

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11013; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9H, Airspace Designations and Reporting Points, dated September 1, 2000, and effective September 16, 2000, is amended as follows:

Paragraph 6002 Class E airspace designated as surface area for an airport.

* * * * *

ANM MT E2 Coppertown, MT [Remove]

* * * * *

ANM MT E2 Butte, MT [New]

Bert Mooney Airport, MT
(Lat. 45°57'17" N., long. 112°29'57" W.)
Coppertown VORTAC
(Lat. 46°01'58" N., long. 112°44'50" W.)

Within a 4.3-mile radius of the Bert Mooney Airport; and within 1.8 miles each side of the Coppertown VORTAC 115° radial extending from the 4.3-mile radius to the VORTAC, and within 2.7 miles each side of

the 316° bearing from the airport extending from the 4.3-mile radius to 11.4 miles northwest of the airport.

BILLING CODE 4910–13–M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Parts 219 and 294

RIN 0596–AB85

National Forest System Land and Resource Management Planning; Special Areas; Roadless Area Conservation

AGENCY: Forest Service, USDA.

ACTION: Advance notice of proposed rulemaking; request for comment.

SUMMARY: On May 4, the Secretary of Agriculture expressed the Administration's commitment to providing protection of roadless areas in the National Forest System. However, acknowledging concerns raised by local communities, tribes, and States impacted by the roadless area conservation rule published January 12, 2001, the Secretary also indicated that USDA would move forward with a responsible and balanced approach to re-examining the rule that fairly addressed those concerns.

This advance notice is intended to give the public the opportunity to comment on key issues that have been raised regarding the protection of roadless areas. These comments will help the Department determine the next steps in addressing the long-term protection and management of roadless values within the National Forest System.

DATES: Comments must be received in writing by September 10, 2001.

ADDRESSES: Send comments in writing by mail to USDA-Forest Service—CAT, Attention: Roadless ANPR Comments, P.O. Box 221090, Salt Lake City, Utah, 84122; via electronic mail to roadless_anpr@fs.fed.us; or via facsimile to 1–801–296–4090, Attention: Roadless ANPR Comments. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying at Salt Lake City, Utah.

FOR FURTHER INFORMATION CONTACT: Jody Sutton at telephone number, 801–517–1023.

SUPPLEMENTARY INFORMATION: The Department is seeking public comment to help decide the next steps in providing long-term protection of roadless values.

On January 12, 2001, the Department issued a final rule accompanied by a final environmental impact statement (Forest Service Roadless Area Conservation, USDA Forest Service, November 2000) and Record of Decision (published as part of the final rule, 36 CFR Part 294, Special Areas; Roadless Area Conservation, on January 12, 2001 at 66 FR 3244). This rule changed the land management on 58.5 million acres of inventoried roadless areas in 120 national forests. Originally scheduled to take effect on March 12, the Secretary of Agriculture extended the effective date until May 12, 2001, to permit the new Administration to review the rule.

Previously, the long-standing process employed by the Forest Service for all resource management decisions relied on amendments and revisions to forest plans governed by the National Forest Management Act. This is a highly collaborative process involving local, regional, and national interests, using the best available forest-level information and maps.

Following publication of the final rule, a number of States, tribes, organizations, and citizens have raised a number of concerns. Many assert that the most appropriate process for evaluating and making long-term resource management direction—including inventoried roadless area protection and management—is through the local forest planning process, which is governed by the rules at 36 CFR 219. They also maintain that environmental analysis and resource management decisions affecting individual national forests should be based on local information and knowledge and the best available science rather than applying one standard uniformly to every inventoried roadless area, no matter the location.

The Department recognizes that inventoried roadless areas contain important environmental values that warrant protection. Appropriate protection and management should be crafted through an open and fair process and address the concerns of States, tribes, local communities, and others.

On May 4, 2001, the Secretary of Agriculture presented five principles on which the protection and management of roadless values should be based:

1. *Informed decisionmaking*, using reliable information and accurate

mapping, and drawing on local expertise and experience through the local forest planning process;

2. *Working together*, by collaborating with States, tribes, local governments, organizations, and individuals through a fair and open process that is responsive to local input and information;

3. *Protecting forests* from the negative effects of severe wildfire and insect and disease outbreaks;

4. *Protecting communities, homes, and property* from the risk of severe wildfire or other risks existing on adjacent federal lands; and

5. *Protecting access to property*, by ensuring that States, tribes, and citizens owning property within inventoried roadless areas have access to that property as required by existing laws.

Eight lawsuits, involving seven states in six judicial districts of four federal circuits have been filed against the January 12, 2001, rule. Among the various issues raised these lawsuits share a common allegation that there was inadequate opportunity for public review and comment on the roadless rule.

