

Background:

The Corporation for National Service has the responsibility to evaluate the effectiveness of its program. The Corporation's major initiative is AmeriCorps, the national service program funded at \$360 million annually. While the primary emphasis of AmeriCorps is on providing services to communities and other beneficiaries, of key importance is participant development. AmeriCorps includes the State and National program and the National Civilian Community Corps (NCCC) program. The objectives of this study are to describe the changes in those outcomes over time; to identify factors explaining variation in outcomes at different stages of time; and to identify relationships between selected program features and member outcomes. Outcome domains will include civic engagement, educational skill aspiration and achievements, employment skill aspiration and achievements, and life skills.

The Longitudinal Study of AmeriCorps Member Outcomes is designed to assess the effectiveness of AmeriCorps programs in meeting these objectives—member development outcomes. Previously, the Corporation received OMB approval (OMB # 3045–0060, expires September 30, 2002 and #3045–0070, expires September 31, 2003) to launch three rounds of surveys of AmeriCorps members and their counterparts in comparison groups.

Current Action

The Corporation seeks approval to continue to study the impact of AmeriCorps*State and National and AmeriCorps*NCCC. This is a request to add another round of data collection to the study. The purpose of this additional round of data collection is to supplement data collected at baseline and post-program and collect additional information about participation in service prior to AmeriCorps, and the decision-making process concerning enrolling or not enrolling in AmeriCorps. In addition, the survey will collect details about the AmeriCorps experience of members, and employment and educational experiences of individuals in the comparison group in the year after they considered joining, but did not actually join AmeriCorps. Analysis of baseline data collected in the initial round of surveys raised questions about participants' motivations about, and previous involvement in, community service. Data collected in the supplemental survey will allow us to address those concerns.
