k. *Description of Amendment:* Goat Lake Hydro, Inc., filed as-built exhibits A, F, and G to show the constructed configuration of the Goat Lake Project. Along with the exhibits, the licensee applied to amend its license to allow Goat Lake to be drawn down 10 feet lower than currently authorized. The amendment would allow Goat Lake to fluctuate between elevations 2925 and 2885 feet, a difference of 40 feet. The license currently authorize Goat Lake to operate between elevations 2925 and 2895 feet, a difference of 30 feet. (The exhibit A in the application for license actually said the project would be operated between elevations 2915 and 2885 feet. However, a new survey in 1996 indicated these elevations were off by 10 feet. Under the 1996 survey, the licensed reservoir operating range is between elevations 2925 and 2895 feet.)

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Approved by Office of Management and Budget

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collection pursuant to the Paperwork Reduction Act of 1995, Pub. L. 96-511. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. Notwithstanding any other provisions of law, no person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Questions concerning the OMB control numbers and expiration dates should be directed to Judy Boley, Federal Communications Commission, (202) 418-0214.

OMB Approval Number: 3060-0221.

Expiration Date: 12/31/2001.

Title: 90.155 Time in which station must be placed in operation.

Form No.: N/A.

Estimated Annual Burden: 2,055 annual hours; 1 hour per response; 2,055 responses.

Description: The information collection requirement contained in Section 90.155 is needed to provide flexibility to state and local governments that would normally be unable to meet the requirement of placing their radio station in operation within 8 months. The information is used to evaluate if the exception to the

8 month requirement is warranted. If the information was not collected the Commission's information regarding actual loading of frequencies would be inaccurate. As a result of comments to the Notice of Proposed Rule Making, the Report & Order revised this burden to approximately 2,055 respondents that would take an average of 1 hour to comply with the rules.

OMB Approval Number: 3060-0805.

Expiration Date: 12/31/2001.

Title: 90.527 Regional plan requirements & 90.523 Eligibility.

Form No.: N/A.

Estimated Annual Burden: 647,675 annual hours; 23.8 hours per response; 26,656 responses.

Description: The First Report and Order, FCC 98-191, in WT Docket No. 96-86 amended service rules to make the spectrum available for licensing to public safety entities. In order to satisfy local and regional needs and preferences, the Commission required submission of regional plans drafted by planning committees made up of representatives from the public safety community. Creation of these plans will necessarily impose some burden, both on the eligible entities that make their needs known, and on the planners who seek to accommodate them. The Commission also established a National Coordination Committee that will develop national standards for the operation and use of the spectrum allocated for nationwide interoperability.

OMB Approval Number: 3060-0262.

Title: 90.179 Shared use of radio stations.

Expiration Date: 12/31/2001.

Form No.: N/A.

Estimated Annual Burden: 30,750 annual hours; .75 hours per response; 41,000 responses.

Description: The Third Notice of Proposed Rule Making in, FCC 98-191, in WT Docket No. 96-86 invites comments on how to license 8.8 megahertz of spectrum in the 700 MHz band that is allocated for public safety services. For example, comment is sought on whether to license 700 MHz band spectrum directly to each individual state. The Commission also invites comments on whether to revise Section 90.179 to allow state licensees to authorize approximately 39,000 additional public safety agencies within the state and its political subdivisions to use the spectrum. We assume that the respondents would spend .75 hours to keep a written sharing agreement as part of the station records.
