The guidance is intended for project planners, managers and laboratory personnel. The MARLAP, when finalized, will be a multi-agency consensus document. The agencies are seeking public comment in order to receive feedback from the widest range of interested parties and to ensure that all information relevant to developing the document is received. The agencies will review public comments received on the draft MARLAP as well as comments from a concurrent, independent, scientific peer review.

Suggested changes will be incorporated, where appropriate, in response to those comments.

**DATES:** Comments received by December 15, 2001 will be considered. Comments received after that date will be considered if it is practical to do so, but no assurance can be given for consideration of late comments.

**ADDRESSES:** Members of the public are invited and encouraged to submit comments to the following website <http://www.eml.doe.gov/marlap/>. **SUPPLEMENTARY INFORMATION:** The MARLAP provides guidance for the planning, implementation and assessment phases of those projects which require the laboratory analysis of radionuclides. This guidance is intended for project planners, managers and laboratory personnel. The manual's basic goal is to provide guidance to ensure that radioanalytical laboratory data will meet a project's or program's data requirements and needs. The document uses a performance-based approach and will support a wide range of data collection activities including site characterization and cleanup;

compliance demonstration; decommissioning of nuclear facilities; remedial and removal actions; environmental monitoring; and waste management activities. The MARLAP, when finalized, will be a multi-agency consensus document. MARLAP was developed collaboratively over the past five years by the technical staffs of seven Federal agencies. State participation in the development of the manual involved contributions from representatives from the Commonwealth of Kentucky and the State of California. Contractors to the DOE, EPA, and NRC, and members of the public have been present during the open meetings of the MARLAP work group.

Although Federal agency personnel are involved in the preparation of this document, the manual does not represent the official position of any participating agency at this time. An earlier draft of the document has been reviewed within the Federal agencies. The public review is a necessary step in the development of a final multi-agency consensus document. The document will also receive formal technical peer review. The draft has not been approved by the participating agencies for use in part or in whole and should not be used, cited, or quoted except for the purposes of providing comments as requested. In addition to providing comments on individual chapters and appendices, reviewers are also requested to address the following questions listed below while reviewing the MARLAP manual.

(1) Is the performance-based approach used in MARLAP for the planning, implementation and assessment phases of projects technically sound and is the approach reasonable in terms of ease of implementation by project managers and laboratories? Does the approach effectively link the three phases of a project and is the guidance on quality control appropriate and supportive of a performance-based approach?

(2) Is the guidance on laboratory operations in the Part II chapters technically accurate and useful?

(3) Are the concepts covered under measurement statistics, specifically measurement uncertainty, detection and quantification capability, presented accurately and appropriately?

(4) Is the information understandable and presented in logical sequence? How can the presentation of material be modified to improve the manual?

(5) Does the MARLAP manual provide benefits that are not currently available through other approaches? What are the costs associated with implementing the guidance in MARLAP in comparison with currently available alternatives?

Commentors are encouraged to use the website listed in the **ADDRESSES** section of this notice for their review. The website has detailed instructions on how to submit comments and has several features that should aid the review process.

Written comments may also be submitted. Commentors are encouraged to submit their written comments using the same general approach described in the website, <http://www.eml.doe.gov/marlap/>. Comments should be accompanied by supporting bases, rationale, or data. To ensure efficient and complete comment resolution, commentors are requested to reference the page number and the line number of the MARLAP to which the comment applies. All comments received will be reviewed by the MARLAP Workgroup.
