DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Resource Conservation and Recovery Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a proposed consent decree in *United States v. R&R Distributing Company, Inc.*, No. 1-00-0109 (M.D. Tenn.) was lodged on August 17, 2001, with the United States District Court for the Middle District of Tennessee. The consent decree settles claims for civil penalties and injunctive relief against R&R Distributing Company, Inc. for violations of Section 9006 of the Resource Conservation and Recovery Act ("RCRA"), as amended, 42 U.S.C. 6991e, the Federal requirements and standards relating to petroleum underground storage tanks ("UST") promulgated pursuant to section 9003 of RCRA, 42 U.S.C. 6991b, and found at 40 CFR part 280, and the requirements and standards of the State of Tennessee's UST program approved by EPA pursuant to section 9004 of RCRA, 42 U.S.C. 6991c, effective January 19, 1999. The State of Tennessee joined the case as a co-plaintiff and is participating in the settlement. Under the proposed consent decree R&R Distributing Company, Inc. will pay a civil penalty of \$120,000 in installments over three years, plus interest at the rate applicable to judgments. The penalty will be equally divided between the United States and the State of Tennessee. Injunctive relief is not necessary because R&R has properly closed all the underground storage tanks except for those at four facilities, and has upgraded the underground storage tanks at those facilities. In addition, the State of Tennessee, as part of the settlement, will restore R&R's participation in the Underground Storage Tank Fund to achieve compliance with RCRA's financial assurance requirements for underground storage tank owners and operators.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney

General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States v. R&R Distributing Company, Inc.*, DOJ Ref.# 90-7-1-06684.

Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Freeman United Coal Mining Company

[Docket No. M-2001-081-C]

Freeman United Coal Mining Company, PO Box 4630, Springfield, Illinois 62708 has filed a petition to modify the application of 30 CFR 75.332(a)(2) (working sections and working places) to its Crown II Mine (I.D. No. 11-02236) located in Macapin County, Illinois. The petitioner proposes to use one continuous miner to clean up the working face it previously mined while the other continuous miner on the super section starts to cut and load coal from another working face on the same working section, on the same split of air. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

2. Peabody Coal Company

[Docket No. M-2001-082-C]

Peabody Coal Company, 1970 Barrett Court, PO Box 1990, Henderson, Kentucky 42420 has filed a petition to modify the application of 30 CFR 75.364(b)(2) (weekly examination) to its Camp #11 Mine (I.D. No. 15-08357) located in Union County, Kentucky. Due to hazardous rib conditions in certain areas of the return air course, traveling and examining this specific area would be unsafe. The petitioner proposes to establish evaluation points to monitor methane and oxygen concentrations immediately inby and outby portions of the specified return air course on a weekly basis. A certified person will examine the conditions of these evaluation points and record the results in a book maintained on the surface of the mine. The petitioner asserts that application of the existing standard would result in a diminution of safety to the miners and that the proposed alternative method would provide at least the same measure of protection as the existing standard.
