### Employment and Training Administration

[TA-W-34,460 and TA-W-34,460D]

#### Westark Garment Manufacturing; Waldron and Ratcliff, AR; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on May 18, 1998 applicable to all workers of Westark Garment Manufacturing, Waldron, Arkansas. The notice was published in the **Federal Register** on June 22, 1998 (63 FR 33958).

At the request of the petitioners, the Department reviewed the certification for workers of the subject firm. New information from the company shows that worker separations occurred at Westark Garment Manufacturing's Ratcliff, Arkansas production facility when it closed in July, 1998. The workers are engaged in employment related to the production of jackets used for decoration and recognition.

Accordingly, the Department is amending the certification to cover workers at Westark Garment Manufacturing, Ratcliff, Arkansas.

The intent of the Department's certification is to include all workers of Westark Garment Manufacturing adversely affected by increased imports.

The amended notice applicable to TA-W-34,460 is hereby issued as follows:

All workers of Westark Garment Manufacturing, Waldron, Arkansas (TA-W-34,460), and Ratcliff, Arkansas (TA-W-

34,460D) who became totally or partially separated from employment on or after March 25, 1997 through May 18, 2000 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 5th day of February, 1999.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-271]

### Vermont Yankee Nuclear Power Corporation, Vermont Yankee Nuclear Power Station; Issuance of Director's Decision Under 10 CFR 2.206

Notice is hereby given that the  
Director, Office of Nuclear Reactor  
Regulation, has acted on a Petition for  
action under 10 CFR 2.206 received  
from Michael J. Daley on April 9, 1998,  
concerning the Vermont Yankee Nuclear  
Power Station (VYNPS).

The Petition requests that the U.S.  
Nuclear Regulatory Commission (NRC)  
issue an order requiring that the  
licensee's administrative limits, which  
were in effect at the time and precluded  
VYNPS from operating with a torus  
water temperature above 80 °F or with  
a service water injection temperature  
greater than 50 °F, shall remain in force  
until certain conditions are met. The  
conditions listed include a complete  
reconstitution of the licensing basis for  
the maximum torus water temperature,  
submittal to the NRC of a technical  
specifications (TSs) amendment request  
establishing the correct maximum torus  
water temperature, and completion of  
NRC's review of the amendment  
request.

As a basis for the request, the  
Petitioner raised concerns about the  
licensee being unable to demonstrate an  
ability to either justify the operational  
limits for the maximum torus water  
temperature or to maintain operations  
within existing administrative limits  
(torus water temperature is critical to  
the proper functioning of the  
containment). The Petitioner asserted  
that since 1994, events have caused the  
licensee to question VYNPS's maximum  
torus water temperature limits four  
times, leading to the self-imposed  
administrative limits previously noted.  
The Petitioner stated that the NRC must  
move from a "wait and see" posture to  
active intervention, with immediate  
imposition of the order recommended  
by the Petitioner as a first step.

On May 13, 1998, the Director of the  
Office of Nuclear Reactor Regulation  
concluded that issuing an immediate  
order imposing the licensee's  
administrative limits which were in  
effect at the time was unnecessary. This  
aspect of the Petition was denied since  
the licensee took appropriate actions to  
determine the proper limit on torus  
water temperature, sought a TS  
amendment to impose the correct torus  
water temperature, and administratively  
implemented the limit while the NRC  
reviewed the analysis in support of the

TS amendment. The additional  
conditions associated with the request  
have been completed including  
establishing the correct licensing basis  
for the maximum torus temperature,  
submittal of a TS amendment request  
establishing the correct maximum torus  
water temperature limit, and completion  
of the NRC review of the amendment  
request. The NRC has concluded that  
the appropriate limit for maximum torus  
temperature is 90 °F, making the limits  
requested in the Petition unnecessary.  
Accordingly, the staff has addressed the  
issues raised by the Petitioner and has  
completed its actions relating to the  
Petition. Additional information is  
included in the "Director's Decision  
Pursuant to 10 CFR 2.206" (DD-99-04),  
the complete text of which follows this  
notice and which is available for public  
inspection at the Commission's Public  
Document Room, the Gelman Building,  
2120 L Street, NW., Washington, DC  
20555-0001, and at the Local Public  
Document Room located at the Brooks  
Memorial Library, 224 Main Street,  
Brattleboro, VT 05301.

As provided in 10 CFR 2.206(c), a  
copy of this Decision will be filed with  
the Secretary of the Commission for the  
Commission's review. This Decision  
will constitute the final action of the  
Commission 25 days after issuance  
unless the Commission, on its own  
motion, institutes review of the Decision  
within that time.

Dated at Rockville, Maryland, this 10th day  
of February 1999.

For the Nuclear Regulatory Commission.

Regulation.*
