14 CFR Part 71

[Airspace Docket No. 98-AGL-73]

Modification of Class E Airspace; Port Clinton, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class E airspace at Port Clinton, OH. A Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP), 007° helicopter point in space approach, has been developed for Magruder Memorial Hospital Heliport. Controlled airspace extending upward from 700 to 1200 feet above grand level (AGL) is needed to contain aircraft executing the approach. This action modifies existing controlled airspace for Port Clinton, OH, in order to include the point in space approach serving Magruder Memorial Hospital Heliport.

EFFECTIVE DATE: 0901 UTC, May 20, 1999.

FOR FURTHER INFORMATION CONTACT: Michelle M. Behm, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (847) 294-7568.

SUPPLEMENTARY INFORMATION:

History

On Monday, January 11, 1999, the FAA proposed to amend 14 CFR part 71 to modify Class E airspace at Port Clinton, OH (64 FR 1560). The proposal was to add controlled airspace extending upward from 700 to 1200 feet AGL to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for airspace area extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9F dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 modifies Class E airspace at Port Clinton, OH, to accommodate aircraft executing the proposed GPS SIAP 007° helicopter point in space approach for Magruder Memorial Hospital Heliport. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing this approach. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:
