

# Proposed Rules

Federal Register

Vol. 66, No. 85

Wednesday, May 2, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### 7 CFR Part 29

[Docket No. TB-00-23]

#### Tobacco Inspection—Growers Referendum

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Notice of referendum.

**SUMMARY:** This document announces that a referendum will be conducted by mail during the period of June 4–8, 2001, for producers of flue-cured tobacco who sell their tobacco at auction in Fairmont-Fair Bluff, North Carolina, and Loris, South Carolina, to determine producer approval of the designation of the Fairmont-Fair Bluff and Loris tobacco markets as one consolidated auction market.

**DATES:** The referendum will be held June 4–8, 2001.

**FOR FURTHER INFORMATION CONTACT:** William Coats, Associate Deputy Administrator, Tobacco Programs, Agricultural Marketing Service, United States Department of Agriculture, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 205–0508.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given of a mail referendum on the designation of a consolidated auction market at Fairmont-Fair Bluff, North Carolina, and Loris, South Carolina. Fairmont-Fair Bluff, North Carolina, was designated on April 6, 1995, (7 CFR 29.8001) as a flue-cured tobacco auction market and Loris, South Carolina, was designated on August 16, 1941, under the Tobacco Inspection Act (7 U.S.C. 511 *et seq.*). Under this Act those markets have been receiving mandatory grading services from USDA.

On September 6, 2000, an application was made to the Secretary of Agriculture to consolidate the designated markets of Fairmont-Fair Bluff, North Carolina, and Loris, South Carolina. The application, filed by sales

supervisors on those markets, was made pursuant to the regulations promulgated under the Tobacco Inspection Act (7 CFR part 29.1–29.3). On November 9, 2000, a public hearing was held in Tabor City, North Carolina, pursuant to the regulations. A Review Committee, established pursuant to 7 CFR 29.3(h)), has reviewed and considered the application, the testimony presented at the hearing, the exhibits received in evidence, and other available information. The Committee recommended to the Secretary that the application be granted and the Secretary approved the application on March 27, 2001.

Before a new market can be officially designated, a referendum must be held to determine that a two-thirds majority of producers favor the designation. It is hereby determined that the referendum will be held by mail during the period of June 4–8, 2001. The purpose of the referendum is to determine whether farmers who sold their tobacco on the designated markets at Fairmont-Fair Bluff and Loris are in favor of, or opposed to, the designation of the consolidated market for the 2001 and succeeding crop years. Accordingly, if a two-thirds majority of those tobacco producers voting in the referendum favor the consolidation, a new market will be designated as and will be called Fairmont-Fair Bluff-Loris.

To be eligible to vote in the referendum a tobacco producer must have sold flue-cured tobacco on either the Fairmont-Fair Bluff, North Carolina, or Loris, South Carolina, auction markets during the 2000 marketing season. Any farmer who believes he or she is eligible to vote in the referendum but has not received a mail ballot by June 4, 2001, should immediately contact William Coats at (202) 205–0508.

The referendum will be held in accordance with the provisions for referenda of the Tobacco Inspection Act, as amended (7 U.S.C. 511d), and the regulations for such referendum set forth in 7 CFR 29.74.

Dated: April 25, 2001.

**Kenneth C. Clayton,**

*Acting Administrator, Agricultural Marketing Service.*

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

#### 7 CFR Part 981

[Docket No. FV01–981–1 PR]

#### Almonds Grown in California; Revision of Requirements Regarding Quality Control Program

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This rule invites comments on a revision to the administrative rules and regulations of the California almond marketing order (order) pertaining to the quality control program. The order regulates the handling of almonds grown in California, and is administered locally by the Almond Board of California (Board). Under the order, handlers receiving almonds from growers must have them inspected to determine the percentage of inedible almonds in each lot. Based on these inspections, handlers incur an inedible disposition obligation. They must satisfy this obligation by disposing of inedible almonds or almond material in outlets such as oil and animal feed. This rule would require at least 25 percent of each handler's disposition obligation to be satisfied by disposing of inedible almonds. Handlers with total annual inedible obligations of less than 1,000 pounds would be exempt from the 25 percent requirement. This rule would also implement a change requiring inedible obligation reports prepared by the Federal-State Inspection Service (inspection agency) to cover weekly rather than monthly periods, consistent with current practice. These proposed changes would help remove more inedible product from human consumption channels, and improve program administration.

