SUPPLEMENTARY INFORMATION: Federal Motor Vehicle Safety Standard 202 has required head restraints in front outboard positions for all cars manufactured January 1, 1969 and later, for sale in the United States. The National Highway Traffic Safety Administration extended the standard to include light trucks (pickup trucks, vans, and sport utility vehicles with Gross Vehicle Weight Rating less than 10,000 pounds) as of September 1, 1991.

NHTSA's 1982 evaluation of head restraints in passenger cars estimated a 13 percent overall reduction in injuries to drivers in rear impacts. The current evaluation, based on data from eight states (Florida, Indiana, Maryland, Missouri, North Carolina, Pennsylvania, Texas, and Utah) estimates that head restraints reduced overall injury risk in light trucks in rear impacts by a statistically significant 6 percent.

How Can I Influence NHTSA's Thinking on This Evaluation?

NHTSA welcomes public review of the technical report and invites reviewers to submit comments about the data and the statistical methods used in the analyses. NHTSA will submit to the Docket a response to the comments and, if appropriate, additional analyses that supplement or revise the technical report.
