

of Natural Resources and Conservation Interdisciplinary Team (IDT) have preliminarily identified two potential issues to consider in the environmental analysis. These issues have been identified due to the possibility that the existing environmental conditions may change as a result of the proposed activities. The potential issues include long-term surface and groundwater quality and long-term surface and groundwater quantity. Aspects related to these issues that likely will be considered in the analysis are: operation and maintenance of the long-term water management system; effectiveness of long-term water treatment; management and monitoring systems (including LAD) to avoid violations of water quality standards; modifications to existing Montana Pollution Discharge Elimination Systems (MPDES) at the Nye and East Boulder sites; long-term discharge from tailings impoundment under drains and from tailing impoundment caps; length of required long-term treatment to meet water quality standards; maintenance of water system pipelines at the Hertzler and Boe Ranch sites; and, effects (e.g., shorter mine life, employment level changes, Hard Rock Impact Plan amendment, and impoundment Stages 2 thru 5 construction schedule) of lifting the production cap at the East Boulder site.

Preliminary Alternatives

- No Action
- Proposed Action
- An alternative to the Boe Ranch proposal would be use of the permitted proposals for water treatment entirely on the Gallatin National Forest as originally planned and leaving the production cap at 2,000 tons of ore per day.
- Proposed Action with Appropriate Mitigation

EIS Availability

The draft environmental impact statement (DEIS) is expected to be available for public review by mid-February 2002. After a 45-day public comment period, the comments received will be analyzed and considered by the Forest Service and Montana Department of Environmental Quality and Montana Department of Natural Resources and Conservation during the preparation of the final environmental impact statement (FEIS). The FEIS is scheduled to be completed by the end of May 2002. The regulatory agencies will respond to the comments received in the FEIS. The Custer National Forest Supervisor, the Gallatin National Forest Supervisor, and the Directors of the Montana Department of

Environmental Quality and the Montana Department of Natural Resources and Conservation are the responsible officials for the EIS and will make decisions regarding this proposal considering the comments and responses, environmental consequences discussed in the DEIS, and applicable laws, regulations, and policies. The decision and reasons for the decision will be documented in a Record of Decision.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the Federal Register.

The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, commenters and reviewers of environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agencies to the reviewers' positions and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *Wisconsin Heritages, Inc. v. Harris*, 490 F.Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the national Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

DEPARTMENT OF AGRICULTURE

Natural Resources Conservation Service

Humble Canal Project (ME-11), Cameron Parish, LA

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Pursuant to section 102 (2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Regulations (40 CFR part 1500); and the Natural Resources Conservation Service Regulations (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Humble Canal Project (ME-11), Cameron Parish, Louisiana.

FOR FURTHER INFORMATION CONTACT:

Donald W. Gohmert, State Conservationist, Natural Resources Conservation Service, 3737 Government Street, Alexandria, Louisiana 71302, telephone (318) 473-7751.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Donald W. Gohmert, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed on this project.

The primary goal is to promote hydrologic benefits by allowing water to flow out of the system without subjecting the fresh marshes to damaging outside salinity. Interior areas that have converted to shallow open water will be given the opportunity to revegetate by attempting to lower excessive water levels within the project. Protection from salinities will continue to permit the growth of aquatic vegetation. The planned works of improvement include installing five 48-inch water control structures with variable-crest weir inlets and flapgated

outlets and an 18-inch marine organism ingress structure with a screwgate.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

Dated: July 20, 2001.

Donald W. Gohmert,
State Conservationist.
