IV. Next Steps

The NAC/AEGL Committee plans to publish "Proposed" AEGL values for five-exposure periods for other chemicals on the priority list of 85 in groups of approximately 10 to 20 chemicals in future **Federal Register** notices during the calendar year 2001.

The NAC/AEGL Committee will review and consider all public comments received on this notice, with revisions to the "Proposed" AEGL values as appropriate. The resulting AEGL values will be established as "Interim" AEGLs and will be forwarded to the NRC/NAS, for review and comment. The "Final" AEGLs will be published under the auspices of the NRC/NAS following concurrence on the values and the scientific rationale used in their development.

II. Registrants Request to Cancel Product and Use Registrations*A. Background Information*

Ethyl parathion is an organophosphate insecticide/miticide currently registered for use on alfalfa, barley, corn, cotton, canola, sorghum, soybean, sunflower, and wheat crops. In 1991, EPA and the registrants reached an agreement that limited ethyl parathion use to these nine current crop sites, and restricted application and post-application practices to mitigate extreme acute toxicity risks to workers. As a result, to protect workers, ethyl parathion may only be handled by trained, certified applicators using closed mixing and loading systems, may only be applied aerially, and crops treated with the pesticide may only be harvested mechanically.

Even with the post 1991 use restrictions, EPA's revised risk assessment completed in September, 1999 showed high levels of worker and ecological risk from legal uses of ethyl

parathion. There were also several unfulfilled data requirements. After viewing the revised risk assessment and outstanding data requirements, Cheminova, Inc. and Cheminova, A/S and EPA signed a memorandum of agreement (MOA) effective October 10, 2000. In accordance with this MOA, Cheminova, Inc. and Cheminova, A/S have requested to amend their end-use products registrations to immediately terminate the use on corn grown for seed which can result in higher exposures to workers and have requested voluntary cancellation of all their ethyl parathion registrations. Some other companies holding registrations for ethyl parathion products have also written letters to the EPA requesting voluntary cancellation of all their ethyl parathion products.

B. Requests for Voluntary Cancellation

Registrants have requested voluntary cancellation of all their ethyl parathion registrations either by signing a MOA or by letter to the Agency. Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary termination of any minor agricultural use before granting the request, unless (1) the registrants request a waiver of the comment period, or (2) the Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment. The registrant has requested that EPA waive the 180-day comment period. EPA is granting the registrants' request to waive the 180-day comment period and is providing a 30-day public comment period before taking action on the requested cancellations. Given the potential worker and ecological risk that ethyl parathion use poses, EPA anticipates granting the requested cancellations at the close of the comment period for this announcement. The specific cancellation requests are set forth below.

1. *Requests for termination of use on corn grown for seed.* In accordance with the MOA, Cheminova, Inc. has requested that its end-use products registrations be amended to immediately terminate the use of corn grown for seed. EPA anticipates granting the requested termination shortly after

the end of the 30 day comment period for this notice. This use termination was requested for the end-use products identified in the following Table 1.

	67760-38	Parathion 8EC
	67760-39	Ethyl-Methyl Parathion 6-3 EC

2. *Requests for voluntary cancellation of manufacturing use product registrations.* Pursuant to the Agreement and FIFRA section 6(f)(1)(A), Cheminova, A/S, the only registrant with a manufacturing use product registration, has submitted a request for voluntary cancellation of registrations for all ethyl parathion manufacturing-use products. EPA anticipates granting the cancellation request shortly after the end of the 30 day comment period for this notice. The registrations for which cancellations were requested are identified in the following Table 2.

3. *Requests for voluntary cancellation of end-use product registrations.* Several registrants have submitted requests for immediate voluntary cancellation of their registrations for end-use pesticide products containing ethyl parathion. The registrants who signed the MOA requested for cancellation of their ethyl parathion end-use product registrations effective as of December 31, 2002. EPA expects that end-use product registrations canceled by letter of voluntary cancellation are to be canceled shortly after the end of the 30-day comment period for this notice. The end-use registrations for which cancellation was requested by MOA or letter are identified in the following Table 3.

