

Aviation Administration, Docket No. 00-ANM-12, 1601 Lind Avenue SW, Renton, Washington 98055-4056; telephone number: (425) 227-2527.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposal rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy related aspects of the proposal.

Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit, with those comments, a self-addressed stamped postcard on which the following statement is made:

"Comments to Airspace Docket No. 00-ANM-12." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in the light of comments received. All comments submitted will be available for examination at the address listed above both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Airspace Branch, ANM-520, 1601 Lind Avenue SW, Renton, Washington 98055-4056. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A, which describes the application procedure.

The Proposal

The FAA is considering an amendments to Title 14 Code of Federal Regulations, part 71 (14 CFR part 71) by establishing Class E airspace at Heber City, UT. A new RNAV SIAP to Heber City Muni-Russ McDonald Field has

made this proposal necessary. Additional controlled airspace from 700 feet, and 1,200 feet, above the surface is required to contain aircraft executing the RNAV-A SIAP to Heber City Muni-Russ McDonald Field. The FAA establishes Class E airspace where necessary to contain aircraft transitioning between the terminal and en route environments. The intended effect of this proposal is designed to provide for the safe and efficient use of the navigable airspace. This proposal would promote safe flight operations under IFR at the Heber City Muni-Russ McDonald Field and between the terminal and en route transition stages.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas upward from 700 feet or more above the surface of the earth, are published in Paragraph 6005, of FAA Order 7400.9H dated September 1, 2000, and effective September 16, 2000, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves as established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11013; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR part 71.1 of the Federal Aviation Administration Order 7400.9H, Airspace Designations and Reporting Points, dated September 1, 2000, and effective September 16, 2000, in amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

BILLING CODE 4910-13-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 207

St. Marys Falls Canal and Locks, Michigan; Use, Administration and Navigation

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of proposed rulemaking and request for comments.

SUMMARY: The Corps of Engineers proposes to amend its regulations on procedures to navigate the St. Marys Falls Canal and Soo Locks at Sault St. Marie, Michigan to incorporate changes in navigation safety procedures published in three Notice to Navigation Interests issued on March 29, 2000. We propose to remove reference to oil tankers having draft and beam permitting transit through the Canadian lock, since the Canadian lock no longer can handle oil tankers. We propose to prohibit the cleaning and gas freeing of tanks on all hazardous material cargo vessels while either in the lock or while in any part of the Soo Locks approach canals. As an additional vessel safety measure, we propose to limit movement to a single vessel whenever a tank vessel is within the limits of the lock piers either above or below the locks. We also propose to allow tankers with any type cargo to transit the MacArthur Lock when the locks park is closed, while tankers carrying non-combustible products will be allowed to transit the MacArthur Lock when the park is open. We propose to clarify that vessels carrying explosives are prohibited from transiting U.S. Locks.

DATES: Written comments must be received by March 9, 2001.

ADDRESSES: U.S. Army Corps of Engineers, ATTN: CECW-OD, 441 G Street, NW, Washington, DC 20314-1000. Comments may also be faxed to (202) 761-1685 or e-mail to James.D.Hilton@usace.army.mil.

FOR FURTHER INFORMATION CONTACT: Mr. Jim Hilton, Dredging and Operations Branch (CECW-OD) at (202) 761-4669 or Mr. David L. Dulong, Chief, Engineering Technical Services, Detroit District at (313) 226-6794.

SUPPLEMENTARY INFORMATION: Pursuant to its authority in Section 4 of the Rivers and Harbors Act of August 18, 1894 (28 Stat. 362; 33 U.S.C. 1), the Corps is proposing to amend the regulations in 33 CFR part 207.441(b), (4), and (5). The regulation governing the operation of the St. Marys Falls Canal and locks, 33 CFR 207.441 was adopted on March 6, 1954 (19 FR 1275) and has been amended at various times.

