

scheduled to expire at the end of October 2001.

The Office of Government Ethics is issuing this first round **Federal Register** notice to announce its forthcoming request to OMB for paperwork renewal of the survey form, with two proposed minor changes to survey question 4 to achieve greater clarity. That question currently asks whether OGE's requirement to fax or mail requests that involve more than six filers creates a problem for the requester. Based on an analysis of customer responses to question 4, OGE believes that the following statement should be added: "SKIP this question if your request involved six or fewer filers." Additionally, one of the three requested responses to question 4, "Not Applicable," is being changed to "My request did not have to be faxed or mailed."

Pursuant to the Paperwork Reduction Act, OGE is not including in its public burden estimate for the survey form the limited number of access requests filed by other Federal agencies or Federal employees. Nor is OGE including in that estimate the limited number of requests for copies of other records covered under the special Ethics Act public access provision (such as certificates of divestiture) since the survey is only sent to persons who request copies of SF 278 reports. As so defined, the total number of access survey forms for copies of SF 278s estimated to be filed annually at OGE over the next three years by members of the public (primarily by news media representatives, public interest group members and private citizens) is 50. This estimate is based on a calculation of the number of survey forms received at OGE between April 1999 and June 2001 (70 surveys). This number also takes into account an expected increase in the number of public requests as a result of the transition and the new Presidential administration. The estimated average amount of time to read the instructions on the proposed revised customer service survey form, and to complete the form, is three minutes. Thus, the overall estimated annual public burden for the OGE Public Financial Disclosure Access Customer Service Survey as proposed for revision will be three hours (rounded up from two and a half hours (= 50 forms $\times$ 3 minutes per form)).

Public comment is invited on all aspects of the survey form as proposed for renewal with minor revision, including specifically views on: the accuracy of OGE's public burden estimate; the potential for enhancement of quality, utility and clarity of the information to be collected; and the

minimization of burden (including the possibility of use of information technology).

After this notice and comment period, OGE will submit the survey form, as revised, to OMB for review and three-year approval under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35). At that time, OGE will also publish a second paperwork notice in the **Federal Register** to inform the public and Federal agencies. Comments received in response to this notice will be summarized for, and may be included with, the forthcoming OGE request for OMB three-year paperwork approval. They will also be explained in the second round notice. The comments will also become a matter of public record.

Approved: June 13, 2001.

Director, Office of Government Ethics.

Agency Forms Undergoing Paperwork Reduction Act Review

Proposed Project: Validation of Self-Reported Arthritis Case Definitions in a Managed Care Setting—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC). It is difficult to estimate the burden of arthritis on the American public because many patients with arthritis do not seek treatment from a health care provider for the condition. The Behavioral Risk Factor Surveillance System (BRFSS) is an ongoing telephone survey that is being used by individual states and the CDC to measure the burden of arthritis. The BRFSS collects a wide variety of self-reported health information, including 6 questions on arthritis. A BRFSS case of arthritis is defined as any person who reports chronic joint symptoms or recalls a diagnosis of arthritis by a health care provider. However, the BRFSS case definition has not been validated, meaning it is unclear if patients who report arthritis symptoms or a diagnosis of arthritis truly have arthritis based on a clinical evaluation by a health care provider. It is also not known if persons who deny chronic joint symptoms and