III. Potential Actions Relative to Remaining End-Use Products Registrations

EPA is contemplating various enforcement and regulatory actions with respect to the remaining end-use product registrations after EPA grants the voluntary cancellation requests set forth in Unit II. of this Notice. These remaining registrations cite the manufacturing use product listed in Table 2 as the source of active ingredient in these products. Because EPA intends to limit the sale, distribution and use of the existing stocks of this source in the order canceling its registration, production of these remaining end-use products may be illegal under the cancellation order or the current registrations for these end-use products. Accordingly, EPA may initiate appropriate enforcement actions to ensure that the remaining end-use products are not being produced illegally after the source is canceled. As shown in the Agency's revised risk assessment dated September 1999, EPA is concerned with the risks associated with the use of pesticide products containing ethyl

parathion. Because of these concerns, EPA is contemplating initiating a proceeding to cancel these remaining registrations. The remaining end-use product registrations that may be subject to enforcement and regulatory actions discussed in this Unit are identified in the following Table 4.

TABLE 4.—END-USE PRODUCT REGISTRATIONS POTENTIALLY SUBJECT TO INVOLUNTARY CANCELLATION

	19713–324	Ida Seis-Tres 6-3
	19713–325	Drexel Parathion 4EC

IV. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more pesticide uses. FIFRA section 6(f)(1) further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**, make reasonable efforts to inform persons who rely on the pesticide for minor agricultural uses, and provide a 30-day period in which the public may comment. Thereafter, the Administrator may approve such a request.

V. Procedures for Withdrawal of Request

Registrants may withdraw a request for cancellation only in conformance with the memoranda of agreement. Registrants must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

VI. Proposed Existing Stocks Provision

Pursuant to section 6(f) of FIFRA, EPA intends to grant the requests for voluntary amendment and cancellation identified in Unit II. For purposes of the cancellation order that the Agency proposes to issue at the close of the comment period for this announcement, the term "existing stocks" will be defined, pursuant to EPA's existing stocks policy published in the **Federal Register** on June 26, 1991 at 56 FR 29362, as those stocks of a registered pesticide product which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the amendment or cancellation. Any distribution, sale, or use of existing stocks after the effective date of the cancellation order that the Agency intends to issue that is not consistent with the terms of that order will be considered a violation of section 12(a)(2)(K) and/or 12(a)(1)(A) of FIFRA.

A. Distribution, Sale and Use of End-Use Products Bearing Old Labeling Permitting Use on Corn Grown for Seed

In any cancellation order issued in response to registrants' request for registration amendment to terminate the use on corn grown for seed, EPA does not intend to prohibit the sale, distribution and use of the existing stocks of these products. Based on the registrants' assurance, EPA anticipates that most of these products will be relabeled to eliminate the canceled use.

B. Distribution, Sale and Use of Manufacturing-Use Products

EPA anticipates that any cancellation order issued in response to the registrants' request for voluntary cancellation of manufacturing-use product registrations would:

- (1) Prohibit, as of the effective date of the cancellation order, all sale, distribution and use of existing stocks of manufacturing use products imported into the United States after July 7, 2000;
- (2) Prohibit, as of the effective date of the cancellation order, all sale and distribution of ethyl parathion manufacturing use products imported into the United States prior to July 7, 2000 to pesticide registrants who have not executed the MOA or an agreement equivalent to the MOA, and prohibit use by such registrants, unless the sale, distribution or use is for the purpose of manufacturing a product intended solely for export consistent with the requirements of FIFRA Section 17; and
- (3) Prohibit, as of December 31, 2002, all sale, distribution and use of existing stocks of manufacturing-use products

imported prior to July 7, 2000, unless the sale or distribution is solely for purposes of export consistent with the requirements of section 17 of FIFRA, or for proper disposal.

C. Distribution, Sale and Use of End-Use Products

EPA anticipates that any cancellation order issued in response to the registrants' request for voluntary cancellation of end-use product registrations would:

- (1) Prohibit, as of December 31, 2002, registrants from distributing or selling existing stocks of the end-use products;
- (2) Prohibit, as of August 31, 2003, all sale and distribution of existing stocks of the end-use products; and
- (3) Prohibit, as of October 31, 2003, all use of existing stocks of the end-use products.

VII. Future Tolerance Revocations

EPA anticipates drafting a future **Federal Register** notice proposing to separate the parathion tolerances for residues found in 40 CFR 180.121 into 180.121 for ethyl parathion and 180.122 for methyl parathion. This future notice will additionally propose revocation of tolerances on commodities on which there are no registered uses of either ethyl parathion or methyl parathion. With this present notice, EPA seeks comment as to whether any individuals or groups want to support continuation of these tolerances. For the nine crops on which ethyl parathion may be used until October 31, 2003, ethyl parathion tolerances will be revoked with an expiration date which will allow commodities with residues resulting from lawful applications to clear the channels of trade.
