

Summary of Collection: The Transportation and Marketing (T&M) Program, Agricultural Marketing Service (AMS) conducts research to find better designs, development techniques, and operating methods for modern farmers' markets under the Agency's Wholesale and Alternative Markets Program. Recommendations are made available to local decision-makers interested in constructing modern farmers' markets to serve area producers and consumers. Individual studies are conducted in close cooperation with local interested parties. The information will be collected using form TM-6 "Farmers' Market Questionnaire."

Need and Use of the Information: Conventional wisdom states that the number and size of farmers' markets has grown over the last several years. Research has not been done to prove that point. The form submitted for approval will serve as a survey instrument to obtain a clearer picture of existing farmers' market structure to provide a basis for the future design of modern direct marketing facilities and will provide a measure of growth over the last 4 years. T&M researchers will survey by mail, with telephone follow-up, the managers of farmers' markets identified in the 2000 National Farmers' Market Directory. In addition, provision will be made for e-mail reporting. These markets represent a varied range of sizes, geographical locations, types, ownership, and structure. These markets will provide a valid overview of farmers' markets in the United States. Information such as the size of markets, operating times and days, retail and wholesale sales, management structure, and rules and regulations governing the markets are all important questions that need to be answered in the design of a new market. The information developed by this survey will support better designs, development techniques, and operating methods for modern farmers' markets and outline improvements that can be applied to revitalize existing markets.

I. Abstract

This mandatory reporting requirement expires November 30, 2000, and is being renewed under authority of 50 CFR Part 622.4. The wreckfish fishery for the South Atlantic is managed under an Individual Transferable Quota System. Under this system fishermen are issued a share of the fishery and an individual annual quota. Shares are issued by certificate and may be bought and sold. Buying and selling of shares are not completed until the transfer is recorded by the National Marine Fisheries Service (NMFS). The information in this collection is necessary so the NMFS can record the sale and thereby monitor the fishery to provide for better conservation and management.

II. Method of Collection

When shares in the wreckfish fishery are sold, information concerning the sale is recorded on the back of the share certificate and sent to the NMFS. The transfer of ownership is recorded and new share certificates issued.
