Take notice that on April 5, 2001, the California Cogeneration Council (CCC) submitted for filing, on behalf of itself and its member companies, a Petition for an Enforcement Action pursuant to Section 210(h)(2)(B) of the Public Utility Regulatory Policies Act of 1978 (PURPA), 16 U.S.C. 824a-3(h)(2)(B) (2000), and Rule 207 of the Commission's Rules of Practice and Procedure, 18 CFR 385.207.

CCC alleges that Decision 01-03-067, issued by the California Public Utilities Commission (CPUC) on March 27, 2001 (Decision), violates PURPA Section 210, 16 U.S.C. 824a-3 which requires, inter alia, that rates for purchases from QFs shall not exceed incremental cost to the utility, nor shall those rates discriminate against qualifying cogenerators or small power producers. The CPUC decision changes the formula by which avoided cost rates are calculated. This change violates PURPA, CCC alleges, for three reasons: (i) QFs will receive less than their full avoided, or incremental, costs for power produced; (ii) the Decision results in discrimination against QFs as compared to wholesalers and investor-owned utilities, particularly Pacific Gas & Electric Co. and (iii) the Decision discourages cogeneration and is not in the public interest. CCC asks this Commission to institute an enforcement action and take prompt action to grant relief to the QFs from the Decision.

The Commission previously certified the facility as a qualifying cogeneration facility in Docket No. QF90-176-001. Recertification is sought to reflect a change in the upstream ownership interests in the facility.

The facility is an approximately 46.6 MW (net) topping-cycle cogeneration facility located in Vineland, New Jersey. The facility is interconnected with and supplies electric power to the Vineland Municipal Electric Utility.

*Comment date:* May 14, 2001, in accordance with Standard Paragraph E at the end of this notice.
