SUPPLEMENTARY INFORMATION: The subject permits and permit amendment are requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226), and the Fur Seal Act of 1966, as amended (16 U.S.C. 1151 *et seq.*)

Applications for Permits Received

For Application No. 42-1642, the applicant requests permission to study metabolic clearance rates of vitamins A and E using isotope tracers and vitamin analogs in captive Steller sea lions, relation to various life history stages, establish the vitamin A and E status of free-ranging Steller sea lions, determine the metabolic requirements for these vitamins by relating intake to blood levels in captive specimens, and receive or import serum and milk samples from captive marine mammals held in facilities within the United States and abroad to study the disease hemochromatosis (an excessive accumulation of iron in tissues often associated with hepatic lesions) as well as others associated with general marine mammal health.

For Application No. 555-1638, the applicant requests permission to conduct research on 22 cetacean species and 5 pinniped species in the North Pacific Ocean along the coasts of California, Oregon, Washington, and Alaska (below the Aleutian Islands) in order to study the following: distribution and abundance related to environmental factors; prey and foraging behaviors; health and stock structure of individuals; effects of anthropogenic factors (i.e., vessel noise) on acoustic signals; and movements of individuals or pods during migrations or within their home range. This research will be accomplished using aerial and shipboard line-transect survey methods, monitoring of radio-tagged individuals, recording behavior and vocalizations, collecting biopsy samples from cetaceans, and collecting blood and morphometric measurements from small cetaceans and pinnipeds.

For Application No. 782-1645, the applicant requests permission to capture and attach radio-telemetry devices to harbor porpoises (*Phocoena phocoena*) off the coasts of Oregon and Washington to monitor the movements of tagged animals relative to current stock boundaries, and to collect blubber biopsies to determine organochlorine contaminant burdens.

Application to Amend a Permit Received

For Permit No. 376-1520-01, the Permit authorizes the Holder to approach a variety of cetacean species to conduct photo-identification and behavioral observations. The approach distances in the permit are currently limited to : within 100 ft (31 m) by vessel, 200 ft (61 m) directly above and 350 ft (107 m) slant range by aircraft for all species except North Atlantic right whales (*Eubalaena glacialis*), and within 700 ft (213 m) directly above and at slant range in fixed- and rotary-winged aircraft, and 500 ft (152 m) directly above and 350 ft (107 m) slant range using an aerostat (blimp) for right whales. The holder now requests permission to approach North Atlantic right whales within 100 ft (31 m) in a variety of small vessels, including kayaks, for the purpose of photo-identification.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

SUPPLEMENTARY INFORMATION:

I. Availability of Funds

The estimated amount of funds available for the award under this competition is based on the history of conducting the program for a one-year period; and the actual level of funding, if any, is contingent on the availability of appropriations.

II. Background

The Corporation is a federal government corporation that encourages Americans of all ages and backgrounds to engage in school-, college-, and community-based service. This service addresses the nation's educational, public safety, environmental, and other human needs. The Corporation funds K-12 service-learning programs that provide opportunities for students to become engaged citizens through active participation in thoughtfully organized service that is conducted in and meets the needs of a community and is integrated into academic and/or vocational curriculum.

The purpose of the National Service-Learning Leader Schools program is to encourage the development of service-learning programs at middle and high schools by recognizing high quality, broad-based service-learning programs in schools. The program is national in scope and involves practitioners in schools as well as service-learning personnel in State Education Agencies and other state and national education and service organizations.

The Corporation will enter into a cooperative agreement with the successful applicant who will work with representatives of the Corporation to administer the program, including working with existing Leader Schools, and other experts in education to revise a set of criteria to be used in selecting Leader Schools. These criteria include evidence that the school has (1) integrated community service into the academic and/or vocational curriculum, (2) conducted community service that is coordinated with the community and that meets identified needs of the community, (3) integrated service-learning into the culture and climate of the school, (4) developed activities that foster civic responsibility and student leadership, (5) provided structured time for students and teachers to reflect on the service experience, and (6) assessed the impact on service-learning on student learning, behavior, attendance, teaching methods, and/or the community.

III. Eligibility

Public agencies, non-profit organizations, institutions of higher education, Indian tribes, and for-profit companies are eligible to apply. Pursuant to the Lobbying Disclosure Act of 1995, 2 U.S.C. 1611, an organization described in section 501(c)(4) of the Internal Revenue Code of 1986, 26 U.S.C. 501(c)(4), that engages in lobbying activities is not eligible to apply.

If the Corporation approves an application and enters into a multi-year award agreement, at the outset it will provide funding only for the first year of the award period as funds are made available by Congress. The Corporation has no obligation to provide additional funding in subsequent years. Funding for the second and third years of an award period also is contingent upon satisfactory performance, the availability of funds, and any other criteria established in the award agreement.

(d) Use of Materials

To ensure that materials generated with Corporation funding for the technical and administrative support for this program are available to the public and readily accessible to the field, the Corporation reserves a royalty-free, non-exclusive, and irrevocable right to obtain, use, reproduce, publish, or disseminate publications and materials produced under this agreement, including data, and to authorize others to do so.