**DATES:** Comments must be received by June 1, 2001.

**ADDRESSES:** Interested persons are invited to submit written comments concerning this proposal. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; Fax: (202) 720–8938, or E-mail: [moab.docketclerk@usda.gov](mailto:moab.docketclerk@usda.gov). All

comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be made available for public inspection in the Office of the Docket Clerk during regular business hours, or can be viewed at <http://www.ams.usda.gov/fv/moab.html>.

**FOR FURTHER INFORMATION CONTACT:**

Martin Engeler, Assistant Regional Manager, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487-5901, Fax: (559) 487-5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525-S, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 720-2491, Fax: (202) 720-8938.

Small businesses may request information on compliance with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, room 2525-S, Washington, DC 20090-6456; telephone: (202) 720-2491, Fax: (202) 720-8938, or E-mail: [Jay.Guerber@usda.gov](mailto:Jay.Guerber@usda.gov).

**SUPPLEMENTARY INFORMATION:** This proposal is issued under Marketing Order No. 981, as amended (7 CFR part 981), regulating the handling of almonds grown in California, hereinafter referred to as the "order." The marketing order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This proposal has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule. The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the

Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This proposed rule invites comments on revisions to the administrative rules and regulations pertaining to the quality control program under the California almond marketing order. The proposal would require that at least 25 percent of handlers inedible disposition obligations be satisfied by disposing of inedible almonds to accepted users of such product. Handlers with total annual inedible obligations of less than 1,000 pounds would be exempt from this requirement. The proposal would also require inedible obligation reports prepared by the inspection agency to cover weekly rather than monthly periods. The Board initially recommended adding the 25 percent disposition requirement at a July 12, 2000, meeting. The Department subsequently requested additional information regarding reporting requirements and additional inspection costs. At a meeting on December 6, 2000, the Board provided the requested information and added a recommendation to change the reporting requirement to require inedible obligation reports prepared by the inspection agency to cover weekly rather than monthly periods. Both proposals were unanimously recommended by the Board.

Section 981.42 of the order provides authority for a quality control program. Section 981.42(a) requires handlers to obtain incoming inspection on almonds received from growers to determine the percent of inedible kernels in each lot of any variety. This information is then reported to the Board. Section 981.42(a) further requires handlers to dispose of a quantity of almonds or almond product to satisfy an inedible disposition obligation as determined by the incoming inspection. This section also provides authority for the Board, with the approval of the Secretary, to establish rules and regulations necessary and incidental to the administration of the order's quality control provisions.

**Twenty-Five Percent Requirement**

Section 981.442 of the order's administrative rules and regulations specifies that the weight of inedible kernels in each lot of any variety of almonds in excess of 1 percent of the

kernel weight received by a handler shall constitute that handler's disposition obligation. Handlers are required to satisfy the disposition obligation by delivering packer pickouts, kernels rejected in blanching, pieces of kernels, meal accumulated in manufacturing, or other material, to crushers, feed manufacturers, feeders, or dealers in nut wastes on record with the Board as accepted users of such product. Accepted users dispose of this material to non-human consumption outlets. Currently, any of the aforementioned almond material can be used by handlers to satisfy any or all of their inedible disposition obligation. This rule would require that at least 25 percent of handlers disposition obligations be satisfied with inedible kernels as defined under § 981.408 of the rules and regulations. Handlers with total annual inedible obligations of less than 1,000 pounds would be exempt from the 25 percent requirement.

The overall intent of the quality control program is to remove inedible almonds from product shipped to consumers. Inedible almonds are poor quality kernels or pieces of defective almonds that in some instances may contain aflatoxin. Removing inedible almonds from human consumption channels provides a better quality product to consumers.

When the quality control program was initially implemented, it was recognized that it was not commercially feasible for handlers to remove all inedible almonds during the course of processing. Thus, handlers were allowed to use other almond material besides inedible almonds to satisfy their inedible disposition obligation.

Over the years, changes have occurred in the industry. There has been a marked increase in the amount of almonds used in the manufacture of almond products. This has led to an increase in the amount of almond by-product material generated by handlers. Handlers can use this product to satisfy their disposition obligation. Because of the increased availability of this almond by-product material for use in satisfying the disposition obligation, handlers may be less diligent than in the past in removing inedible almonds from their finished product.

Changes in the marketplace have also created conditions allowing handlers to deliver product containing a higher level of inedible almonds to their customers. Buyers, especially those who process almonds into other products, accept almonds with a higher inedible content than in the past. They can purchase this type of product at reduced price levels and still meet their needs.

Although there is a market for this product, handlers shipping product with a higher inedible content is not consistent with the intent of the quality control program, which is to remove inedible almonds from human consumption channels.

