SUMMARY: This document proposes to establish Class E airspace at Angel Fire Airport, Angel Fire, NM. The development of an area navigation (RNAV) global positioning system (GPS) standard instrument approach procedure (SIAP), to Angel Fire Airport,

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to establish Class E airspace at Angel Fire Airport, Angel Fire, NM. The development of a RNAV GPS SIAP to Angel Fire Airport, Angel Fire, NM, has made this rule necessary. The intended effect of this proposal is to provide adequate controlled airspace for aircraft operating in the vicinity of Angel Fire Airport, Angel Fire, NM.

The coordinates for this airspace docket are based on North American Datum 83. Designated Class E airspace areas are published in Paragraph 6005 of FAA Order 7400.9H, *Airspace Designations and Reporting Points*, dated September 1, 2000, and effective September 16, 2000, which is incorporated by reference in 14 CFR § 71.1. The Class E airspace designation listed in this document would be published subsequently in the order.

Further, the FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule will not have a significant economic impact

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
