The Make Your Mark on the Floodplain handout and accompanying High Water Mark Form is used to establish uniform and consistent methodologies for setting and recovering high water marks following a significant flood event. After a major flood, anyone who has high water marks on their property or who has observed flood marks on public property can use the form to record high water mark information, including location, measurements, and description of the marks read. The data will be used by FEMA in post-flood damage assessments. The data will define a frequency/damage relationship for the flooding event and provide calibration information for future analysis. The U.S. Army Corps of Engineers will assist FEMA in collecting and compiling high water mark data.