Paragraph (b) is being amended to delete reference to classes of vessels permitted to transit the U.S. locks or enter any of the United States approach canals. Paragraph (b)(4) is being further amended by deleting reference to oil tankers being permitted to transit through the Canadian lock, as the Canadian lock has been refurbished and

can no longer accommodate oil tankers. In addition, paragraph (b)(4) is amended by deleting reference to personnel smoking onboard tankers while in the lock area, as prohibiting smoking is included in 33 CFR 207.440(s). Paragraph (b)(4) is being amended and rewritten to improve vessel safety by adding subparagraphs(b)(4) (i), (ii), and (iii). Subparagraph (b)(4)(i) prohibits the cleaning and gas freeing of tanks on all hazardous material cargo vessels (as defined in 49 CFR part 171), while the vessel is either in the lock or in any part of the Soo Locks approach canals from the outer end of the east center pier to the outer end of the southwest pier. Subparagraph (b)(4) (ii) is being added for safety purposes to limit vessel movement to a single vessel whenever a tank vessel carrying hazardous cargo is within the limits of the lock piers either above or below the locks. Subparagraph (b)(4)(iii) is being added to allow tankers carrying any type of cargo to transit MacArthur Lock when the locks park is closed. Tankers carrying non-combustible products that will not react hazardously with water will be allowed to transit MacArthur Lock when the park is open.

Paragraph (b) (5) is being amended to add a phrase to clarify that vessels carrying explosives are prohibited from transiting the U.S. Locks.

This proposed rule is not a major rule for the purposes of Executive Order 12866. As required by the Regulatory Flexibility Act, the Corps of Engineers certifies that this proposed rule will not have a significant impact on small business entities.

List of Subjects in 33 CFR Part 207

Navigation (water), Water transportation, Vessels.

For reasons set out in the preamble, Title 33, Chapter II of the Code of Federal Regulations is proposed to be amended as follows:

PART 207—NAVIGATION REGULATIONS

1. The authority citation for part 207 continues to read as follows:

Authority: 28 Stat. 362 (33 U.S.C. 1)

2. Section 207.441 is amended by revising paragraphs (b) introductory text, (b)(4) and (b)(5) to read as follows:

§ 207.441 St. Marys Falls Canal and Locks, Mich.; security.

* * * * *

(b) Restrictions on transit of vessels.

* * * * *

(4) *Tanker vessels*—(i) *Hazardous material*. Cleaning and gas freeing of tanks on all hazardous material cargo

vessels (as defined in 49 CFR part 171) shall not take place in a lock or any part of the Soo Locks approach canals from the outer end of the east center pier to the outer end of the southwest pier.

(ii) *Approaching*. Whenever a tank vessel is approaching the Soo Locks and within the limits of the lock piers (outer ends of the southwest and east center piers) either above or below the locks, no other vessel will be released from the locks in the direction of the approaching tank vessel until the tank vessel is within the lock chamber or securely moored to the approach pier. Whenever a tank vessel is within a Soo Lock Chamber, the tank vessel will not be released from the lock until the channel within the limits of the lock piers either above or below the lock, in the direction of the tank vessel, is clear of vessels or vessels therein are securely moored to the approach pier. This limits movement to a single vessel whenever a tank vessel is within the limits of the lock piers either above or below the locks. Tank vessels to which the above applies include those vessels carrying fuel oil, gasoline, crude oil or other flammable liquids in bulk, including vessels that are not gas free where the previous cargo was one of these liquids.

(iii) *Lock parks*. Except as provided in paragraph (b)(5) of this section, tankers with any type cargo will be permitted to transit the MacArthur Lock when the locks park is closed. The exact dates and times that the park is closed varies, but generally these periods are from midnight to 6:00 a.m. June through September with one or two hour closure extensions in the early and late seasons. Tankers carrying non-combustible products that will not react hazardously with water or tankers that have been purged of gas or hazardous fumes will be allowed to transit the MacArthur Lock when the park is open.

(5) All vessels carrying explosives are prohibited from transiting the U.S. Locks.

* * * * *

Dated: January 4, 2001.

Approved.

Alfred H. Foxx,

Colonel, U.S. Army Executive Director for Civil Works.
