Application From the States of Utah and Arizona for the Prohibition of the Discharge of Vessel Sewage Into Lake Powell; Notice of Determination

This notice is to announce that discharging sewage, whether treated or not, from vessels into Lake Powell is now prohibited.

Lake Powell is a reservoir on the Colorado River and is impounded by the Glen Canyon Dam at Page, Arizona. Approximately 95 percent of Lake Powell is located in Utah and 5 percent is in Arizona. The States of Utah and Arizona have jointly petitioned the Regional Administrators from Regions 8 and 9 of the United States Environmental Protection Agency (EPA) to prohibit the discharge of sewage from all vessels into Lake Powell. Under section 312(f)(3) of the Clean Water Act, 33 U.S.C. 1322(f)(3), any state may make a prohibition of this type. However, no such prohibition is to apply until the EPA has determined that adequate facilities are reasonably available for the safe and sanitary removal and treatment of sewage from all vessels on the water to be covered by the prohibition.

On May 22, 2000, the EPA published a notice in the **Federal Register** describing the States' application. (See 65 FR 32093.) In the notice, the EPA announced that it proposed to make an affirmative determination that adequate facilities exist. The EPA also asked for comments on the States' application. The 45-day public comment period ended on July 6, 2000, and the EPA received no comments.

Today the EPA is finalizing its determination that adequate facilities are reasonably available for the safe and
