

following tariff sheets proposed to become effective November 1, 2000:

First Revised Sheet No. 14B
First Revised Sheet No. 14F
First Revised Sheet No. 14L

ANR is filing the attached tariff sheets to reflect a change in the negotiated rate contracts with Wisconsin Public Service Corporation (WPSC). WPSC is increasing its MDQ under its Marshfield contract 5500 by 68 dth/d, and making a corresponding decrease of 68 dth/d to its Joliet Hub contract 104403. Also, WPSC is adjusting its previous annual MDQ level associated with NNS contract 99515, to provide for a seasonal split in the MDQ. Therefore, on an annual basis, there is no change in level of NNS service. ANR requests that the Commission grant ANR any waivers of the Commission's regulations which are necessary in order to make these tariff sheets effective as of November 1, 2000, and to the extent necessary, moves pursuant to 18 CFR 154.7(a)(9) for the tariff sheets to go into effect on said date. Additionally, ANR requests all such further relief as is appropriate.

ANR states that a copy of this filing is being mailed to the affected shipper and to each of ANR's FERC Gas Tariff, Second Revised Volume No. 1 and Original Volume No. 2 customers, and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at <http://www.ferc.fed.us/online/rims.htm> (call 202-208-2222 for assistance). Comments and protests may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site at <http://www.ferc.fed.us/efi/doorbell.htm>.

Secretary.

PPDC was established as an advisory committee in accordance with the Federal Advisory Committee Act in 1995 for a two-year term; it was renewed in 1997 and again in 1999. The PPDC provides a continuing and transparent forum for a diverse group of stakeholders from across the country to provide advice and recommendations to EPA regarding a broad range of pesticide regulatory development and program implementation issues associated with evaluating and reducing risks from use of pesticides. Membership to the PPDC includes broad geographic representation from the following sectors: environmental/public interest and consumer groups; industry and trade associations; pesticide users; Federal and State/local governments; the general public; academia; and public health organizations.

The Inert Disclosure Stakeholder Workgroup was formed in December 1999 to advise the Pesticide Program Dialogue Committee regarding ways to make information on inert ingredients more available to the public while working within the mandates of the Federal Insecticide, Fungicide and Rodenticide Act and related CBI concerns.

SUPPLEMENTARY INFORMATION:

Background

DOE operates the WIPP near Carlsbad in southeastern New Mexico as a deep geologic repository for disposal of TRU radioactive waste. As defined by the WIPP Land Withdrawal Act (LWA) of 1992 (Public Law 102-579), as amended (Public Law 104-201), TRU waste consists of materials containing elements having atomic numbers greater than 92 (with half-lives greater than twenty years), in concentrations greater than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Much of the existing TRU waste consists of items contaminated during the production of nuclear weapons, such as rags, equipment, tools, and sludges.

On May 13, 1998, we announced our final compliance certification decision to the Secretary of Energy (published May 18, 1998, 63 FR 27354). This decision stated that the WIPP will comply with EPA's radioactive waste disposal regulations at 40 CFR part 191, subparts B and C.

The final WIPP certification decision includes conditions that: (1) prohibit shipment of TRU waste for disposal at WIPP from any site other than the Los Alamos National Laboratory (LANL) until EPA determines that the site has established and executed a quality assurance program, in accordance with §§ 194.22(a)(2)(i), 194.24(c)(3), and 194.24(c)(5) for waste characterization activities and assumptions (condition 2 of appendix A to 40 CFR part 194); and (2) prohibit shipment of TRU waste for disposal at WIPP from any site other than LANL until EPA has approved the procedures developed to comply with the waste characterization requirements
