To determine whether your facility, company, business, organization, etc., is regulated by this action, you should carefully examine all of the applicability criteria in 40 CFR part 63, subpart MMM. If you have questions regarding the applicability of this proposed amendment to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

**I. What Action Is EPA Proposing?**

This proposal would revise the definition of “process tank” in 40 CFR part 63, subpart MMM. For further information, please see the direct final rulemaking notice located in the “Rules and Regulations” section of today’s **Federal Register**.

**II. What Are the Administrative Requirements for This Action?**

*Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 et seq.*

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions. For purposes of assessing the impacts of this proposed rule amendment on small entities, a small entity is defined as: (1) A small business in the North American Industrial Classification System (NAICS) code 325320 that has as many as 500 employees; (2) a small business in NAICS code 325199 that has as many as 1,000 employees; (3) a small

governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (4) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of this proposed rule amendment on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. In determining whether a rule has a significant economic impact on a substantial number of small entities, the impact of concern is any significant adverse economic impact on small entities, since the primary purpose of the regulatory flexibility analyses is to identify and address regulatory alternatives “which minimize any significant economic impact on small entities” (5 U.S.C. Sections 603 and 604). Thus, an agency may conclude that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves burden, or otherwise has a positive economic effect on all of the small entities subject to the rule. The EPA has 1 determined that none of the small entities will experience a significant impact because the proposed amendment imposes no additional regulatory requirements on owners or operators of affected sources.

For information regarding other administrative requirements for this action, please see the direct final rule action that is located in the “Rules and Regulations” section of this **Federal Register** publication.
