

§ 73.9 World Heritage criteria.

(a) *What are the World Heritage criteria and how are they applied?* The World Heritage Committee uses the following criteria to evaluate cultural and natural properties nominated to the World Heritage List. To qualify for addition to the World Heritage List, sites must meet one or more of the criteria. For information on how to apply the criteria, you should consult their annotated text in the Operational Guidelines for the World Heritage Convention. The Operational Guidelines are published periodically by the World Heritage Centre. You may obtain copies of the World Heritage Convention, the Operational Guidelines, and other program information upon request to the Office of International Affairs of the National Park Service, 1849 C Street, NW., Room 2242, Washington, DC 20240. The World Heritage Convention and the Operational Guidelines are also posted on the World Heritage Centre's Web site at www.unesco.org/whc.

(b) *What are the cultural criteria?* The criteria for the inclusion of cultural properties in the World Heritage List should always be seen in relation to one another and should be considered in the context of the definition set out in Article 1 of the Convention. A monument, group of buildings or site—as defined in Article 1 of the Convention—which is nominated for inclusion in the World Heritage List will be considered to be of outstanding universal value for the purpose of the Convention when the Committee finds that it meets one or more of the following criteria and the test of authenticity:

(1) Each property nominated should therefore:

(i) Represent a masterpiece of human creative genius; or

(ii) Exhibit an important interchange of human values, over a span of time or within a cultural area of the world, on developments in architecture or technology, monumental arts, town-planning or landscape design; or

(iii) Bear a unique or at least exceptional testimony to a cultural tradition or to a civilization which is living or which has disappeared; or

(iv) Be an outstanding example of a type of building or architectural or technological ensemble or landscape which illustrates a significant stage(s) in human history; or

(v) Be an outstanding example of a traditional human settlement or land-use which is representative of a culture (or cultures), especially when it has become vulnerable under the impact of irreversible change; or

(vi) Be directly or tangibly associated with events or living traditions, with ideas, or with beliefs, with artistic and literary works of outstanding universal significance (the Committee considers that this criterion should justify inclusion in the List only in exceptional circumstances and in conjunction with other criteria cultural or natural).

(2) In addition to the criteria in paragraphs (b)(1)(i) through (b)(1)(vi) of this section, the sites should also meet the test of authenticity in design, material, workmanship or setting and in the case of cultural landscapes their

distinctive character and components (the Committee stressed that reconstruction is only acceptable if it is carried out on the basis of complete and detailed documentation on the original and to no extent on conjecture) and have adequate legal and/or contractual and/or traditional protection and management mechanisms to ensure the conservation of the nominated cultural properties or cultural landscapes.

(c) *What are the natural criteria?* A natural heritage property—as defined in Article 2 of the Convention—which is submitted for inclusion in the World Heritage List will be considered to be of outstanding universal value for the purposes of the Convention when the Committee finds that it meets one or more of the following criteria specified by the Operational Guidelines and fulfills the conditions of integrity:

(1) Sites nominated should therefore:

(i) Be outstanding examples representing major stages of earth's history, including the record of life, significant on-going geological processes in the development of landforms, or significant geomorphic or physiographic features; or

(ii) Be outstanding examples representing significant on-going ecological and biological processes in the evolution and development of terrestrial, fresh water, coastal and marine ecosystems and communities of plants and animals; or

(iii) Contain superlative natural phenomena or areas of exceptional natural beauty and aesthetic importance; or

(iv) Contain the most important and significant natural habitats for in-situ conservation of biological diversity, including those containing threatened species of outstanding universal value from the point of view of science or conservation.

(2) In addition to the criteria in paragraphs (c)(1)(i) through (c)(1)(iv) of this section, the sites should also fulfill the following conditions of integrity:

(i) The sites described in paragraph (c)(1)(i) of this section should contain all or most of the key interrelated and interdependent elements in their natural relationships.

(ii) The sites described in paragraph (c)(1)(ii) of this section should have sufficient size and contain the necessary elements to demonstrate the key aspects of processes that are essential for the long-term conservation of the ecosystems and the biological diversity they contain.

(iii) The sites described in paragraph (c)(1)(iii) of this section should be of outstanding aesthetic value and include areas that are essential for maintaining the beauty of the site.

(iv) The sites described in paragraph (c)(1)(iv) of this section should contain habitats for maintaining the most diverse fauna and flora characteristic of the biogeographic province and ecosystems under consideration.

