

e. A personnel section which identifies the proposed project coordinator and other key personnel necessary to perform the public information campaign, enforcement activities and evaluation component shall be provided. This section shall include a description of their qualifications, the nature of their contribution, their respective organizational responsibilities, and the proposed level of their effort.

Review Process and Criteria

Initially, each application will be reviewed to confirm that the applicant meets the eligibility requirements and that the application contains all of the information required by the Application Contents section of this notice. Each complete application from an eligible applicant will then be evaluated by a NHTSA Technical Evaluation Committee. The applications will be evaluated using the following criteria:

1. Project Plan: The overall soundness and feasibility of the rural demonstration community project plan and the potential effectiveness of the described public information and education campaign and highly visible law enforcement activities to increase seat belt and child safety seat use among occupants of pickup trucks (50 percent).

2. The applicant's planned partnerships with other community agencies/organizations promotes the requisite participation among those groups considered necessary to conduct an effective community demonstration project. In addition, the applicant's prior successful experience with community-based coalitions demonstrates the necessary organizational skills to effectively coordinate the proposed project (30 percent).

3. The proposed personnel resources demonstrate effective project coordination capability and the requisite breadth of expertise to successfully perform the described activities that will result in increasing seat belt and child safety seat use among occupants of pickup trucks (20 percent).

Terms and Conditions of Award

1. Prior to award, the recipients must comply with the certification requirements of 49 CFR part 20, Department of Transportation New Restriction on Lobbying, and 49 CFR Part 29, Department of Transportation Government-wide Debarment and Suspension (Nonprocurement) and Government-wide Requirements for Drug-Free Workplace (Grants).

2. During the effective period of the cooperative agreements awarded as a

result of this Notice, the agreements shall be subject to NHTSA's General Provisions for Assistance Agreements (7/95).

3. Reporting Requirements and Deliverables:

a. Quarterly Reports, which shall be due 15 days after the end of each quarter, shall be submitted to document project efforts and results. The reports should include up-to-date information summarizing accomplishments during the quarter including: data gathered to-date (such as earned and paid media events, observation and awareness surveys, and enforcement data); obstacles or problems encountered and proposed solutions; noteworthy activities, events or successes; and funds and in-kind contributions expended to date. The quarterly reports will form the basis for the final report to disseminate the lessons learned and successes of the recipient. The COTR will approve invoices upon receipt of each quarterly report.

b. Draft Final Report: The recipient shall prepare a draft Final Report that includes a complete description of the overall project implementation, including a project time-line; the activities conducted, including partners; data collection efforts; evaluation methodology; and findings from the program evaluation. In terms of information transfer, it is important to know what worked and what did not work, under what circumstances, and what can be done to avoid potential problems in future projects. The report should provide information that will be helpful in assembling a "Best Practices" guide for use by other communities. The grantee shall submit the draft Final Report to the COTR 60 days prior to the end of the performance period. The COTR will review the draft report and provide comments to the grantee within 30 days of receipt of the document.

c. Final Report: The grantee shall revise the draft Final Report to reflect the COTR's comments. The revised final report shall be delivered to the COTR 15 days before the end of the performance period. For the final report, the Grantee shall supply the COTR:

—A camera ready version of the document as printed.

—A copy, on appropriate media (diskette, Syquest disk, etc.), of the document in the original program format that was used for the printing process.

Note: Some documents require several different original program languages (e.g., PageMaker was the program format for the general layout and design and Power Point was used for charts and yet another was used for photographs, etc.). Each of these

component parts should be available on disk, properly labeled with the program format and the file names. For example, Power Point files should be clearly identified by both a descriptive name and file name (e.g., 1994 Fatalities—chart1.ppt).

—A complete version of the assembled document in portable document format (PDF) for placement of the report on the world wide web (WWW). This will be a file usually created with the Adobe Exchange program of the complete assembled document in the PDF format that will actually be placed on the WWW. The document would be completely assembled with all colors, charts, side bars, photographs, and graphics. This can be delivered to NHTSA on a standard 1.44 diskette (for small documents) or on any appropriate archival media (for large documents) such as a CD ROM, TR-1 Mini cartridge, Syquest disk, etc.

—Four additional hard copies of the final document.

d. The recipients may be requested to conduct an oral presentation of their respective project activities for the COTR and other interested NHTSA personnel. For planning purposes, assume that these presentations will be conducted at the NHTSA Office of Traffic and Injury Control Programs, Washington, DC. An original and three copies of briefing materials shall be submitted to the COTR.

Issued on: June 28, 2001.

National Highway Traffic Safety Administration

[Docket No. NHTSA-2001-9848]

Notice of Receipt of Petition for Decision that Nonconforming 1997 Chevrolet Cavalier Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1997 Chevrolet Cavalier passenger cars are eligible for importation.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that the 1997 Chevrolet Cavalier that was not originally manufactured to comply with

all applicable Federal motor vehicle safety standards is eligible for importation into the United States because (1) it is substantially similar to a vehicle that was originally manufactured for importation into and sale in the United States and that was certified by its manufacturer as complying with the safety standards, and (2) it is capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is August 6, 2001.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL-401, 400 Seventh St., SW., Washington, DC 20590. [Docket hours are from 9 am to 5 pm]

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle originally manufactured for importation into and sale in the United States, certified under 49 U.S.C. 30115, and of the same model year as the model of the motor vehicle to be compared, and is capable of being readily altered to conform to all applicable Federal motor vehicle safety standards.

