Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 00-ASO-24]

Proposed Establishment of Class D Airspace; Oak Grove, NC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Class D airspace at Oak Grove, NC. The United States Marine Corps operates a part time control tower at the Marine Corps Outlying Landing Facility (MCOFLF) Airport. Class D surface area airspace is required when the control tower is open to accommodate instrument approaches and for Instrument Flight Rules (IFR) operations at the airport. Therefore, the United States Marine Corps has requested the establishment of Class D airspace at this airport. This action would establish Class D airspace extending upward from the surface to and including 1,500 feet MSL within a 4-mile radius of the MCOFLF Airport.

DATES: Comments must be received on or before June 24, 2000.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Docket No. 00-ASO-24, Manager, Airspace Branch, ASO-520, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel for Southern Region, Room 550, 1701 Columbia Avenue, College Park, Georgia 30337, telephone (404) 305-5627.

Box 20636, Atlanta, Georgia 30320. Communications must identify the docket number of this NPRM. The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish Class D airspace at Oak Grove, NC. Class D surface area airspace is required when the control tower is open to accommodate instrument approaches and for IFR operations at the airport. Class D airspace designations for airspace areas extending upward from the surface are published in Paragraph 5000 of FAA Order 7400.9G, dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
