SUPPLEMENTARY INFORMATION: The LEAP will convene to review management options for a Secretarial Amendment to the Reef Fish Fishery Management Plan that would establish a 10-year rebuilding period for red grouper in the Gulf of Mexico. The amendment contains various options for setting sustainable fishing parameters and rebuilding strategies/scenarios. It also contains management options including quotas, trip limits, closed seasons, bag limits, and additional gear restrictions. The LEAP will also review the status regarding implementation of previous management actions taken by the Council, as well as an update of the

implementation of the Cooperative 2002 Operations Plan, including Joint Enforcement Agreements (JEAs) among the Gulf states and NOAA Enforcement. Finally, the LEAP will discuss the possible development of an enforceability document that would gauge the relative ease/difficulty for enforcement of various types of management measures, and issues of safety regarding fishing around port and offshore structures, particularly oil and gas rigs.

The LEAP consists of principal law enforcement officers in each of the Gulf states as well as NMFS, the U.S. Coast Guard, and NOAA General Counsel. A copy of the agenda and related materials can be obtained by calling the Council office at 813-228-2815.

Background

This amendment would (1) revise the quarterly commercial quota system for black sea bass implemented in Amendment 9 to the Summer Flounder, Scup, and Black Sea Bass Fisheries Management Plan; (2) address the problem related to permit requirements for fishermen that have both a Northeast Black Sea Bass Permit and a Southeast Snapper/Grouper Permit and fish for black sea bass north and south of Cape Hatteras, NC; (3) address the problems related to the wet storage of black sea bass pots/traps; (4) establish de minimus specifications for black sea bass under the Atlantic State Marine Fisheries Commission Interstate Fisheries Management Program Charter; (5) implement tag requirements for black sea bass pots/traps; (6) limit the number of black sea bass pots/traps fished by fishermen; and (7) assess the impact of fishing activities on essential fish habitat and implement management alternatives for summer flounder, scup

and black sea bass to prevent, mitigate, or minimize adverse effects on essential fish habitat caused by fishing.

In conjunction with development of Amendment 13, the Council prepared a Draft Environmental Impact Statement (DEIS) under the National Environmental Policy Act (NEPA) to assess the potential effects of the proposed actions, and the alternatives to those actions, on the human environment.
