after the removal action is completed by the PRPs. The Site is not on the National Priorities List, and, after the groundwater monitoring, no further response activities at the Site are anticipated at this time.

Needs and Uses: The notification burden on PSAPs will be used by carriers to verify that wireless 911 calls are referred to PSAPs who have the technical capability to use the data to the caller's benefit. TTY and dispatch notification requirements will be used to avoid consumer confusion as to the ability to reach 911 services using their wireless handsets. These notifications will also avoid delays in emergency response time. The quarterly reports will be used to monitor the progress of TTY compatibility. Consultations on the specific meaning assigned to pseudo-ANI are appropriate to ensure that all parties are working with the same information. Coordination between carriers and State and local entities to determine the PSAPs that are appropriate to receive 911 calls is necessary because of the difficulty in assigning PSAPs based on the location of the caller. The deployment schedule that should be submitted by carriers seeking a waiver of the Phase I or Phase II schedule will be used by the Commission to guarantee that the rules adopted in this proceeding are enforced in as timely a manner as possible within technological constraints.