Finally, improvements in technology have enabled the delivery of a relatively clean product from shellers to handlers. Almonds are typically shelled, then delivered to handlers. In some instances, this product can meet a customer's specifications without further handler processing to remove inedible almonds.

The intent of the quality control program is to remove inedible almonds from product prior to shipment. Because of the aforementioned factors, the Board believes the intent of the quality control program is not sufficiently achieved. Therefore, the Board recommended requiring that at least 25 percent of handlers' disposition obligations be satisfied with inedible almonds. This proposed change is designed to ensure that handlers remove more inedible almonds from their product prior to shipment. It is expected that this change would result in a higher quality product shipped to consumers and more inedible almonds being removed from human consumption channels, thereby better effectuating the intent of the Board's quality control program.

#### Reporting Period Change

Section 981.442(a)(3) of the regulations requires the Federal-State Inspection Service (inspection agency) to prepare a report for each handler showing the weight of almonds received and the inedible content, and provide copies of the report to the Board and handler. Section 981.442(a)(3) currently requires this report from the inspection agency to cover a period of one day or a period not exceeding one month.

In carrying out the quality control program under the order, the almond industry utilizes the inspection agency to perform the required inspections. Prior to the 2000–2001 crop year, the inspection agency issued a report covering a period of one day, or a period not exceeding one month. At the beginning of the 2000–2001 crop year, the inspection agency began issuing a report covering weekly periods. This period has made it easier for the Board to collect and disseminate statistical information to handlers in a more timely manner. To bring the rules and regulations into conformity with current practices, the Board recommended revising § 981.442(a)(3) to require the inspection agency's report to the Board and handlers to cover weekly periods.

#### Additional Change

Finally, this proposal would add clarifying language to the regulations regarding the mechanics of crediting the disposition obligation. The proposed language would clarify that the handlers' disposition obligations are credited upon satisfactory completion of ABC Form 8, and state who the responsible parties are for completing ABC Form 8.

#### Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 106 handlers of California almonds who are subject to regulation under the order and approximately 7,000 almond producers in the regulated area. Small agricultural service firms have been defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than \$5,000,000, and small agricultural producers are defined as those having annual receipts of less than \$500,000.

Data for the most recently completed season indicate that about 63 percent of the handlers ship under \$5,000,000 worth of almonds and 37 percent ship over \$5,000,000 worth on an annual basis. In addition, based on production and grower price data reported by the National Agricultural Statistics Service, and the total number of almond growers, the average annual grower revenue was approximately \$98,000. In view of the foregoing, it can be concluded that the majority of handlers and producers of California almonds may be classified as small entities, excluding receipts from other sources.

This proposed rule would revise the administrative rules and regulations pertaining to the quality control program under the California almond marketing order. Section 981.42 of the order provides authority for a quality control program. Section 981.42(a) requires almond handlers to obtain incoming inspection on almonds

received from growers to determine the percent of inedible kernels in each lot of any variety. This information is reported to the Board by the inspection agency. Based on this incoming inspection, handlers incur an inedible disposition obligation. Handlers are then required to dispose of a quantity of almonds or almond material to accepted users of such product (basically, non-human consumption outlets) to satisfy their inedible disposition obligation. Section 981.42 also provides authority for the Board, with the approval of the Secretary, to establish rules and regulations necessary and incidental to the administration of the order's quality control provisions. Section 981.442 contains the rules and regulations used in administering the quality control program.

This proposed rule would require that at least 25 percent of a handler's inedible disposition obligation be satisfied by disposing of inedible almonds to the appropriate outlets. Currently, handlers may dispose of various types of almonds and almond products to satisfy the obligation. The purpose of this proposed 25 percent requirement is to help ensure the intent of the program is being met, which is to remove inedible almonds from human consumption channels. The rule would also modify language to specify a reporting period for the inspection agency to not exceed one week rather than one day or a period exceeding one month. This change would bring the rules and regulations into conformity with reporting procedures currently being followed.

There would be no additional cost to the industry to incorporate the revised reporting period into the regulations. However, there would be additional costs associated with implementing the requirement that at least 25 percent of each handler's total inedible dispositions be satisfied with inedible almonds. Inspection costs would increase slightly. Currently, § 981.442(a)(5) provides that the inspection agency must determine the almond content of each inedible disposition for each handler. That information is provided to the Board, and is credited against the appropriate handler's inedible disposition obligation after the disposition takes place. In order to implement the 25 percent requirement, it would be necessary for the inspection agency to determine not only the almond content of the dispositions, but also the amount of inedible product in the almond material. This would require additional analysis of samples by the inspection agency. The inspection agency charges a

per-ton fee and an hourly fee for inedible almond inspections. The per ton fee would not change. However, the number of hours required to implement the additional analysis would increase. It is estimated that the average total number of hours currently spent on inedible almond inspections could increase up to 20 percent; that is, from 1,116 hours to 1,339 hours. At the rate of \$14 per hour, this would represent an estimated increase to the industry of approximately \$3,122.

