## DEPARTMENT OF LABOR

### Mine Safety and Health Administration

#### Proposed Information Collection Request Submitted for Public Comment and Recommendations; Notification of Legal Identity

**ACTION:** Notice.

**SUMMARY:** The Department of Labor, as  
part of its continuing effort to reduce  
paperwork and respondent burden,  
conducts a preclearance consultation  
program to provide the general public  
and Federal agencies with an  
opportunity to comment on proposed  
and/or continuing collections of  
information in accordance with the  
Paperwork Reduction Act of 1995  
(PRA95) [44 U.S.C. 3506(c)(2)(A)]. This  
program helps to ensure that requested  
data can be provided in the desired  
format, reporting burden (time and  
financial resources) is minimized,  
collection instruments are clearly  
understood, and the impact of collection  
requirements on respondents can be  
properly assessed.

**DATES:** Submit comments on or before  
November 20, 2001.

**ADDRESSES:** Send comments to Lynnette  
M. Haywood, Deputy Director,  
Administration and Management, 4015  
Wilson Boulevard, Room 611,  
Arlington, VA 22203-1984. Commenters  
are encouraged to send their comments  
on a computer disk, or via Internet E-  
mail to [1haywood@msha.gov](mailto:1haywood@msha.gov), along  
with an original printed copy. Ms.  
Haywood can be reached at (703) 235-  
1383 (voice), or (703) 235-1563  
(facsimile).

**FOR FURTHER INFORMATION CONTACT:**

#### SUPPLEMENTARY INFORMATION:

##### I. Background

Title 30 CFR part 41 has implemented  
this requirement and provides for the  
mandatory use of MSHA Form 2000-7,  
Legal Identity Report, for notifying  
MSHA of the legal identity of the mien  
operator. The legal identity for a mien  
operator is fundamental to enable the  
Secretary to properly ascertain the  
identity of persons charged with  
violations of mandatory standards. It is  
also used in the assessment of civil  
penalties which, by statute, must take

into account the size of the business, its economic viability, and its history of previous violations. Because of the rapid and frequent turnover in mining company ownership and statutory considerations regarding penalty assessment, the operator is required to file information regarding ownership interest in other mines held by the operator and relevant persons in a partnership, corporation or other organization. This information is also necessary to the Office of the Solicitor in determining proper parties to actions arising under the Federal Mine Safety and Health Act of 1977 (the Act).

## II. Desired Focus of Comments

Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments concerning the proposed extension of the information collection related to the Notification of Legal Identity. MSHA is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

A copy of the proposed information collection request may be viewed on the Internet by accessing the MSHA Home Page (<http://www.msha.gov>) and selecting "Statutory and Regulatory Information" then "Paperwork Reduction Act Submissions (<http://www.msha.gov/regspwork.htm>)", or by contacting the employee listed above in the *For Further Information Contact* section of this notice for a hard copy.

## III. Current Actions

MSHA uses the information to properly ascertain the identity of persons chargeable with violations of mandatory safety and health standards and in the assessment of civil penalties. The Office of the Solicitor uses the information to expedite service of documents upon the mine operator.

## NUCLEAR REGULATORY COMMISSION

### Agency Information Collection Activities: Submission for the Office of Management and Budget (OMB) Review; Comment Request

**AGENCY:** U.S. Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of the OMB review of information collection and solicitation of public comment.

**SUMMARY:** The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Information pertaining to the requirement to be submitted:

1. *Type of submission, new, revision, or extension:* Extension.

2. *The title of the information collection:* 10 CFR 35.32 and 35.33 "Quality Management Program and Misadministrations".

3. *The form number if applicable:* None.

4. *How often the collection is required:* For quality management program (QMP): *Reporting:* New applicants for medical use licenses, who plan to use byproduct material in limited diagnostic and therapy quantities under Part 35, must develop a written QMP and submit a copy of it to NRC. When a new modality involving therapeutic quantities of byproduct material is added to an existing license, current licensees must submit QMP modifications. This ICR burden estimate is inflated by the one-time cost for the development and submission of QMPs for approximately 2000 Agreement States licensees in the ten Agreement States who have not adopted the rule and are not required to. *Recordkeeping:* Records of written directives, administered dose or dosage, annual review, and recordable events, for 3 years.

*For Misadministrations: Reporting:* Whenever a misadministration occurs. *Recordkeeping:* Records of misadministrations for 5 years.

5. *Who is required or asked to report:* NRC Part 35 licensees who use byproduct material in limited diagnostic and therapeutic ranges and similar type of licensees regulated by Agreement States.

6. *An estimate of the number of responses:* 6300 (for both reporting and recordkeeping).

7. *The number of annual respondents:* 6300 (for both reporting and recordkeeping).

8. *The number of hours needed annually to complete the requirement or request:* 34,743 hours for applicable licensees (*Reporting:* 24,400 Hrs/yr, and *Recordkeeping:* 10,343 Hrs/yr, or an average of 5.5 hrs per licensee).

9. *An indication of whether Section 3507(d), Pub. L. 104-13 applies:* Not applicable.

10. *Abstract:* In the medical use of byproduct material, there have been instances where byproduct material was not administered as intended or was administered to a wrong individual, which resulted in unnecessary exposures or inadequate diagnostic or therapeutic procedures. The most frequent causes of these incidents were: insufficient supervision, deficient procedures, failure to follow procedures, and inattention to detail. In an effort to reduce the frequency of such events, the NRC requires licensees to implement a quality management program (§ 35.32) to provide high confidence that byproduct material or radiation from byproduct material will be administered as directed by an
