

The proposed action will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released off site, and there is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential non-radiological impacts, the proposed action does not involve any historic sites. It does not affect non-radiological plant effluents and has no other environmental impact. Therefore, there are no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the Commission concludes that there are no significant environmental impacts associated with the proposed action.

#### *Alternative to the Proposed Action*

As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

#### *Alternative Use of Resources*

This action does not involve the use of any resources not evaluated in previous environmental reviews for the YNPS.

#### *Agencies and Persons Consulted*

In accordance with its stated policy, on December 15, 1998, the staff consulted with the Commonwealth of Massachusetts State liaison officer, Jim Muckerheide of the Massachusetts Civil Defense Agency, regarding the environmental impact of the proposed action. The Commonwealth official had no comments.

#### **Finding of No Significant Impact**

On the basis of the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the YAEC's letter of August 20, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, D.C., and at the Local Public Document Room located in the Library of the Greenfield Community

### **Draft Standard Review Plan; Review of a Reclamation Plan for Mill Tailings Sites Under Title II of the Uranium Mill Tailings Radiation Control Act; Draft Standard Review Plan**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of availability; Opportunity for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is soliciting comments on a Draft Standard Review Plan for Review of a Reclamation Plan for Mill Tailings Sites Under Title II of the Uranium Mill Tailings Radiation Control Act (NUREG-1620) from interested parties. An NRC source and byproduct material license is required

under the provisions of Title 10 of the Code of Federal Regulations, Part 40 (10 CFR Part 40), Domestic Licensing of Source Material, in conjunction with uranium or thorium milling, or with byproduct material at sites formerly associated with such milling. An applicant for a new reclamation plan, or for the renewal or amendment of an existing license, is required to provide detailed information on the facilities, and procedures to be used, and if appropriate, an environmental report that discusses the effect of proposed operations on public health and safety and on the environment. This information is used by Nuclear Regulatory Commission staff to determine whether the proposed activities will be protective of public health and safety and be environmentally acceptable. The purpose of this standard review plan is to provide NRC staff with specific guidance on the review of this information and will be used to ensure a consistent quality and uniformity of staff reviews. Each section in the review plan provides guidance on what is to be reviewed, the basis for the review, how the staff review is to be accomplished, what the staff will find acceptable in a demonstration of compliance with the regulations, and the conclusions that are sought regarding the applicable sections in 10 CFR Chapter I. The review plan is also intended to improve the understanding of the staff review process by interested members of the public and the uranium recovery industry. The draft was developed using input from staff review precedents; staff inspection experiences; and public meetings with the industry.

Review plan for Surface Water Hydrology and Erosion Protection for Long-Term Stabilization, as presented in NUREG-1620, references NUREG-1623, "Design of Erosion Protection for Long-Term Stabilization," for details on the design methodology acceptable to the NRC staff. The draft of NUREG-1623 will be available for public comments in approximately 2 weeks.

**Opportunity to Comment:** Interested parties are invited to comment on the review plan. These areas include radon attenuation and long-term stability of the reclaimed site, soil cleanup, and groundwater restoration reviews. A final review plan will be prepared after the NRC staff has evaluated public comments received on the draft review plan.

**DATES:** Written comments must be received prior to May 4, 1999.

**ADDRESSES:** Comments on the draft review plan should be sent to the Chief,

Rules and Directives Branch, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. A copy of the Draft Standard Review Plan (NUREG-1620) may be obtained by writing to the Printing and Graphics Branch, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001.
