Petition for Waiver of E911 Phase II Rules; Comments Invited

AGENCY: Federal Communications Commission.

ACTION: Solicitation of comments.

SUMMARY: The document invites comment on a Petition for Waiver

(Petition) of the Commission's E911 Phase II rule filed July 6, 2001, by Cingular Wireless LLC (Cingular). Current Phase II rules require wireless carriers to begin to deploy the capability to identify the precise location of wireless 911 calls beginning on October 1, 2001, provided that certain conditions are met. This capability is called Phase II Automatic Location Identification (ALI). The Phase II rules establish deployment schedules and set accuracy and reliability requirements for both handset-based and network-based ALI technologies.

Cingular requested a waiver of Phase II rules to permit it to deploy a hybrid network and handset-base technology called Enhanced Observed Time Difference of Arrival (E-OTD) throughout its Global System for Mobile Communications (GSM) air interface network and a switch-based technology, similar to Mobile-Assisted Network Location System for its Time Division Multiple Access network.

FEDERAL COMMUNICATIONS COMMISSION

[CC Docket No. 94-102; DA 01-1650]

Petition for Waiver of E911 Phase II Rules; Comments Invited

AGENCY: Federal Communications Commission.

ACTION: Solicitation of comments.

SUMMARY: The document invites comment on a Petition for Waiver (Petition) of the Commission's E911 Phase II rules, filed June 22, 2001, by Corr Wireless Communications, LLC (Corr). Current Phase II rules require wireless carriers to provide the precise location of wireless 911 calls to Public Safety Answering Points (PSAPs), a technological capability known as Automatic Location Identification (ALI). The rules permit wireless carriers to "phase-in" either a network-based or handset-based ALI technology. Handset-based solutions may be gradually phased in beginning October 1, 2001. Carriers employing network solutions are required to provide Phase II service to 50 percent of the PSAP's coverage area or population on October 1, 2001, or within six months of a PSAP request, whichever is later, and 100 percent of the PSAP's coverage area or population within a year thereafter.

Corr requested a temporary waiver of the Commission's Phase II rules to permit the carrier to deploy its network solution in conformity with its proposed graduated implementation schedule. Corr indicates that the Commission's six-month implementation deadline applicable to network-based solutions has been triggered by recent PSAP requests in its service area. According to Corr, the network solution is prohibitively expensive and a graduated

implementation schedule is warranted to ease the economic burden on the carrier. Under Corr's proposed schedule, it will immediately order and install the switch-related infrastructure necessary to provide Phase II service. Thereafter, Corr proposes to provide service to the top 35 percent (measured by 911 service) of the cell sites of any requesting jurisdiction within 9 months of receiving a request, and 50 percent and 75 percent of cell sites within 12 months and 18 months, respectively.