While there are additional costs to this proposal, there are also benefits. The intent of the quality control program under the order is to remove inedible almonds from human consumption channels and provide an improved quality product to consumers. It would be difficult to estimate the potential benefits of this proposed action in dollar terms. However, ensuring a good quality product to consumers leads to consumer satisfaction and repeat purchases, and contributes to orderly marketing.

Based on the foregoing, the Board believes that the costs of this proposal would be outweighed by the benefits. This proposal is beneficial to both the almond industry and consumers.

Handlers incurring total annual inedible obligations of less than 1,000 pounds would not be required to meet the 25 percent requirement. The approximately 30 handlers with such small obligations are allowed under current regulations to deliver their inedible material to Board staff in lieu of an accepted user. Almond Board staff is not trained to perform inedible analysis on almond product, and it would not be feasible for handlers with a 1,000 pound inedible obligation or less to incur additional costs for analyzing such small amounts of product. This exemption is also consistent with the RFA goal of ensuring that regulatory actions do not disproportionately impact smaller businesses. Thus, the exemption is in order.

One alternative to the proposals would be leave the regulations unchanged. With regard to the inspection reporting period changes, that was not considered viable because the current practices differ from those outlined in the marketing order regulations. Regarding the 25 percent inedible disposition requirement, leaving the program unchanged would not help ensure inedibles are removed from human consumption channels. Because of the significant amount of almond by-product material available to satisfy disposition obligations, it is believed that some handlers can satisfy

their entire inedible obligation with this material. This proposal would help ensure inedibles are removed.

Another alternative would be to require 100 percent of handlers disposition obligations to be satisfied with inedible almonds. However, such a requirement would not be commercially feasible for handlers. The Board believes that setting a 25 percent requirement is a reasonable change to better reflect the intent of the program.

This proposed rule would not impose any additional reporting or recordkeeping requirements on either small or large almond handlers. The current information collection requirements referenced in this proposed rule have been previously approved by the Office of Management and Budget (OMB) under OMB No. 0581-0071. As with all Federal marketing order programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public sector agencies.

The Department has not identified any relevant Federal rules that duplicate, overlap or conflict with this proposed rule.

In addition, the Board's meetings were widely publicized throughout the almond industry and all interested persons were invited to attend the meeting and participate in Board deliberations. Like all Board meetings, the July 12, 2000, and December 6, 2000, meetings were public meetings and all entities, both large and small, were able to express their views on this issue. The Board itself is composed of ten members, of whom five are producers and five are handlers.

Also, the Board has a number of appointed committees to review certain issues and make recommendations to the Board. The Board's Quality Control Committee met on July 11, 2000, and on September 13, 2000, and discussed these issues. Those meetings were also public meetings and both large and small entities were able to participate and express their views. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at <http://www.ams.usda.gov/fv/moab.html>. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

A 30-day comment period is provided to allow interested persons to respond

to this proposal. Thirty days is deemed appropriate because this rule would need to be in effect prior to the 2001-2002 crop year, which begins August 1, 2001. Also, California almond handlers are aware of these issues which were discussed at public meetings and were unanimously recommended by the Board. All written comments timely received will be considered before a final determination is made on this matter.

#### List of Subjects in 7 CFR Part 981

Almonds, Marketing agreements, Nuts, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 981 is proposed to be amended as follows:

#### PART 981—ALMONDS GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 981 continues to read as follows:

**Authority:** 7 U.S.C. 601-674.

2. In § 981.442, paragraph (a)(5) and the last sentence in paragraph (a)(3) are revised to read as follows:

#### § 981.442 Quality control.

(a) \* \* \*

(3) \* \* \* The report shall cover the handler's daily receipt or the handler's total receipts during a period not exceeding one week, and shall be submitted by the inspection agency to the Board and the handler.

