The Honorable J. Dennis Hastert
Speaker of the House of
Representatives
Washington, D.C. 20515-6501

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, we are forwarding herewith Transmittal No. 02-07, concerning the Department of the Navy's proposed Letter(s) of Offer and Acceptance (LOA) to the United Arab Emirates for defense articles and services estimated to cost \$40 million. Soon after this letter is delivered to your office, we plan to notify the news media.

Sincerely,

A handwritten signature in cursive script that reads "Tome Walters".

TOME H. WALTERS, JR.
LIEUTENANT GENERAL, USAF
DIRECTOR

- (viii) **Date Report Delivered to Congress:** 25 OCT 2001

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION**United Arab Emirates - HARPOON Missiles**

The Government of United Arab Emirates (UAE) has requested a possible sale of 12 RGM-84L HARPOON Block II missiles with containers, maintenance training and equipment, spare and repair parts, training, shipboard equipment, support and test equipment, publications, U.S. Government and contractor technical assistance and other related elements of logistics support. The estimated cost is \$40 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country which has been and continues to be an important force for political stability and economic progress in the Middle East.

The proposed sale of the RGM-84L HARPOON Block II missiles will provide the UAE with a more capable anti-surface warfare capability, thus providing a competent first line defense against hostile forces threatening United States interests in the region. The platform for these anti-ship missiles will be the two Kortenaer class frigates that the UAE obtained from the Netherlands. The UAE will have no difficulty absorbing these additional missiles into its inventory for use in the defense of its coastline and surrounding islands.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be The Boeing Company of St. Louis, Missouri. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of five to seven U.S. Government and contractor representatives to support this program for two years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 02-07

**Notice of Proposed Issuance of Letter of Offer
Pursuant to Section 36(b)(1)
of the Arms Export Control Act**

**Annex
Item No. vi**

(vi) Sensitivity of Technology:

1. The RGM-84L HARPOON Block II missile contains sensitive technology and has the following classified components, including applicable technical and equipment documentation and manuals:

- a. Radar seeker**
- b. Missile characteristics and performance data**
- c. Global Positioning System (GPS) standard positioning service improves mid-course guidance to the target area**

2. The AGM-84L HARPOON missile is a ship-launched, anti-ship, 75nm range, sea skimming, "fire and forget" missile with auto-pilot navigation and multiple waypoint capability. HARPOON Block I terminal guidance is provided by a radar seeker with a selectable attack profile. The HARPOON Block II upgrade incorporates software and hardware changes that will add an improved Anti-Surface Warfare (ASUW) capability against ships in the open ocean and in the littoral. HARPOON Block II hardware improvements includes a new Guidance Control Unit (GCU) that uses GPS aided inertial navigation. This will improve the missile's overall navigation accuracy. GPS accuracy will also give HARPOON Block II an inherent secondary role against land-based targets, making Block II useful in coastal target suppression roles. HARPOON Block II software improvements include changes to the launching system that will provide the operator with the ability to superimpose a geographic coastline on the mission-planning screen. This will allow the user to shape the search pattern of the HARPOON seeker in ASUW mode, enhancing its performance in littoral areas. The information on the HARPOON is classified Confidential.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the United Arab Emirates can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.
