

Target Authorization Body

The Bathymetric Subcommittee originally proposed the development of this Hydrographic Standard as an FGDC standard. The Bathymetric Subcommittee and the Standards Working Group of the FGDC will pursue a joint FGDC and American National Standards Institute (ANSI) adoption of this standard. This joint approach will require the development of an ANSI standard proposal and potentially a joint ANSI and FGDC public review. The Bathymetric Subcommittee will consider (at a later date) promoting parts of this standard (e.g., inland waterways information) that are not currently part of the S-57 standard to International Hydrographic Organization for inclusion in their standard.

Conclusion

This Hydrographic Data Content Standard for Coastal and Inland Waterways will facilitate semantic consistency when capturing geospatial hydrographic information in a GIS or CADD database. This standard will support the exchange of spatial data between different GIS/CADD software packages. The standard will also facilitate effective exchange of geospatial data across multiple agencies, organizations and other users. This standard will provide for consistency of semantics contained in spatial hydrographic data that enable the development of consistent military and commercial navigation applications for that query, analyze this information and interpreted this information for display of electronic charts. Cost savings associated with reducing the translating geospatial hydrographic information and building navigation applications should also be realized.

Maintenance

The U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA), National Ocean Service (NOS), NOAA Coastal Services Center will maintain the National Hydrographic Data Content Standard for Coastal and Inland Waterways for the Federal Geographic Data Committee. Address general questions concerning the content of this standard to David Stein, Secretary, FGDC Bathymetric Subcommittee at NOAA Coastal Services Center; 2234 South Hobson Avenue, Charleston, SC 29405-2413 or by E-mail: Dave.Stein@noaa.gov.

Dated: May 8, 2000.

Notice of Redesignation of Public Domain (PD) land to Oregon & California Railroad (O&C) and Coos Bay Wagon Road (CBWR) Status in Lane, Douglas, Coos, and Curry Counties; OR

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This action informs the public of the transfer of PD lands into trust for the Coquille Tribe and designated as the Coquille Forest.

FOR FURTHER INFORMATION CONTACT:

Gregg Nelson, BLM Coos Bay District, 1300 Airport Land, North Bend, Oregon 97459, 541-751-4473.

SUPPLEMENTARY INFORMATION: Title V, Sec. 501(a) of the Oregon Resource Conservation Act of 1996, contained in Division B of the Omnibus Consolidated Appropriation Act of 1997, Public Law 104-208, mandated the Bureau of Land Management (BLM) to transfer into trust certain federal lands in perpetuity for the Coquille Tribe. The legislation directed that the transferred land be designated as the Coquille Forest. That land transfer was completed on September 30, 1998. The legislation also required redesignation of sufficient land to revested O&C and reconveyed CBWR grant land status to maintain the current (pre-transfer) flow of revenue to the O&C counties. Other than the proposed change in status, redesignated lands will continue to be managed in accordance with the current Coos Bay District Resource Management Plan completed in May, 1995.

The following PD lands in Lane, Douglas, and Curry Counties, Oregon have been examined and found suitable for redesignation and conversion to O&C status for management under the provisions of the O&C Act of August 28, 1937 (50 Stat. 874):