\* \* \* \* \*

(5) *Meeting the disposition obligation.* Each handler shall meet its disposition obligation by delivering packer pickouts, kernels rejected in blanching, pieces of kernels, meal accumulated in manufacturing, or other material, to crushers, feed manufacturers, feeders, or dealers in nut wastes on record with the Board as accepted users. Handlers shall notify the Board at least 72 hours prior to delivery: *Provided*, That the Board or its employees may lessen this notification time whenever it determines that the 72 hour requirement is impracticable. The Board may supervise deliveries at its option. In the case of a handler having an annual total obligation of less than 1,000 pounds, delivery may be to the Board in lieu of an accepted user, in which case the Board would certify the disposition lot and report the results to the USDA. For dispositions by handlers with mechanical sampling equipment, samples may be drawn by the handler in a manner acceptable to the Board and the inspection agency. For all other dispositions, samples shall be drawn by

or under supervision of the inspection agency. Upon approval by the Board and the inspection agency, sampling may be accomplished at the accepted user's destination. The edible and inedible almond meat content of each delivery shall be determined by the inspection agency and reported by the inspection agency to the Board and the handler. The handler's disposition obligation will be credited upon satisfactory completion of ABC Form 8. ABC Form 8, Part A, is filled out by the handler, and Part B by the accepted user. Deliveries containing less than 50 percent almond meat content shall not be credited against the disposition obligation. At least 25 percent of a handler's total crop year inedible disposition obligation shall be satisfied with dispositions consisting of inedible kernels as defined in § 981.408: *Provided*, That this 25 percent requirement shall not apply to handlers with total annual obligations of less than 1,000 pounds. Each handler's disposition obligation shall be satisfied when the almond meat content of the material delivered to accepted users equals the disposition obligation, but no later than August 31 succeeding the crop year in which the obligation was incurred.

\* \* \* \*

Dated: April 25, 2001.

**Kenneth C. Clayton,**

*Acting Administrator, Agricultural Marketing Service.*

BILLING CODE 3410-02-P

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. 2001-NM-12-AD]

RIN 2120-AA64

#### **Airworthiness Directives; Saab Model SAAB 2000 Series Airplanes**

**AGENCY:** Federal Aviation Administration, DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Saab Model SAAB 2000 series airplanes. This proposal would require testing of certain components of the emergency pitch trim system (EPTS), and corrective action, if necessary. This action is necessary to prevent faulty

activation of the emergency pitch trim actuator (EPTA), which could cause damage to the elevator front spar, resulting in reduced structural integrity of the elevator and a non-functioning EPTS. This action is intended to address the identified unsafe condition.

**DATES:** Comments must be received by June 1, 2001.

**ADDRESSES:** Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-114, Attention: Rules Docket No. 2001-NM-12-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays. Comments may be submitted via fax to (425) 227-1232. Comments may also be sent via the Internet using the following address: 9-anm-nprmcomment@faa.gov. Comments sent via fax or the Internet must contain "Docket No. 2001-NM-12-AD" in the subject line and need not be submitted in triplicate. Comments sent via the Internet as attached electronic files must be formatted in Microsoft Word 97 for Windows or ASCII text.

The service information referenced in the proposed rule may be obtained from Saab Aircraft AB, SAAB Aircraft Product Support, S-581.88, Linköping, Sweden. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington.

**FOR FURTHER INFORMATION CONTACT:** Dan Rodina, Aerospace Engineer, International Branch, ANM-116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055-4056; telephone (425) 227-2125; fax (425) 227-1149.

#### **SUPPLEMENTARY INFORMATION:**

##### **Comments Invited**

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this action may be changed in light of the comments received.

Submit comments using the following format:

- Organize comments issue-by-issue. For example, discuss a request to

change the compliance time and a request to change the service bulletin reference as two separate issues.

- For each issue, state what specific change to the proposed AD is being requested.

- Include justification (e.g., reasons or data) for each request.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this action must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2001-NM-12-AD." The postcard will be date stamped and returned to the commenter.

#### **Availability of NPRMs**

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-114, Attention: Rules Docket No. 2001-NM-12-AD, 1601 Lind Avenue, SW., Renton, Washington 98055-4056.

#### **Discussion**

The Luftfartsverket (LFV), which is the airworthiness authority for Sweden, notified the FAA that an unsafe condition may exist on certain Saab Model SAAB 2000 series airplanes. The LFV advises that, in one case, it has been reported that wires to an emergency pitch trim actuator (EPTA) mode control relay were wired incorrectly in production. This condition, if not corrected, could result in faulty activation of the EPTA, causing damage to the elevator front spar and resulting in reduced structural integrity of the elevator and a non-functioning emergency pitch trim system (EPTS).

#### **Explanation of Relevant Service Information**

Saab has issued Service Bulletin 2000-27-046, dated November 30, 2000, which describes procedures for conducting a functional test of the EPTS, and checking and replacing the wiring, if necessary. Accomplishment of the actions specified in the service bulletin is intended to adequately address the identified unsafe condition. The LFV classified this service bulletin as mandatory and issued Swedish
