The areas described aggregate 299,952.41 acres in Coconino County. All lands are Federally owned surface and subsurface unless otherwise noted.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the lands will be segregated from location and entry under the general lands laws, including the mining laws, but not the mineral leasing laws, subject to valid existing rights, unless the proposal is canceled or unless the withdrawal is finalized prior to the end of the segregation period.

Existing uses of the segregated lands may be continued in accordance with their terms except for the location or relocation of mining claims during the pendency of the 2-year segregative period, including but not limited to livestock grazing, legal ingress and egress to any valid mining claims and patented claims that may exist, rights-of-way, access to non-Federal lands and interests in lands, current recreational

uses, and commercial uses being conducted under special use permits.

Minerals Management Service

Minerals Management Service (MMS) Outer Continental Shelf (OCS), Gulf of Mexico (GOM) Region, Proposed Use of Floating Production, Storage and Offloading Systems on the Central and Western GOM OCS

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability of the Draft Environmental Impact Statement (EIS) and locations and dates of public hearings for the EIS on the proposed use

of floating production, storage and offloading (FPSO) systems in the central and western GOM OCS.

The MMS prepared a draft EIS on ship-shaped FPSO systems which will be used mostly in deepwater areas of the OCS in the Central and Western GOM. The MMS based the EIS analyses on estimates of the kinds and amounts of activity onshore and offshore that could result from the deployment and use of FPSO systems to produce oil and gas in areas of the Central and Western GOM where the present day oil pipeline system does not yet extend. The FPSO systems will produce the oil in the conventional fashion, but will store it on board rather than direct it into pipelines. The FPSO systems will be unloaded regularly by tankers which will transport the oil to Gulf Coast seaports. You may obtain single copies of the draft EIS from the MMS, Gulf of Mexico OCS Region, Attention: Public Information Office (MS-5034), 1201

Elmwood Park Boulevard, Room 114, New Orleans, Louisiana 70123–2394, or by calling 1–800–200–GULF.
