SUPPLEMENTARY INFORMATION:

I. Background

The GHTF was established in 1992 as a joint regulatory/industry project to encourage convergence in regulatory practices related to ensuring the safety, effectiveness/performance and quality of medical devices; promote technological innovation; and facilitate international trade. The GHTF works to achieve these objectives by disseminating guidance documents on basic regulatory practices. These documents, which are developed by four different GHTF Study Groups, can be adopted/implemented by member national regulatory authorities. Other national regulatory authorities that are not GHTF members also are encouraged to adopt and implement GHTF guidance documents.
