

Tax-exempt (Dyed) Highway Diesel Fuel; Requirements for Transferors and Transferees, EPA ICR No. 1718.03, OMB Control No. 2060-0308, expiring July 31, 2001. This is a request for extension of a currently approved collection.

Abstract: Diesel fuel for use in motor vehicles, also known as highway diesel fuel, is subject to compositional restrictions, per 40 CFR part 80, in order to reduce emissions. Diesel fuel not intended for use in motor vehicles, also known as off-road diesel fuel, has no such restrictions. It is required to be dyed red in order to distinguish it from highway diesel fuel, and thus deter its use in motor vehicles. The Internal Revenue Service requires that highway diesel fuel which is tax-exempt contain the same red dye in order to distinguish it from taxed highway diesel fuel, and thus deter its use in vehicles which do not qualify for tax-exempt fuel. In order to distinguish off-road diesel fuel from tax-exempt highway diesel fuel, the product transfer document (PTD) for tax-exempt highway diesel fuel must indicate that the diesel fuel meets the requirements for highway diesel fuel. Typically, a code is used on the PTD to so indicate. The PTD is a necessary document produced in the normal course of business for reasons other than this requirement. The computers which generate the PTDs were programmed in 1993 to display the code for tax-exempt highway diesel fuel. Thus, there is only a very small burden because the display of the code is automatic. Transferors and transferees of tax-exempt highway diesel fuel are required to retain the PTDs for five years, which is a customary business practice. See 40 CFR 80.29(c). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on March 19, 2001 (66 FR 15422). No comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average two seconds per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes

of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Transferors and transferees of tax-exempt (dyed) highway diesel fuel.

Estimated Number of Respondents: 20,000.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 222 hours.

Estimated Total Annualized Capital, O&M Cost Burden: 0.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the addresses listed above. Please refer to EPA ICR Number 1718.03 and OMB Control Number 2060-0308 in any correspondence.

Dated: July 25, 2001.

Oscar Morales,

Director, Collection Strategies Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-7022-8]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; National Emission Standards for Hazardous Air Pollutants (NESHAP) for Beryllium

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: National Emission Standards for Hazardous Air Pollutants (NESHAP) for Beryllium, 40 CFR Part 61, Subpart C; OMB Control Number 2060-0092; EPA ICR Number 0193.07; expiration date is September 30, 2001. The ICR describes the nature of the information collection and its expected burden and

cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before September 5, 2001.

ADDRESSES: Send comments, referencing EPA ICR Number 0193.07, and OMB Control Number 2060-0092, to the following addresses: Sandy Farmer, U.S. Environmental Protection Agency, Collection Strategies Division (Mail Code 2822), 1200 Pennsylvania Avenue, NW, Washington, DC 20460-0001; and to the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: For a copy of the ICR contact Sandy Farmer at EPA by phone at (202) 260-2740, by email at farmer.sandy@epamail.epa.gov, or download off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR Number 0193.07. For technical questions about the ICR contact Maria Malavé at (202) 564-7027 or via E-mail to Malave.Maria@EPAMAIL.EPA.Gov.

SUPPLEMENTARY INFORMATION:

Title: National Emission Standards for Hazardous Air Pollutants (NESHAP) for Beryllium, 40 CFR Part 61, Subpart C; OMB Control Number 2060-0092; EPA ICR Number 0193.07. This is a request for an extension of a currently approved collection.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Beryllium were proposed on December 7, 1971 (36 FR 23939) and promulgated on April 6, 1973 (38 FR 8826). This standard applies to all extraction plants, ceramic plants, foundries, incinerators, and propellant plants which process beryllium ore, beryllium, beryllium oxide, beryllium alloys, or beryllium-containing waste. The standard also applies to machine shops which process beryllium, beryllium oxides, or any alloy when such alloy contains more than five percent beryllium by weight. All sources known to have caused, or to have the potential to cause, dangerous levels of beryllium in the ambient air are covered by the Beryllium NESHAP. This information is being collected to assure compliance with 40 CFR part 61, subpart C.

