3. Norton Energy Storage, L.L.C.

[Docket No. EL01-70-000]

Take notice that on April 26, 2001, Norton Energy Storage, L.L.C. (NES) filed with the Federal Energy Regulatory Commission a Petition for Declaratory Order pursuant to Section 385.207 of the Commission's Regulations, 18 CFR 385.207.

NES requests that the Commission declare that transactions involving the delivery of electric energy to NES' Compressed Air Energy Storage (CAES) generating facility (the NES Facility) for storage through the compression of air into a cavern for subsequent release through turbine generators to produce electric energy or ancillary services for sale or exchange at wholesale in interstate commerce are exclusively subject to the Commission's jurisdiction under Section 201 of the Federal Power Act, 16 U.S.C. §§ 824-825r (the FPA).

NES states that it is developing its CAES generating facility at the site of an abandoned limestone mine in the City of Norton, Summit County, Ohio, near Akron. NES represents that the NES Facility will eventually include 2,700 MW of capacity, to be constructed in individual increments of 300 MW. According to NES, the NES Facility will be the first compressed air energy storage project to be developed in North America as a merchant facility, and only the third CAES facility in the world. NES states that the NES Facility will employ an innovative technology that will allow NES to "store" electric energy produced in one period for delivery, resale and use during a later period, much as a pumped storage hydroelectric facility does.

NES states that the NES Facility's customers (including traditional public utilities, merchant generators and power marketers) will deliver electric energy to the NES Facility from time to time. This electric energy will be "stored" by compressing air into a sealed underground storage area. NES will maintain the injected air at high pressure until its controlled release through gas-fired turbine generators during peak electric demand periods. In this manner, according to NES, the NES

Facility will reclaim the "compression power" used to compress and store air, for purposes of generating electric energy for sale or exchange into wholesale markets. NES asserts that participants in electric energy markets will be able to use the NES Facility as a mechanism by which they can store electric energy obtained in wholesale markets during off-peak periods and exchange it for electric energy or ancillary services made available to wholesale markets during peak periods.

NES asks in its Petition that the Commission confirm that the various ways in which electric energy may be stored and exchanged through the medium of the NES Facility qualify as transactions involving the sale of electric energy and ancillary services for resale in interstate commerce, i.e., as "electric service," as that term is defined at 18 CFR 35.2(a), subject exclusively to the Commission's FPA jurisdiction.

NES states that it is currently in the process of securing additional equity investors and arranging for the financing of the initial phase of its project. NES asserts that the financial markets, potential equity investors and would-be counter parties all require certainty as to how electric energy transactions involving the NES Facility will be treated for regulatory purposes. NES therefore asks that the requested declaratory order be issued by June 30, 2001.

NES states that it has served copies of its Petition upon representatives of FirstEnergy Corp. and American Electric Power, the public utilities with which it will be interconnected, and upon representatives of the Public Utilities Commission of Ohio and the Attorney General of Ohio. Questions concerning this filing may be directed to counsel for NES, James F. Bowe, Jr., Dewey Ballantine LLP, at (202) 429-1444, fax (202) 429-1579, or jbowe@deweyballantine.com.

Calpine alleges that Decision 01-03-067, issued by the California Public Utilities Commission (CPUC) on March 28, 2001 (Avoided Cost Decision), violates PURPA Section 210, 16 U.S.C. § 824a-3 which requires, inter alia, that rates for purchases from QFs shall not exceed incremental cost to the utility, nor shall those rates discriminate against qualifying cogenerators or small power producers. The Avoided Cost Decision changes the formula by which avoided cost rates are calculated.

This change violates PURPA, Calpine alleges, for three reasons: (i) The Avoided Cost Decision sets avoided costs in an arbitrary and unlawful manner, without any relationship whatsoever to the purchasing utility's "full avoided costs," thus violating the PURPA avoided cost mandate; (ii) the Avoided Cost Decision subjects QFs to improper CPUC rate regulation, in contravention of PURPA and; (iii) the Avoided Cost Decision sets payments to QFs at price levels at which QFs cannot economically generate, contrary to the PURPA objective of encouraging generation. Calpine asks this Commission to institute an enforcement action and/or to issue a declaratory order, and requests that it do so using expedited treatment, to grant relief to the QFs from the Avoided Cost Decision.
