Environmental

The Coast Guard considered the environmental impact of this rule and concluded under Figure 2–1, paragraph 34(g) of Commandant Instruction M16475.1D, this rule is categorically excluded from further environmental documentation. A “Categorical Exclusion Determination” is available in the docket for inspection or copying where indicated under **ADDRESSES**.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationships between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or use. We have determined that it is not a “significant energy action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information and Regulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual Changes for Bedloaded Bundles of Periodicals

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service is eliminating the option in the Domestic Mail Manual that allows mailers to bedload bundles (more than one package strapped together) of Periodicals flat-size mail.

EFFECTIVE DATE: March 31, 2002.

FOR FURTHER INFORMATION CONTACT:

Anne Emmerth at (703) 292–3641.

SUPPLEMENTARY INFORMATION: On December 20, 2001, the Postal Service published a proposed rule in the *Federal Register* (66 FR 65668) soliciting comments on a proposal to delete the standards in the *Domestic Mail Manual* (DMM) that allow bundles (more than one package strapped together) of Periodicals flat-size mail to be bedloaded instead of placed in sacks or on pallets.

Current DMM M210.5.0 and M220.5.0 allow authorized mailers to place packages of Presorted rate and carrier route rate Periodicals flats directly into a truck or trailer if the packages are secured together into bundles containing a minimum of 20 pounds of mail (instead of sacking or palletizing those packages). Such preparation is optional and requires Postal Service authorization from Business Mailer Support at Headquarters.

Postal Service records indicate that there are no mailers who are preparing mail in this manner.

We received no comments opposing the proposal and one comment in support of eliminating this mail preparation option. The commenter, a large commercial printer, supports the Postal Service’s efforts to streamline

mail processing operations and reduce overall costs.

Because of the response received, and because bedloaded bundles are generally not cost-efficient for the Postal Service to handle and process, the Postal Service is removing the option to prepare Periodicals flats as bedloaded bundles. Effective March 31, 2002, all Periodicals flats must be prepared in sacks or on pallets.

This change does not apply to mailers who transport packages of Periodicals to destination delivery units under exceptional dispatch.

For the reasons discussed above, the Postal Service hereby adopts the following amendments to the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations (see 39 CFR part 111).

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The EPA is approving a negative declaration submitted by the State of Indiana which indicates that the State does not need regulations covering existing Small Municipal Waste Combustors (MWC) units. Indiana submitted its negative declaration regarding this category of sources in letters dated November 7, 2001, and December 3, 2001. The declaration was based on a systematic search of the State's internal databases, which resulted in the determination that there are no affected small MWC units in Indiana.

DATES: This rule is effective on May 7, 2002, unless EPA receives adverse written comments by April 8, 2002. If adverse comment is received, EPA will publish a timely withdrawal of the rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Written comments should be sent to: J. Elmer Bortzer, Chief, Regulation Development Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

I. What is the Background for This Action?

On December 6, 2000, the EPA finalized a rule for small MWC units. EPA promulgated this rule based on sections 111(d) and 129 of the Clean Air Act (Act) Amendments of 1990. The federal rule includes emission guidelines for existing units and standards of performance for new, modified or reconstructed sources. EPA published the rule for existing small MWC units in the **Federal Register** on December 6, 2000, (65 FR 76378), to be codified at 40 CFR part 60, subpart BBBB (Emission Guidelines for Small Municipal Waste Combustion Units.) EPA published rules for new, modified and reconstructed small MWC units in the **Federal Register** on December 6, 2000, (65 FR 76350), to be codified at 40 CFR part 60, subpart AAAA (New Source Performance Standards for New Small Municipal Waste Combustion Units). The regulatory text and other background information for these final rulemakings can be accessed electronically from the EPA Technology Transfer Network website. For small MWC the website address is: <http://www.epa.gov/ttn/atw/129/mwc/rimwmc2.html>

Sections 111(d) and 129 of the Act require States in which a designated existing facility is operating one or more small MWC units to submit to EPA a plan to implement and enforce the emission guidelines. If, however, there are no small MWC units and the State therefore chooses not to develop and submit such a plan, it must submit a negative declaration letter. (40 CFR 60.1510, 62.06.) Section 129 of the Act requires that the State plan be at least as protective as the emission guidelines and must provide for compliance by the affected facilities no later than 3 years after EPA approves the State plan, but no later than 5 years after EPA promulgates the emission guidelines. Sections 111(d) and 129 of the Act also require EPA to develop, implement and