Petitions for eligibility decisions may be submitted by either manufacturers or importers who have registered with NHTSA pursuant to 49 CFR part 592. As specified in 49 CFR 593.7, NHTSA publishes notice in the **Federal Register** of each petition that it receives, and affords interested persons an opportunity to comment on the petition. At the close of the comment period, NHTSA decides, on the basis of the petition and any comments that it has received, whether the vehicle is eligible for importation. The agency then publishes this decision in the **Federal Register**.

Bayway Auto, Inc. of Elizabeth, New Jersey ("BWA") (Registered Importer 98-166) has petitioned NHTSA to decide whether 1997 Chevrolet Cavalier passenger cars, originally manufactured for sale in the Middle-East, are eligible for importation into the United States. The vehicle which BWA believes is substantially similar is the 1997

Chevrolet Cavalier that was manufactured for importation into, and sale in, the United States and certified by its manufacturer, General Motors, as conforming to all applicable Federal motor vehicle safety standards.

The petitioner claims that it carefully compared the non-U.S. certified 1997 Chevrolet Cavalier passenger car to its U.S. certified counterpart, and found the two vehicles to be substantially similar with respect to compliance with most Federal motor vehicle safety standards.

BWA submitted information with its petition intended to demonstrate that the non-U.S. certified 1997 Chevrolet Cavalier, as originally manufactured, conforms to many Federal motor vehicle safety standards in the same manner as its U.S. certified counterpart, or is capable of being readily altered to conform to those standards.

Specifically, the petitioner claims that the non-U.S. certified 1997 Chevrolet Cavalier is identical to its U.S. certified counterpart with respect to compliance with Standard Nos. 102 *Transmission Shift Lever Sequence* * * *, 103 *Defrosting and Defogging Systems*, 104 *Windshield Wiping and Washing Systems*, 105 *Hydraulic Brake Systems*, 106 *Brake Hoses*, 108 *Lamps, Reflective Devices and Associated Equipment*, 109 *New Pneumatic Tires*, 110 *Tire Selection and Rims*, 113 *Hood Latch Systems*, 116 *Brake Fluid*, 118 *Power Window Systems*, 124 *Accelerator Control Systems*, 201 *Occupant Protection in Interior Impact*, 202 *Head Restraints*, 204 *Steering Control Rearward Displacement*, 205 *Glazing Materials*, 206 *Door Locks and Door Retention Components*, 207 *Seating Systems*, 209 *Seat Belt Assemblies*, 210 *Seat Belt Assembly Anchorages*, 212 *Windshield Retention*, 214 *Side Impact Protection*, 216 *Roof Crush Resistance*, 219 *Windshield Zone Intrusion*, and 302 *Flammability of Interior Materials*.

The petitioner also states that a vehicle identification number plate affixed to the vehicle meets the requirements of 49 CFR Part 565, that the anti-theft device meets the requirements of 49 CFR Part 541, and that the bumpers and bumper support structure satisfy the Bumper Standard found at 49 CFR Part 581.

Petitioner also contends that the vehicle is capable of being readily altered to meet the following standards, in the manner indicated:

Standard No. 101 *Controls and Displays*: (a) Substitution of a lens marked "Brake" for a lens with a noncomplying symbol on the brake failure indicator lamp; (b) installation of a seat belt warning lamp that displays the appropriate symbol; (c) replacement

of the speedometer/odometer assembly unit with the U.S.-model component.

Standard No. 111 *Rearview Mirror*: replacement of the passenger side rearview mirror with a U.S.-model component.

Standard No. 114 *Theft Protection*: installation of a warning buzzer microswitch in the steering lock assembly and a warning buzzer.

Standard No. 208 *Occupant Crash Protection*: (a) Installation of a U.S.-model seat belt in the driver's seating position or a belt webbing actuated microswitch inside the driver's seat belt retractor; (b) installation of an ignition switch actuated seat belt warning lamp and buzzer; (c) replacement of the driver's and passenger's side air bags and knee bolsters with U.S.-model components if the vehicle is not already so equipped. The petitioner states that the vehicles are equipped with combination lap and shoulder restraints which adjust by means of an automatic retractor and release by means of a single push button in both front designated seating positions, with combination lap and shoulder restraints which release by means of a single push button in both rear outboard designated seating positions, and with a lap belt in the rear center designated seating position.

Standard No. 301 *Fuel System Integrity*: installation of a rollover valve in the fuel tank vent line.

Interested persons are invited to submit comments on the petition described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5109, 400 Seventh Street, SW., Washington, DC 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Notice of final action on the petition will be published in the **Federal Register** pursuant to the authority indicated below.

Authority: 49 U.S.C. 30141(a)(1)(A) and (b)(1); 49 CFR 593.8; delegations of authority at 49 CFR 1.50 and 501.8.

Issued on: June 28, 2001.