(3) The sites should have a management plan. When a site does not have a management plan at the time when it is nominated for the consideration of the World Heritage Committee, the State Party concerned should indicate when such a plan will become available and how it proposes to mobilize the resources required for the

preparation and implementation of the plan. The State Party should also provide other document(s) (e.g. operational plans) which will guide the management of the site until such time when a management plan is finalized.

Dated: June 28, 2001.

Joseph E. Doddridge,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-70-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[SIP NO. MT-001-0032; FRL-7102-5]

Approval and Promulgation of Air Quality Implementation Plans; Montana; Transportation Conformity; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule; correction.

SUMMARY: The EPA published in the *Federal Register* on September 21, 2001 a document that, among other things, approved Montana's transportation conformity rule into the State Implementation Plan (SIP). In the regulatory text of the September 21, 2001, rule, EPA inadvertently incorporated by reference (IBR) sections of the rule which were not submitted for approval. EPA is correcting the regulatory text with this document.

EFFECTIVE DATE: This rule is effective December 19, 2001.

FOR FURTHER INFORMATION CONTACT: Kerri Fiedler, EPA, Region VIII, (303) 312-6493.

SUPPLEMENTARY INFORMATION: In our September 21, 2001 (66 FR 48561) (FR Doc. 01-23596) rulemaking, we approved Montana's transportation conformity rules (Sub-Chapter 13). In the regulatory text of the September 21, 2001, rule, we inadvertently incorporated by reference sections of sub-chapter 13 which were not submitted for approval. These references to sub-chapter 13 were sections "reserved" by Montana for future rule adoption. We are correcting the regulatory text of that rulemaking, (on page 48564, second column, Subpart BB—Montana, § 52.1370 Identification of Plan, paragraph (c)(47)(i)(A)) to read as follows: "Administrative Rules of Montana 17.8.1301, 17.8.1305, 17.8.1306, 17.8.1310 through 17.8.1313, effective June 4, 1999; and 17.8.1304 effective August 23, 1996."

Section 553 of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. We have determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because we are merely correcting incorrect text in the IBR section of a previous rulemaking. Thus, notice and public procedure are unnecessary. We find that this constitutes good cause under 5 U.S.C. 553(b)(B).

Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget. This rule is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001) because it is not a significant regulatory action under Executive Order 12866. Because the agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute as indicated in the **SUPPLEMENTARY INFORMATION** section above, it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Public Law 104-4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of UMRA. This rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

This technical correction action does not involve technical standards; thus the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 **note**) do not apply. The rule also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996). EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1998) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). EPA's compliance with these statutes and Executive Orders for the underlying rules are discussed in the September 21, 2001, rule, approving Montana's transportation conformity rules.

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement. 5 U.S.C. 808(2). As stated previously, EPA has made such a good cause finding, including the reasons therefore, and established an effective date of December 19, 2001. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This correction to the identification of plan for Montana is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements.

Accordingly, 40 CFR part 52, subpart BB of chapter I, title 40 is corrected by making the following amendments:

PART 52—[CORRECTED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

§ 52.1370 Identification of plan.

2. Revise § 52.1370(c)(47)(i)(A) to read as follows:

* * * * *

(c) * * *
(47) * * *
(i) * * *

(A) Administrative Rules of Montana 17.8.1301, 17.8.1305, 17.8.1306, 17.8.1310 through 17.8.1313, effective June 4, 1999; and 17.8.1304 effective August 23, 1996.

Dated: November 2, 2001.

Jack W. McGraw,

Acting Regional Administrator, Region 8.

BILLING CODE 6560-50-P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[DA 01-2592, MM Docket No. 01-85, RM-9039]

Television Broadcast Service; Boise, ID

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of KM Communications, Inc., an applicant for a construction permit for a new television station at Boise, Idaho, substitutes channel 39 for channel 14 at Boise. See 66 FR 20127, April 19, 2001. TV channel 39 can be allotted to Boise, Idaho, with a zero offset in compliance with the principle community coverage requirements of Sections 73.610 and 73.698 of the Commission's Rules and with the criteria set forth in the Commission's Public Notice released on November 22, 1999, DA 99-2605. The coordinates for channel 39 at Boise are North Latitude 43-45-18 and West Longitude 116-05-52. With this action, this proceeding is terminated.

DATES: Effective December 31, 2001.