There are approximately 236 existing sources subject to this rule. Of the total number of existing sources, we have assumed that approximately 10 sources (i.e., respondents) have elected to comply with an alternative ambient air quality limit by operating a continuous monitor in the vicinity of the affected

facility. The monitoring requirements for these facilities provide information on ambient air quality and ensure that locally, the airborne beryllium concentration does not exceed 0.01 micrograms/m³. These sources meeting the rule requirements by means of ambient monitoring are required to submit a monthly report of all measured concentrations to the Administrator. The remaining 226 sources have elected to comply with the rule by conducting a one-time only stack test to determine beryllium emission levels. We have assumed that 10 percent of the 226 sources (or 23 respondents) complying with the emission limit standard will engage in an operational change at their facilities that could potentially increase beryllium emissions, and would be required to repeat the stack test to determine the beryllium emission limits. Consequently these sources will have recordkeeping and reporting requirements associated with the stack test. The owners or operators subject to the provisions of this part are required to maintain a file of all measurements, and retain the file for at least two years following the date of such measurements and records. We have assumed that no additional sources are expected to become subject to the standard in the next three years. Therefore, there are 33 respondents for the purpose of determining the recordkeeping and reporting burden associated with this rule.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on February 1, 2001. No comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 13.4 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and

requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:

Business or other for profit.

Estimated Number of Respondents: 33.

Frequency of Response: monthly and as needed basis (potentially yearly), depending on the applicable requirement.

Estimated Total Annual Hour Burden: 2,232 hours.

Estimated Total Annualized Capital and Operating & Maintenance Cost Burden: \$35,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR Number 0193.07 and OMB Control Number 2060-0092 in any correspondence.

Dated: July 25, 2001.

Oscar Morales,

Director, Collection Strategies Division.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-7023-1]

Preliminary Draft Staff Paper for Particulate Matter

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of extension of comment period.

SUMMARY: On June 15, 2001, the Office of Air Quality Planning and Standards (OAQPS) of EPA announced in a **Federal Register** document (66 FR 32621) the availability for public review and comment of a preliminary draft document, Review of the National Ambient Air Quality Standards for Particulate Matter: Policy Assessment of Scientific and Technical Information (Preliminary Draft Staff Paper), and a draft EPA document entitled Particulate Matter NAAQS Risk Analysis Scoping Plan. In response to requests from several commenters, EPA is extending the comment period for the preliminary draft Staff Paper beyond the original date of July 12, 2001.

DATES: Comments on the preliminary draft Staff Paper should be submitted on or before September 28, 2001.

ADDRESSES: Comments on the preliminary draft Staff Paper should be submitted to Dr. Mary Ross, Office of Air Quality Planning and Standards (MD-15), U.S. Environmental Protection Agency, Research Triangle Park, NC 27711; e-mail: ross.mary@epa.gov; telephone: (919) 541-5170; fax: (919) 541-0237.

Availability of Related Information

Single copies of the preliminary draft Staff Paper may be obtained without charge by contacting Mary Ross at the address or telephone number listed above. Please include name, address, telephone number, e-mail if available, and delivery preference (mail or e-mail delivery).

Electronic Availability

The preliminary draft Staff Paper can also be obtained online at the Agency's OAQPS Technology Transfer Network (TTN) under the technical area of Office of Air and Radiation Policy and Guidance (OAR P&G) at the following internet web site: <http://www.epa.gov/ttn/oarpg/ramain.html>. If assistance is needed in accessing the system, call the help desk at (919) 541-5384 in Research Triangle Park, NC.

FOR FURTHER INFORMATION CONTACT: Dr. Mary Ross at the address and telephone number given above.

SUPPLEMENTARY INFORMATION: The purpose of the Staff Paper is to evaluate the policy implications of the key scientific and technical information contained in a related document, Air Quality Criteria for Particulate Matter (Criteria Document), required under sections 108 and 109 of the Clean Air Act (CAA) for use in the periodic review of the national ambient air quality standards (NAAQS) for particulate matter (PM). This preliminary draft Staff Paper includes preliminary assessments of the scientific and technical information contained in the second external review draft of the Criteria Document (66 FR 18929, April 12, 2001) and discusses proposed analyses to be conducted for inclusion in a subsequent draft Staff Paper. Staff conclusions and recommendations on the PM NAAQS are not included in this preliminary draft but will be included in a subsequent draft to be made available for further review and comment as indicated below.

The preliminary draft Staff Paper and draft Risk Analysis Scoping Plan (along with the second external review draft of the Criteria Document) are being reviewed at a public meeting of the Clean Air Scientific Advisory Committee (CASAC) of EPA's Science