On May 10, 2001, the Idaho District Court granted the preliminary injunction requested in *Kootenai Tribe of Idaho v. Veneman and State of Idaho v. U.S. Forest Service*, enjoining the Forest Service from implementing "all aspects of the Roadless Area Conservation Rule" as well as a section of the November 2000, forest planning rule that addresses the inventory and evaluation of roadless areas during the forest plan revision. The Court based its decision, in part, on concerns noted in its April 5, 2001, order related to the public review and comment 3 process; namely that, " * * * the Court conclusively finds that the comment period was grossly inadequate and thus deprived the public of any meaningful dialogue or input in to the process * * *." The Idaho District Court's decision to grant a preliminary injunction has been appealed and is now pending before the Ninth Circuit Court of Appeals.

On June 7, 2001, the Chief of the Forest Service issued a letter concerning interim protection of inventoried roadless areas, stating that "the Forest Service is committed to protecting and managing roadless areas as an important component of the National Forest System. The best way to achieve this objective is to ensure that we protect and sustain roadless values until they can be appropriately considered through forest planning." As part of that letter, the Chief indicated he would be issuing interim direction regarding timber harvest and road construction in

inventoried roadless areas until a forest plan amendment or revision considers the long-term protection and management of unroaded portions of inventoried roadless areas.

The Forest Service has been evaluating roadless areas for nearly 30 years. Decisions about how to manage inventoried roadless areas have been difficult and controversial. In 1972, the Forest Service began a review of National Forest System roadless areas (the Roadless Area Review and Evaluation, subsequently called RARE I) to determine their suitability for inclusion in the National Wilderness Preservation System. A second review for wilderness consideration of roadless areas at the national scale was initiated in 1978 (RARE II). Upon review of the RARE II process, the Ninth Circuit Court of Appeals ruled in *California v. Block* 690 F. 2d. 753 (9th Cir. 1982) that the national evaluation of roadless area categorization was insufficiently site-specific and did not consider a sufficient range of alternatives.

Similarly, with respect to the January 12, 2001, rule, it is difficult, and perhaps infeasible to collect in a short timeframe, on a national scale, the local data needed to produce a sufficient EIS that analyzes all relevant information or that proposes an adequate range of alternatives. Moreover, within an extended timeframe, collecting and analyzing the information may unnecessarily duplicate the forest planning process.

The National Forest System is comprised of 192 million acres, which is 8.5 percent of the total land base of the United States. Within the National Forest System, there are currently 34.7 million acres of Wilderness, 58.5 million acres of inventoried roadless area, and 4.2 million acres of areas in Congressional designations other than Wilderness that are not included in the inventoried roadless areas, such as Wild and Scenic Rivers or National Recreation Areas. The remaining 94.9 million acres includes roaded and other non-inventoried unroaded areas. The January 12, 2001, roadless rule applies only to the inventoried roadless areas, as described in Volume 2 of the FEIS (maps). All of the 58.5 million acres of inventoried roadless areas were considered for their potential as wilderness during the RARE II process. For a variety of reasons, most were not recommended for designation as Wilderness. For instance, other areas in comparison had greater wilderness values or more public support, or other resource potentials were believed to outweigh the area's contribution to the national wilderness system. Most of

these areas still retain their natural characteristics and vary in importance for primitive types of recreation, pristine scenic quality, important fish and wildlife habitats, contributions to biological diversity, watershed protection, other natural values, and, in some cases, resource development options.

Approximately 2.8 million acres (4.8 percent) of inventoried roadless areas have undergone resource development in the form of road construction, timber harvest, mining, or recreational development during the last 30 years. Of the total inventoried roadless area acreage, current forest plans assign 24.2 million acres to roadless or non-development management prescriptions and 34.3 million acres are in prescriptions that allow road construction. In the latter category, there are about 9 million acres of productive timberland, and about 25 million acres are not suitable for timber production.

The Forest Service Roadless Area Conservation Final Environmental Impact Statement (USDA Forest Service, November 2000, pages 2–25) estimated that less than two-tenths of one percent of the total of inventoried roadless areas (94,600 acres of 58.5 million acres) might be developed between 2000 and 2004.

How Should Roadless Areas Be Managed?

The Department is studying whether to amend the Roadless Area Conservation rule published January 12, 2001, or to provide further administrative protections. This is consistent with the Idaho Court finding that: "[b]y issuing the Preliminary Injunction the Court is not precluding or even proposing that the USDA not go forward with their study concerning the proposed amendments because the ultimate responsibility lies with the Government or its agencies and not with the Court."

