SUPPLEMENTARY INFORMATION:

Title: Confidentiality Rules (OMB Control No. 2020-0003; EPA ICR No. 1665.03), expiring August 31, 2000. This is a request for extension of a currently approved collection.

Abstract: EPA administers a number of environmental protection statutes which require it to collect data from thousands of facilities. Businesses often claim the data they submit as confidential business information (CBI). EPA developed the regulations at 40 CFR part 2, subpart B to protect CBI, as well as the rights of the public under the Freedom of Information Act (FOIA). When EPA must determine whether information is entitled to confidential treatment, it provides the affected business with an opportunity to submit comments (a substantiation). EPA then considers the business's comments in determining whether the previously submitted information should be protected as CBI. This ICR relates to the collection of information that will assist EPA in making confidentiality determinations.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The Federal Register document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on April 12, 2000 (65 FR 19750); comments were received from one organization.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 4.8 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: 1330.

Estimated Number of Responses: 1101.

Frequency of Response: on occasion.

Estimated Total Annual Hour Burden: 6432 hours.

Estimated Total Annualized Capital and Operating & Maintenance Cost Burden: \$0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1665.03 and OMB Control No. 2020-0003 in any correspondence.

Inadequacy Status of the Portneuf Valley, Pocatello, ID; Submitted Particulate Matter (PM10) Air Quality Improvement Plan for Transportation Conformity Purposes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of inadequacy.

SUMMARY: In this document, EPA is notifying the public that we have found that the motor vehicle emissions budget for PM10 in the Portneuf Valley, Pocatello, Idaho submitted PM10 Air Quality Improvement Plan is inadequate for conformity purposes. On March 2, 1999, the D.C. Circuit Court ruled that submitted SIPs cannot be used for conformity determinations until EPA has affirmatively found them adequate. As a result of our finding, Portneuf Valley cannot use the motor vehicle emissions budget from the submitted PM-10 Air Quality Improvement Plan for future conformity determinations.

DATES: This finding is effective August 14, 2000.

FOR FURTHER INFORMATION CONTACT: The finding and the response to comments will be available at EPA's conformity website: <http://www.epa.gov/oms/traq>, (once there, click on the "Conformity" button, then look for "Adequacy Review of SIP Submissions for Conformity"). You may also contact Wayne Elson, U.S. EPA, Region 10 (OAQ-107), 1200 Sixth Ave, Seattle WA 98101; (206) 553-1463 or elson.wayne@epa.gov.

SUPPLEMENTARY INFORMATION:

Background

Today's document is simply an announcement of a finding that we have already made. EPA Region 10 sent a letter to Idaho Division of Environmental Quality on June 8, 2000 stating that the motor vehicle emissions budget in the Portneuf Valley submitted Particulate Matter (PM-10) Air Quality Improvement Plan is inadequate. This finding is based on the exceedences of the PM10 National Ambient Air Quality Standards recorded in December 1999, and the need to re-visit the planning effort for the Portneuf Valley PM10 nonattainment area. This finding will also be announced on EPA's conformity website: <http://www.epa.gov/oms/traq>, (once there, click on the "Conformity" button, then look for "Adequacy Review of SIP Submissions for Conformity").

Transportation conformity is required by section 176(c) of the Clean Air Act.

EPA's conformity rule requires that transportation plans, programs, and projects conform to state air quality implementation plans (SIPs) and establishes the criteria and procedures for determining whether or not they do. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national ambient air quality standards.

The criteria by which we determine whether a SIP's motor vehicle emission budgets are adequate for conformity purposes are outlined in 40 CFR 93.118(e)(4). Please note that an adequacy review is separate from EPA's completeness review.

We've described our process for determining the adequacy of submitted SIP budgets in guidance (May 14, 1999 memo titled "Conformity Guidance on Implementation of March 2, 1999 Conformity Court Decision"). We followed this guidance in making our adequacy determination.
