

SUMMARY: This action establishes Class E airspace at Garrison, ND. A Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) to Runway (Rwy) 13 and a GPS SIAP to Rwy 31 have been developed for Garrison Municipal Airport. Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approaches. This action creates controlled airspace for Garrison Municipal Airport.

EFFECTIVE DATE: 0901 UTC, April 20, 2000.

SUPPLEMENTARY INFORMATION:

History

On Wednesday, November 3, 1999, the FAA proposed to amend 14 CFR part 71 to establish Class E airspace at Garrison, ND (64 FR 59690). The proposal was to add controlled airspace extending upward from 700 to 1200 feet AGL to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the Earth are published in paragraph 6005 of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 establishes Class E airspace at Garrison, ND, to accommodate aircraft executing the proposed GPS Rwy 13 SIAP and the GPS Rwy 13 SIAP for Garrison Municipal Airport by creating controlled airspace. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1)

Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Modification of Class E Airspace; Steubenville, OH

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action modifies Class E airspace at Steubenville, OH. A Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP), 293° helicopter point in space approach, has been developed for Trinity West Hospital. Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. This action modifies the existing controlled airspace for Steubenville, OH, to the northeast in order to include the point in space approach serving Trinity West Hospital.
