The Proposal

The FAA is considering an amendment to 14 CFR part 71 to modify Class E airspace at Toledo, OH, to accommodate aircraft executing the proposed GPS SIAP 291° helicopter point in space approach for Fulton County Health Center Heliport, a GPS SIAP 136° helicopter point in space approach for Medical College of Ohio Hospital Heliport, a GPS SIAP 168° helicopter point in space approach for Wood County Hospital Heliport, a GPS SIAP 276° helicopter point in space approach for St. Vincent Hospital Heliport, and a GPS SIAP 306° helicopter point in space approach for Toledo Hospital Heliport by modifying existing controlled airspace. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing these approaches. The area would be depicted on appropriate aeronautical charts. Class E airspace extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9F dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore this, proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
