Title: Section 21.937 Negotiated Interference Protection.

Form No.: N/A

Type of Review: Extension of currently approved collection.

Respondents: Businesses or other for-profit.

Number of Respondents: 75.

Estimated Hours Per Response: 30 hours (6 hours respondent, 8 hours contract attorney, 16 hours consulting engineer).

Frequency of Response: On occasion.

Cost to Respondents: \$300,000.

Estimated Total Annual Burden: 450 hours.

Needs and Uses: Under Section 21.937, the level of acceptable electromagnetic interference that occurs at or within the boundaries of an adjacent Basic Trading Area (BTA), partitioned service area or an incumbent MDS station's protected service area, can be negotiated and established with the written consent of the affected licensee. Thus, Section 21.937 permits

negotiated interference agreements among these parties. These written agreements must be submitted to the Commission within thirty days of ratification. (These agreements are often included with the submission of the FCC 304 attached as Exhibits.) These agreements allow the parties to establish acceptable levels of interference based on the design of their stations and service needs. These agreements are the most effective means of regulating interference and they provide flexibility in designing MDS systems.

SUPPLEMENTARY INFORMATION:

OMB Control No.: 3060-0833.

Title: Complaint Filings/ Designation of Agents.

Form No.: N/A.

Type of Review: Revision of currently approved collection.

Respondents: Individuals or households, business or other for-profit, not-for-profit institutions, state, local or tribal governments, and Federal government.

Number of Respondents: 1,000 prospective complainants annually will report accessibility problems or file complaints using the Commission's various means and may be asked to provide the Commission with further information later in the process. This should take approximately 2 hours per response, for a total annual burden of about 2,000 hours. There will be no estimated annual cost. Approximately 1,000 equipment manufacturers and services providers annually are expected to be involved in resolving these complaints. We estimate that these steps will take approximately 6.50 hours per respondent for a total annual burden of 6,500 hours. The estimated annual cost is \$720,000. In addition, 7,677 telecommunications equipment manufacturers and service providers annually are expected to provide a list of points of contact for disability access complaints. Satisfying these burdens will likely require about 1 hour per respondent for a total annual burden of 7,677 hours and no annual cost. Thus, the total number of respondents is 9,677.

Estimated Time Per Response: For filing complaints, 2 hours; for complaint processing, 6.5 hours; for designation of agent, 1 hour.

Frequency of Response:

Recordkeeping; on occasion reporting requirement (for complaints); one-time filing (for designation of agent).

Total Annual Burden: 16,177 hours.

Total Annual Cost: \$720,000.

Needs and Uses: For complaints, respondents will be consumers. In addition, telecommunications equipment manufacturers and telecommunications service providers
