SUPPLEMENTARY INFORMATION:

Comments Invited

A copy of the proposed AC may be obtained by contacting the person named under **FOR FURTHER INFORMATION CONTACT**, or Internet users may obtain a copy at the following address: "<http://www.airweb.faa.gov/rgl>". Interested persons are invited to comment on the proposed AC, and to submit such written data, views, or arguments as they desire. Commenters must identify the subject of the AC, and submit comments to the address specified above. All communications received on or before the closing date for comments will be considered by the Engine and Propeller Directorate, Aircraft Certification Service, before issuance of the final AC.

Background

This draft advisory circular (AC) would provide guidance and acceptable methods, but no the only methods that may be used to demonstrate compliance with the fire prevention requirements under Title 14 Code of Federal Regulations (14 CFR), part 33. Section 33.17 is the primary section addressed in this proposed AC, although other sections of part 33 that address fire prevention may also be applicable. Other related parts and sections are listed in AC 20-135, Powerplant Installation and Propulsion System Component Fire Protection Methods, Standards and Criteria, Appendix 1. This proposed AC is intended to provide guidance relating to these requirements, and is considered a supplement to AC 20-135.

This advisory circular would be published under the authority granted to the Administrator by 49 U.S.C.

106(g), 40113, 44701-44702, 44704, and would provide guidance for the requirements in 14 CFR part 33.

Issued in Burlington, Massachusetts on November 30, 2001.

Fran Favara,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

Federal Aviation Administration

Public Notice For Waiver of Aeronautical Land-Use Assurance; Toledo Express Airport; Toledo, OH

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of intent of waiver with respect to land.

SUMMARY: The Federal Aviation Administration (FAA) is considering a proposal to change a portion of airport land from aeronautical use to non-aeronautical use and to authorize the sale of the airport property. The proposal consists of sixty-seven parcels of land totaling approximately 122.5 acres for industrial land use. Current use and present condition is vacant grassland. There are no impacts to the airport by allowing the airport to dispose of this property. The land was acquired under FAA Project No(s). AIP-3-39-0077-1190, AIP-3-39-0077-1692, AIP-3-39-0077-1993, AIP-3-39-0077-2293, AIP-3-39-0077-2594, and AIP-3-39-0077-2794. Approval does not constitute a commitment by the FAA to financially assist in the sale of the subject airport property nor a determination that all measures covered by the program are eligible for Airport Improvement Program funding from the FAA. The disposition of proceeds from the sale of the airport property will be in accordance with the FAA's Policy and Procedures Concerning the Use of Airport Revenue, published in the **Federal Register** on February 16, 1999. This proposal is for approximately 122.5 acres in total.

In accordance with section 47107(h) of title 49, United States Code, this notice is required to be published in the **Federal Register** 30 days before modifying the land-use assurance that requires the property to be used for an aeronautical purpose. The proposed land will be used for commercial/industrial development, which will provide additional jobs in an economically challenged area and

enhance the aesthetics of the surrounding community.

The proceeds from the sale of the land will be reinvested in an approved noise compatibility project as prescribed by the Secretary of Transportation, or be paid to the Secretary of Transportation for deposit in the Trust Fund.

DATES: Comments must be received on or before January 9, 2002.

FOR FURTHER INFORMATION CONTACT: Mr. Lawrence C. King, Federal Aviation Administration, Great Lakes Region, Detroit Airports District Office, DET ADO-670.2, Willow Run Airport, East, 8820 Beck Road, Belleville, Michigan 48111, (734) 487-7293. Documents reflecting this FAA action may be reviewed at this same location or at Toledo Express Airport, Toledo, Ohio.

Federal Aviation Administration

Noise Exposure Map Notice and Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its determination that the noise exposure maps submitted by Seattle-Tacoma International Airport under the provisions of 49 U.S.C. 47503 (a) and 14 CFR part 150 are in compliance with applicable requirements. The FAA also announces that it is reviewing the proposed noise compatibility program that was submitted for Seattle-Tacoma International Airport under Part 150 in conjunction with the noise exposure maps, and that this program will be approved or disapproved on or before June 3, 2002.

EFFECTIVE DATE: The effective date of the FAA's determination on the Seattle-Tacoma International Airport noise exposure maps and the start of its review of the associated noise compatibility program is December 3, 2001. The public comment period ends January 31, 2002.

FOR FURTHER INFORMATION CONTACT: Dennis Ossenkop, FAA, Airports Division, ANM-611, 1601 Lind Avenue, SW., Renton, Washington, 98055-4056. Comments on the proposed noise compatibility program should also be submitted to the above office.

SUPPLEMENTARY INFORMATION: The notice announces that the FAA finds that the noise exposure maps for Seattle-Tacoma

International Airport are in compliance with applicable requirements of Part 150, effective December 3, 2001.

Further, FAA is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before June 3, 2002. This notice also announces the availability of this program for public review and comment.

Under 49 U.S.C. 47503(a), and airport operator may submit to the FAA a noise exposure map which meets applicable regulations and which depicts noncompatible land uses as of the date of submission of such map, a description of projected aircraft operations, and the ways in which such operations will affect such map. 49 U.S.C. 47503 (a)(1) requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted a noise exposure map that has been found by FAA to be in compliance with the requirements of Federal Aviation Regulation (FAR) Part 150, promulgated pursuant to 49 U.S.C. 47503 (A) may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

The Manager of the Airfield Line of Business of Seattle-Tacoma International Airport submitted to the FAA noise exposure maps, descriptions and other documentation which were produced during an airport Noise Compatibility Study. It was requested that the FAA review the noise mitigation measures be approved as a noise compatibility program under 49 U.S.C. 47504.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by Seattle-Tacoma International Airport. The specific maps under consideration are Figures C40 and F1 in the submission. The FAA has determined that these maps for Seattle-Tacoma International Airport are in compliance with applicable requirements. This determination is effective on December 3, 2001. FAA's determination on an airport operator's noise exposure maps is limited to the determination that the maps were developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such determination does not constitute approval of the applicant's data, information or plans, or a commitment

to a noise compatibility program or to fund implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on noise exposure maps submitted under 49 U.S.C. 47503, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure maps to resolve questions concerning, for example, which properties should be covered by the provisions of 49 U.S.C. 47507. These functions are inseparable from the ultimate land control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's review of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the maps depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under 49 U.S.C. 47503(a)(1). The FAA has relied on the certification by the airport operator, under section 150.21 of the FAR part 150, that the statutorily required consultation has been accomplished.

The FAA has formally received the noise compatibility program for Seattle-Tacoma International Airport, also effective on December 3, 2001. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before June 3, 2002.

The FAA's detailed evaluation will be conducted under the provisions of 14 CFR part 150, paragraph 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to the local land use authorities, will be considered by the FAA to the extent practicable. Copies of
