

will make all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

SUPPLEMENTARY INFORMATION: It is the policy of the Fish and Wildlife Service to manage all lands within the National Wildlife Refuge System in accordance with an approved comprehensive conservation plan. These plans outline a vision for each refuge; guide management decisions; and outline goals, objectives and strategies to achieve the visions and purposes of each refuge unit. The plans will provide other agencies and the public with an understanding of the management strategies to be implemented.

The Service has initiated planning for Pelican Island National Wildlife Refuge for the conservation and enhancement of its natural resources. Encompassing approximately 5,000 acres and including designations as a National Historic Landmark, a National Wilderness Area, and a Wetland of International Importance, this refuge is located between the Indian River and the Atlantic Ocean in southeastern Florida, near the city of Sebastian.

Planning for Archie Carr National Wildlife Refuge has been initiated for the conservation and enhancement of its natural resources as well. This refuge is located along the Atlantic Ocean in southeastern Florida, between the cities of Melbourne Beach and Vero Beach. While the Service owns or leases approximately 165 acres, the State of Florida, Brevard County, and Indian River County account for the remainder of the publicly owned lands within the refuge. The refuge beaches support loggerhead and green turtle nesting. The Florida scrub jay, eastern indigo snake, southeastern beach mouse, and other threatened and endangered species also occur within the refuge.

The Service is especially interested in receiving public input during this planning process. Examples of questions to be answered are as follows:

What do you value most about these refuges?

What problems or issues do you see affecting management or public use of these refuges?

What improvements do you recommend for these refuges?

What changes, if any, would you like to see in the management of these refuges?

The Service has provided these questions for optional use and has no requirement that information be provided.

Review of these projects will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), National Environmental Policy Act Regulations (40 C.F.R. 1500–1508), other appropriate Federal laws and regulations, including the National Wildlife Refuge System Improvement Act of 1997, Executive Order 12996, and Service policies and procedures for compliance with those regulations.