All interested parties are encouraged to express their views on inventoried roadless area management. In providing input, reviewers are especially asked to include responses to the following questions, which are framed around the key principles established by the Secretary and the issues raised by States, tribes, organizations, and individuals.

1. *Informed Decisionmaking*. What is the appropriate role of local forest planning as required by NFMA in evaluating protection and management of inventoried roadless areas?

2. *Working Together*. What is the best way for the Forest Service to work with the variety of States, tribes, local

communities, other organizations, and individuals in a collaborative manner to ensure that concerns about roadless values are heard and addressed through a fair and open process?

3. *Protecting Forests.* How should inventoried roadless areas be managed to provide for healthy forests, including protection from severe wildfires and the buildup of hazardous fuels as well as to provide for the detection and prevention of insect and disease outbreaks?

4. *Protecting Communities, Homes, and Property.* How should communities and private property near inventoried roadless areas be protected from the risks associated with natural events, such as major wildfires that may occur on adjacent federal lands?

5. *Protecting Access to Property.* What is the best way to implement the laws that ensure States, tribes, organizations, and private citizens have reasonable access to property they own within inventoried roadless areas?

6. *Describing Values.* What are the characteristics, environmental values, social and economic considerations, and other factors the Forest Service should consider as it evaluates inventoried roadless areas?

7. *Describing Activities.* Are there specific activities that should be expressly prohibited or expressly allowed for inventoried roadless areas through Forest Plan revisions or amendments?

8. *Designating Areas.* Should inventoried roadless areas selected for future roadless protection through the local forest plan revision process be proposed to Congress for wilderness designation, or should they be maintained under a specific designation for roadless area management under the forest plan?

9. *Competing Values and Limited Resources.* How can the Forest Service work effectively with individuals and groups with strongly competing views, values, and beliefs in evaluating and managing public lands and resources, recognizing that the agency can not meet all of the desires of all of the parties?

10. *Other Concerns.* What other concerns, comments, or interests relating to the protection and management of inventoried roadless areas are important?

Regulatory Findings

This advance notice of proposed rulemaking is being issued to obtain public comment regarding the protection and management of inventoried roadless areas. Because the Department is not proposing any specific approach for managing

inventoried roadless areas, there are no regulatory findings associated with this notice. Comments received will help the Department determine the extent and scope of any future rulemaking.

Conclusion

The Department of Agriculture is considering how to best proceed with long-term protection and management of inventoried roadless areas. Through this advance notice of proposed rulemaking, the Department is seeking public input as responses to a series of questions about inventoried roadless area protection and management. Public input and comment on management of inventoried roadless areas and their values will help inform the Department's consideration of how best to proceed with long-term protection and management of these areas. How the Department ultimately addresses protecting roadless values will depend on a number of factors. These include court decisions, public comments, and practical options for amending the current rule or EIS or both, using other administrative tools to implement inventoried roadless area protections.

Dated: July 3, 2001.

Dale N. Bosworth,
Chief.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[TX 28-1-7382b; FRL-7008-2]

Approval and Promulgation of Implementation Plans; Texas; Houston/Galveston Ozone Nonattainment Area Vehicle Miles Traveled Offset Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This action proposes to approve the Houston/Galveston Ozone Nonattainment Area (HGA) Vehicle Miles Traveled (VMT) Offset State Implementation Plan (SIP) revision submitted by the Governor of Texas on August 25, 1997 and the revision submitted on May 17, 2000. In the "Rules and Regulations" section of this **Federal Register**, EPA is approving the State's SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. The rationale for the

approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and it will not take effect, and all public comments received during the 30-day comment period set forth below will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

DATES: Comments must be received in writing by August 9, 2001.

ADDRESSES: Written comments on this action should be addressed to Thomas H. Diggs, Chief, Air Planning Section (6PD-L), at the EPA Region 6 office listed below. Copies of documents relevant to this action are available for inspection during normal business hours at the following locations. Anyone wanting to examine these documents should make an appointment with the appropriate office at least two working days in advance.

Environmental Protection Agency,
Region 6, Air Planning Section (6PD-L),
1445 Ross Avenue, Dallas, Texas 75202-2733.

Texas Natural Resource Conservation Commission, Office of Air Quality,
12124 Park 35 Circle, Austin, Texas 78753.

FOR FURTHER INFORMATION CONTACT: Ms. Brooke M. Ivener, Air Planning Section (6PD-L), EPA Region 6, telephone (214) 665-7362.

SUPPLEMENTARY INFORMATION: This document concerns the HGA VMT Offset SIP. For additional information, see the direct final rule which is published in the "Rules and Regulations" section of this **Federal Register**.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: June 13, 2001.

Jerry Clifford,

Acting Regional Administrator, Region 6.
