II. What Action is the Agency Taking

This notice announces receipt by the Agency of requests from Syngenta Crop Protection, Inc., and Gustafson LLC to cancel three pesticide products registered under section 3 of FIFRA. These registrations are listed in Table 1.

A. Background Information

Oxadixyl is a systemic fungicide for seed treatment, which is registered for use on alfalfa, barley, beans, beets (garden), broccoli, Brussels sprouts, buckwheat, cabbage, carrot (including tops), cauliflower, celery, clover, collards, corn (field corn, pop corn, sweet corn), cotton, cucumber, eggplant, gourds, grass forage/fodder/hay, kale, kohlrabi, lespedeza, lettuce, lupine, melons (water melons, cantaloupe), millet (proso- broomcorn), mustard, oats, parsley, parsnip, peas, pepper (chili type), pimento, pumpkin, radish, rape, rhubarb, rutabaga, rye, sorghum, soybeans, spinach, squash (summer, winter), sugar beet, sunflower, tomato, trefoil, triticale, turnip, vetch, golf course turf, and residential lawns.

On April 23, 2001, and on May 11, 2001, the Agency received letters from

Gustafson LLC (end-use product registrant) and Syngenta Crop Protection, Inc. (technical and end-use product registrant), respectively, requesting voluntary cancellation of all their products containing oxadixyl. Over the years, the market for these products has declined.

In their June 1, 2001 letter, Syngenta stated that the last known production of oxadixyl was prior to January 1, 1997, from which time no sales of the products have occurred. Syngenta is not aware of any stocks of the products in the channels of trade. Likewise, in their June 1, 2001, letter, Gustafson noted that the last date of manufacture was January 6, 1993, and the last remaining product which they had on hand was disposed of on April 4, 2001.

B. Requests for Voluntary Cancellation

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary termination of any minor agricultural use before granting the request, unless: (1) The registrants request a waiver of the comment period, or (2) the Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment. The registrants have requested that EPA waive the 180-day comment period. EPA is granting the registrants' request to waive the 180-day comment period. EPA anticipates granting the cancellation request shortly after the end of the 30-day comment period for this notice. Therefore, EPA will provide a 30-day comment period on the proposed requests. The registrations for which cancellations were requested are identified (below) in Table 1.

TABLE 1.—REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION

Company	Registration No.	Product
Syngenta Crop Protection, Inc.	100-857	Oxadixyl Technical Fungicide

TABLE 1.—REGISTRATIONS WITH PENDING REQUESTS FOR CANCELLATION—Continued

Company	Registration No.	Product
Syngenta Crop Protection, Inc.	100-858	Sandofan 31F Fungicide
Gustafson LLC	7501-97	Anchor Flowable Fungicide

III. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled. FIFRA section 6(f)(1) further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**, make reasonable efforts to inform persons who rely on the pesticide for minor agricultural uses, and provide a 30-day period in which the public may comment. Thereafter, the Administrator may approve such a request.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the product(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling. The withdrawal request must also include a commitment to pay any reregistration fees due, and to fulfill any applicable unsatisfied data requirements.

V. Provisions for Disposition of Existing Stocks

The effective date of cancellation will be the date of the cancellation order. The orders effecting these requested cancellations will generally permit a registrant to sell or distribute existing stocks for 1 year after the date the cancellation request was received. This policy is in accordance with the Agency's statement of policy as prescribed in the **Federal Register** of June 26, 1991 (56 FR 29362) (FRL-3846-4). Exceptions to this general rule

will be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold, or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product. Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

VI. Future Tolerance Revocations.

EPA anticipates drafting a future **Federal Register** notice proposing revocation of tolerances on commodities, which no longer have registered uses of oxadixyl. With this present proposal, EPA seeks comment as to whether any individuals or groups want to support continuation of these tolerances.
