

the Reclamation Act of 1902, ch. 1093, 32 Stat. 388, as amended and supplemented by subsequent enactments, particularly section 9(c) of the Reclamation Project Act of 1939, 43 U.S.C. 485h(c); and other acts specifically applicable to the projects involved.

By Delegation Order No. 00-037.00, effective December 6, 2001, the Secretary of DOE delegated (1) the authority to develop long-term power and transmission rates on a nonexclusive basis to Western's Administrator, (2) the authority to confirm, approve, and place such rates into effect on an interim basis to the Deputy Secretary, and (3) the authority to confirm, approve, and place into effect on a final basis, to remand or to disapprove such rates to FERC. Existing DOE procedures for public participation in power rate adjustments (10 CFR part 903) became effective on September 18, 1985.

Availability of Information

Interested parties may review and copy all brochures, studies, comments, letters, memorandums, or other documents made or kept by Western in developing the proposed rates. These documents are at the CRSP MC, located at 150 East Social Hall Avenue, Suite 300, Salt Lake City, Utah.

Regulatory Procedural Requirements

Regulatory Flexibility Analysis

The Regulatory Flexibility Act of 1980 (5 U.S.C. 601, *et seq.*) requires Federal agencies to perform a regulatory flexibility analysis if a final rule is likely to have a significant economic impact on a substantial number of small entities and there is a legal requirement to issue a general notice of proposed rulemaking. This action does not require a regulatory flexibility analysis since it is a rulemaking of particular applicability involving rates or services applicable to public property.

Environmental Compliance

In compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*); Council on Environmental Quality Regulations (40 CFR parts 1500-1508); and DOE NEPA Regulations (10 CFR part 1021), Western has determined that this action is categorically excluded from preparing an environmental assessment or an environmental impact statement.

Determination Under Executive Order 12866

Western has an exemption from centralized regulatory review under

Executive Order 12866; therefore, this notice requires no clearance by the Office of Management and Budget.

Small Business Regulatory Enforcement Fairness Act

Western has determined that this rule is exempt from Congressional notification requirements under 5 U.S.C. 801 because the action is a rulemaking of particular applicability relating to rates or services and involves matters of procedure.

Dated: February 15, 2002.

Michael S. HacsKaylo,

Administrator.

Any distribution, sale, or use of the products subject to this cancellation order is only permitted in accordance with the terms of the existing stocks provisions of this cancellation order.

II. Requests to Cancel and Amend Registrations to Delete Uses

A. Background

During development of the Interim Reregistration Eligibility Decision (IRED) on the organophosphorus pesticide, acephate, EPA identified risks of concern for residents, including children, who contact treated surfaces in homes following indoor application. EPA also identified a risk of concern for young children playing on lawns treated with acephate. To voluntarily address these health risk concerns, Valent and all other relevant acephate registrants agreed to request amendment of their registrations to delete these uses.

The IRED for acephate completed on September 30, 2001, and announced in the *Federal Register* (January 30, 2002) (67 FR 4426) (FRL-6821-1), noted the need to consult with the Secretary of Health and Human Services prior to approving a certain request to cancel
