

According to the State's petition, there are a total of 18,840 vessels registered in Virginia where the principal area of usage is in one of the three counties surrounding Smith Mountain Lake. This assumes that (1) when boats are used in one of the three counties they are used on Smith Mountain Lake and that, (2) the boats may be stored anywhere in Virginia but are principally used on Smith Mountain Lake, so a good number of regular transient vessels are included in the figure. Most of the recreational vessel population is limited to the season from April to October. Transient boats from other states and Virginia registered boats that are principally used elsewhere, but may at times be brought to Smith Mountain Lake, are not included in this number. An assumption can be made that the majority of such boats would be trailerable. This is supported by Health Department marina inspection slip counts which indicate only 53 out of 2,417 slips or moorings at commercial marinas are designated as transient vessel slips. Low demand for transient slips probably indicates boats are trailered and ramp launched. Most of the trailerable boats would not be of a size expected to have a holding tank. All 18,840 vessels would not occupy the lake at the same time. The information suggests that as far as simultaneous occupancy of the lake this number is high, or more likely, it is very high for the smaller, easily trailered boats, and somewhat more accurate for the larger, site-committed boats. The vessel population based on length is 4,705 vessels less than 16 feet in length, 13,309 vessels between 16 feet and 26 feet in length, 749 vessels between 26 feet and 40 feet in length, and 77 vessels greater than 40 feet in length. Based on number and size of boats, and using various methods to estimate the number of holding tanks, it is estimated that six pumpouts and seven dump stations are needed for Smith Mountain Lake. As described above, there are currently 17 operational pumpout facilities and 27 operational dump stations in Smith Mountain Lake.

The EPA hereby makes a final affirmative determination that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for Smith Mountain Lake, Bedford, Franklin and Pittsylvania Counties, Virginia. This final determination will result in a Virginia State prohibition of any sewage discharges from vessels in Smith Mountain Lake.
